# Table of Contents

Preconcept Algebras and Generalized Double Boolean Algebras .......... 1  
*Rudolf Wille*

Protoconcept Graphs: The Lattice of Conceptual Contents ............... 14  
*Joachim Hereth Correia and Julia Klinger*

Signs and Formal Concepts .............................................. 28  
*Uta Priss*

A Mathematical Model for TOSCANA-Systems:  
Conceptual Data Systems .............................................. 39  
*Joachim Hereth Correia and Tim B. Kaiser*

BLID: An Application of Logical Information Systems  
to Bioinformatics ......................................................... 47  
*Sébastien Ferré and Ross D. King*

Formal Concept Analysis: Its Role in Teaching Lattice Theory .......... 55  
*Brian A. Davey*

Concept Lattices for Information Visualization:  
Can Novices Read Line-Diagrams? ...................................... 57  
*Peter Eklund, Jon Ducrou, and Peter Brawn*

Browsing Search Results via Formal Concept Analysis:  
Automatic Selection of Attributes ..................................... 74  
*Juan M. Cigarrán, Julio Gonzalo, Anselmo Peñas, and Felisa Verdejo*

Formal Concept Analysis and Semantic File Systems ................. 88  
*Ben Martin*

Numerical Analysis in Conceptual Systems with TOSCANAJ .......... 96  
*Peter Becker*

Tool Support for FCA ......................................................... 104  
*Thomas Tilley*

Automated Lattice Drawing ............................................... 112  
*Ralph Freese*

Congruences of Finite Distributive Concept Algebras ................. 128  
*Bernhard Ganter*

When Is a Concept Algebra Boolean? ..................................... 142  
*Léonard Kwuida*
VIII Table of Contents

Background Knowledge in Concept Graphs ......................................... 156
Frithjof Dau

Agreement Contexts in Formal Concept Analysis ............................... 172
Richard Cole and Peter Becker

Towards a Conceptual Theory of Indistinguishable Objects ................. 180
Karl Erich Wolff

Conceptual Knowledge Processing with Formal Concept Analysis and Ontologies .................................................. 189
Philipp Cimiano, Andreas Hotho, Gerd Stumme, and Julien Tane

A First Step towards Protoconcept Exploration ................................ 208
Björn Vormbrock

Geometry of Data Tables .............................................................. 222
Tim B. Kaiser and Stefan E. Schmidt

Concept Extensions and Weak Clusters Associated with Multiway Dissimilarity Measures ................................. 236
Jean Diatta

Unlocking the Semantics of Roget’s Thesaurus Using Formal Concept Analysis .................................................. 244
L. John Old

FCA in Knowledge Technologies: Experiences and Opportunities ........ 252
Yannis Kalfoglou, Srinandan Dasmahapatra, and Yun-Heh Chen-Burger

Applying Formal Concept Analysis to Description Logics ................... 261
Franz Baader and Baris Sertkaya

Machine Learning and Formal Concept Analysis ................................ 287
Sergei O. Kuznetsov

A Comparative Study of FCA-Based Supervised Classification Algorithms .................................................. 313
Huaiyu Fu, Huaiguo Fu, Patrik Njiwoua, and Engelbert Mephu Nguifo

Modelling Tacit Knowledge via Questionnaire Data .......................... 321
Peter Busch and Debbie Richards

Predicate Invention and the Revision of First-Order Concept Lattices ...... 329
Michael Bain

The Power of Peircean Algebraic Logic (PAL) ................................... 337
Joachim Hereth Correia and Reinhard Pöschel
### Table of Contents

Formal Concept Analysis for Knowledge Discovery and Data Mining:
The New Challenges ................................................ 352  
*Petko Valtchev, Rokia Missaoui, and Robert Godin*

AddIntent: A New Incremental Algorithm for Constructing Concept Lattices ........................................... 372  
*Dean van der Merwe, Sergei Obiedkov, and Derrick Kourie*

QuDA: Applying Formal Concept Analysis in a Data Mining Environment ................................................. 386  
*Peter A. Grigoriev and Serhiy A. Yevtushenko*

A Parallel Algorithm to Generate Formal Concepts for Large Data ..................................................... 394  
*Huaiquo Fu and Engelbert Mephu Nguifo*

Using Concept Lattices for Requirements Reconciliation ................................................................. 402  
*Debbie Richards*

**Author Index** .......................................................... 411
Concept Lattices
Eklund, P. (Ed.)
2004, X, 418 p., Softcover
ISBN: 978-3-540-21043-6
