

Contents

1 Organometallic compounds in the environment:	
An overview.....	1
<i>P. J. Craig and R. O. Jenkins</i>	
General points.....	1
Biomethylation	5
Arsenic	6
Antimony.....	8
Mercury	8
Microbial demethylation/dealkylation.....	11
Literature	12
2 Advances in analytical methods for speciation of trace elements in the environment.....	17
<i>J. Szpunar, B. Bouyssiere, R. Lobinski</i>	
Introduction	17
Organometal(oid) Species in the Environment.....	18
Hyphenated Techniques in Speciation Analysis	18
Advances in GC/ICP-MS.....	20
Advances in Gas Chromatography prior to ICP-MS	21
ICP-MS Detection in Gas Chromatography	22
GC/ICP-MS Studies Using Stable Isotopes.....	24
Advances in Sample Preparation.....	27
Multidimensional LC with ICP-MS Detection	29
The Coupling HPLC/ICP-MS	29
Electrospray Mass Spectrometry for the Species Identification.....	30
Multidimensional Analytical Strategy for the Identification of Organoarsenic Species in Marine Biota.....	34
Conclusions.....	35
Literature	35
3 Analytical strategies for arsenic speciation in environmental and biological samples.....	41
<i>J. Feldmann, S. Devalla, A. Raab, H. R. Hansen</i>	
Arsenic species in the environment and in biological samples.....	41
Analytical strategies.....	45
Sample preparation.....	45
Separation methods	47

Identification	49
Quantification.....	51
Analytical aspects of selected arsenic speciation studies.....	52
Gas chromatography coupled to MS or ICP-MS	52
Liquid chromatography coupled to ESI-MS and ICP-MS	57
Conclusions	67
Acknowledgements	68
Literature	68
4 Occurrence and speciation of arsenic, antimony and tin in specimens used for environmental biomonitoring of limnic ecosystems	71
<i>H. Emons, Z. Sebesvari, K. Falk, M. Krachler</i>	
Environmental biomonitoring	71
Occurrence of As, Sb and Sn in freshwater ecosystems	72
Arsenic	73
Antimony	74
Tin	75
Speciation analysis of As, Sb and Sn in limnic samples.....	76
Arsenic species.....	80
Antimony species.....	82
Tin species.....	84
Quality assurance	84
Speciation of As, Sb, Sn in limnic bioindicators – first results.....	86
Arsenic	86
Antimony	88
Tin	88
Outlook and future challenges	91
Acknowledgment.....	92
Literature	92
5 Methylated metal(loid) species in biological waste treatment.....	97
<i>R.A. Diaz-Bone, B. Menzel, A. Barrenstein, A.V. Hirner</i>	
Introduction	97
Biological waste treatment	98
Experimental.....	100
Derivatisation of ionic species	100
Sampling of gaseous species	102
Metal analysis	102
Set-up of garden composting experiments	103
Results and discussion	103
Ionic organometal(loid) species in compost from waste treatment facilities.....	103
Metal(loid) species in different aged compost	105

Biomethylation in garden compost.....	108
Conclusions.....	110
6 Volatile mercury species in environmental gases and biological samples.....	113
<i>J. Hippler, J. Kresimon, A. V. Hirner</i>	
Introduction	113
Analytical methods	114
Instrumental techniques.....	114
Results	119
Environmental samples	119
Biological samples	122
Validation of data	127
Discussion.....	129
Dimethylmercury in environmental gases.....	129
Mercury species generated in metabolic processes	130
Conclusions.....	131
Acknowledgements.....	132
Literature	132
7 Biovolatilisation of metal(loid)s by microorganisms	137
<i>K. Michalke & R. Hensel</i>	
Introduction	137
Analytical setup for identifying and quantifying metal(loid)-organic derivatives.....	138
Volatile metal(loid) compounds in the environment	138
Towards an understanding of metal(loid) biotransformation processes	140
Direct monitoring of volatile metal(loid) derivatives in the environment .	140
Monitoring of metal(loid) volatilisation by microbial populations enriched from original environments	142
Monitoring of metal(loid) volatilisation by isolated strains	147
Conclusion and perspectives.....	149
Literature	150
8 The Effect of Phosphate on the Bioaccumulation and Biotransformation of Arsenic(V) by the Marine Alga <i>Fucus gardneri</i>.....	155
<i>S. C. R. Granchinho, W. R. Cullen, E. Polishchuk, and K. J. Reimer</i>	

Introduction	155
Experimental	156
Reagents and Chemicals	156
Medium and Antibiotics	156
<i>Fucus gardneri</i> Samples	157
Sample Preparation and Analysis	157
Results and discussion	158
Acknowledgments	165
Literature	165
9 Molecular modeling studies of specific interactions between organometallic compounds and DNA.....	167
<i>R. Yonchev, H. Rehage, H. Kuhn</i>	
Introduction	167
Theory and methods	167
Extensible Systematic Force Field (ESFF).....	168
Ligand aligning algorithm.....	172
Results and discussion	175
Conclusions	180
Future work	180
Literature	180
10 Organometal(loid) compounds associated with human metabolism.....	181
<i>A.V. Hirner, L. M. Hartmann, J. Hippler, J. Kresimon, J. Koesters, K. Michalke, M. Sulkowski, A. W. Rettenmeier</i>	
Introduction	181
Experimental.....	183
Ingestion experiment.....	183
Analytical methods.....	184
Results	185
Gaseous samples	185
Saliva.....	186
Urine	187
Blood.....	192
Faeces.....	196
Discussion.....	198
Conclusions	201
Acknowledgements	201
Literature	201
11 Genotoxicity of organometallic species.....	205
<i>A.-M. Florea, E. Dopp, G. Obe, A.W. Rettenmeier</i>	

Human exposure to organometallic species.....	205
Genotoxicity of organometallic species.....	206
Genotoxic effects of organomercury compounds.....	206
Genotoxic effects of organoarsenic compounds.....	208
Genotoxic effects of organotin compounds.....	211
<i>In vitro</i> genotoxicity of different organometal(loid) compounds in CHO cells.....	214
Summary.....	215
Literature.....	216
12 Current aspects on the genotoxicity of arsenite and its methylated metabolites: Oxidative stress and interactions with the cellular response to DNA damage	221
<i>A. Hartwig, T. Schwerdtle, I. Walter</i>	
Introduction.....	221
Oxidative DNA damage.....	223
DNA repair systems and interactions by arsenite.....	225
Poly(ADP-ribosylation) as sensitive intracellular target for arsenite.....	226
Conclusions and perspectives.....	228
Acknowledgements.....	230
Literature.....	230
13 Cytogenetic investigations in employees from waste industries.....	235
<i>Helga Fender, Giesela Wolf</i>	
Introduction.....	235
Materials and methods.....	236
Subjects.....	236
Smoking Status.....	237
Cytogenetic methods.....	238
Results.....	239
Discussion.....	243
Acknowledgements.....	244
Literature.....	244
14 Neurotoxicity of metals	247
<i>G. Stoltenburg-Didinger</i>	
Introduction.....	247
Mercury.....	248
Lead.....	251
Literature.....	255

15 Actions of metals on membrane channels, calcium homeostasis and synaptic plasticity	259
<i>D. Büsselberg</i>	
Relevance of metals	259
Lead.....	259
Aluminium	261
Zinc	262
Mercury.....	262
Interference of metals with cell functions.....	263
Metals on Membrane Channels.....	264
Other channels involved in lead toxicity	268
Metals and calcium homeostasis	269
Lead and aluminium actions on synaptic plasticity.....	269
Relevance of the data.....	270
General Implications.....	271
Literature	272
16 Effects of organometal(loid) compounds on neuronal ion channels: possible sites for neurotoxicity	283
<i>J. Gruner, K. Krüger, N. Binding, M. Madeja, U. Mußhoff</i>	
Toxicity of organometal(loid)s.....	283
Neurotoxic aspects of organometal(loid)s	283
Neurotoxicity of inorganic and organic arsenicals	285
Target structures of neurotoxicity.....	286
Function of ion channels in the nervous system	287
Prediction of neurotoxic potency of hazardous substances with an in vivo expression system: <i>Xenopus laevis</i> oocytes.....	288
The use of <i>Xenopus laevis</i> oocytes for electrophysiological studies of ion channels.....	288
Testing the <i>Xenopus</i> expression system for neurotoxicological investigations: Effects of lead on voltage- and transmitter-operated ion channels....	291
Effects of arsenicals on transmitter-operated ion channels.....	293
Transmembraneous ion currents through the different glutamate-operated ion channels.....	293
Electrophysiological techniques.....	294
Reproducibility of the receptor-mediated ion currents (control experiments).....	295
Application of the arsenicals	296
Effects of inorganic arsenite.....	297
Effects of monomethylarsonic acid (MeAsO(OH) ₂)	299
Effects of dimethylarsinic acid (Me ₂ AsOOH).....	301
Effects of arsenicals on voltage-operated potassium channels	303
Transmembraneous ion currents through different voltage-operated potassium channels.....	304
Electrophysiological techniques.....	304

Neuronal ion channels as targets for organic arsenicals	306
Perspectives and limitation of <i>Xenopus</i> oocytes	307
Effects of arsenicals on glutamate-operated ion channels	307
Effects of arsenicals on voltage-operated potassium channels	309
Significance in arsenic poisoning.....	310
Literature	310
17 Panel discussion: Analytical aspects	
Discussion Session on “Speciation Analysis of Environmental	
Samples”	317
<i>Convener: H. Emons</i>	
18 Panel discussion: Toxicological Aspects	
Discussion Session on "Toxicological Aspects of Alkylated	
Metal(loid) Species"	319
<i>Convener: A. W. Rettenmeier</i>	
Resumé	323
Subject Index	325
