

Table of Contents

Part I Plenary Lectures

Numerical Analysis of Finite Element Methods for Eddy Current Problems. Applications to Electrode Simulation <i>Alfredo Bermúdez, Rodolfo Rodríguez, Pilar Salgado</i>	3
Space Decomposition Preconditioners and Parallel Solvers <i>Radim Blaheta</i>	20
Boundary Conditions for Hyperbolic Equations or Systems <i>Thierry Gallouët</i>	39
Fictitious Domain Methods in Shape Optimization with Applications in Free-Boundary Problems <i>Jaroslav Haslinger, Tomáš Kozubek, Karl Kunisch, Günter Peichl</i>	56

Part II Contributed Papers

Domain Decomposition Method for a Class of Non-Linear Elliptic Equation with Arbitrary Growth Nonlinearity and Data Measure <i>Nour Eddine Alaa, Jean Rodolphe Roche</i>	79
Variants of Relaxation Schemes and the Lattice Boltzmann Model Relaxation Systems <i>Mapundi Kondwani Banda</i>	89
A Time Semi-Implicit Relaxation Scheme for Two-Phase Flows in Pipelines <i>Michaël Baudin, Frédéric Coquel, Quang-Huy Tran</i>	102
Computational Study of Field Scale BTEX Transport and Biodegradation in the Subsurface <i>Markus Bause</i>	112

A Two-Level Stabilization Scheme for the Navier-Stokes Equations <i>Roland Becker, Malte Braack</i>	123
A Posteriori Error Estimates for Parameter Identification <i>Roland Becker, Boris Vexler</i>	131
On a Phase-Field Model with Advection <i>Michal Beneš</i>	141
Fast Evaluation of Eddy Current Integral Operators <i>Steffen Börm</i>	151
Adaptive Computation of Reactive Flows with Local Mesh Refinement and Model Adaptation <i>Malte Braack, Alexandre Ern</i>	159
An Alternative to the Least-Squares Mixed Finite Element Method for Elliptic Problems <i>Jan Brandts, Yanping Chen</i>	169
Limit Analysis Method in Electrostatics <i>Igor A. Brigadnov</i>	176
Finite Element Mesh Adjusted to Singularities Applied to Axisymmetric and Plane Flow <i>Pavel Burda, Jaroslav Novotný, Bedřich Sousedík, Jakub Šístek</i>	186
The Edge Stabilization Method for Finite Elements in CFD <i>Erik Burman, Peter Hansbo</i>	196
Analysis and Computation of Dendritic Growth in Binary Alloys Using a Phase-Field Model <i>Eric Burman, Marco Picasso, Jacques Rappaz</i>	204
Discontinuous Galerkin Methods for Timoshenko Beams <i>Fatila Celiker, Bernardo Cockburn, Sukru Güzey, Ramdev Kanapady, Sew-Chew Soon, Henrik K. Stolarski, Kummar Tamma</i>	221
Numerical Algorithms for Solving Elliptic-Parabolic Problems <i>Raimondas Čiegis</i>	232
Stochastic Relaxation of Variational Integrals with Non-attainable Infima <i>Dennis D. Cox, Petr Klouček, Daniel R. Reynolds, Pavel Šolín</i>	239

A Pressure-Weighted Upwind Scheme in Unstructured Finite-Element Grids <i>Masoud Darbandi, Kiumars Mazaheri-Body, Shidvash Vakilipour</i>	250
Discontinuous Galerkin Finite Element Method for the Numerical Solution of Viscous Compressible Flows <i>Vít Dolejší</i>	260
A Finite Volume Scheme on General Meshes for the Steady Navier-Stokes Equations in Two Space Dimensions <i>Robert Eymard, Raphaél Herbin</i>	269
Existence and Uniqueness of a Weak Solution to a Stratigraphic Model <i>Robert Eymard, Thierry Gallouët, Véronique Gervais, Roland Masson</i> .	278
Combined Nonconforming/Mixed-hybrid Finite Element-Finite Volume Scheme for Degenerate Parabolic Problems <i>Robert Eymard, Danielle Hilhorst, Martin Vohralík</i>	288
Discrete Maximum Principle for Galerkin Finite Element Solutions to Parabolic Problems on Rectangular Meshes <i>István Faragó, Róbert Horváth, Sergey Korotov</i>	298
Cubature-Differences Method for Singular IntegroDifferential Equations <i>Alexander I. Fedotov</i>	308
Nonconforming Discretization Techniques for Overlapping Domain Decompositions <i>Bernd Flemisch, Michael Mair, Barbara Wohlmuth</i>	316
On the Use of Implicit Updates in Minimum Curvature Multi-step Quasi-Newton Methods <i>John A. Ford, Issam A. Moghrabi</i>	326
A Boundary Movement Identification Method for a Parabolic Partial Differential Equation <i>Tom P. Fredman</i>	336
On Computational Properties of a Posteriori Error Estimates Based upon the Method of Duality Error Majorants <i>Maxim Frolov, Pekka Neittaanmäki, Sergey Repin</i>	346
Efficient Algorithm for Local-Bound-Preserving Remapping in ALE Methods <i>Rao Garimella, Milan Kuchařík, Mikhail Shashkov</i>	358

Mimetic Finite Difference Methods for Diffusion Equations on Unstructured Triangular Grid <i>Victor Ganzha, Richard Liska, Mikhail Shashkov, Christoph Zenger ...</i>	368
On Computational Glaciology: FE-Simulation of Ice Sheet Dynamics <i>Günter Gödert, Franz-Theo Suttmeier</i>	378
Nonreflecting Boundary Conditions for Multiple Domain Wave Scattering in Unbounded Media <i>Marcus J. Grote, Christoph Kirsch, Patrick Meury</i>	391
On the Choice of the Regularization Parameter in the Case of the Approximately Given Noise Level of Data <i>Uno Hämarik, Toomas Raus</i>	400
Adaptive Discontinuous Galerkin Finite Element Methods with Interior Penalty for the Compressible Navier–Stokes Equations <i>Ralf Hartmann, Paul Houston</i>	410
On a Novel Technique for Parallel Unstructured Mesh Generation in 3D <i>Jan Haškovec, Pavel Šolín</i>	420
Adaptive Finite Element Methods for Turbulent Flow <i>Johan Hoffman, Claes Johnson</i>	430
Numerical Solution of a Nonlinear Evolution Equation Describing Amorphous Surface Growth of Thin Films <i>Ronald H.W. Hoppe, Eva Nash</i>	440
Constrained Mountain Pass Algorithm for the Numerical Solution of Semilinear Elliptic Problems <i>Jiří Horák</i>	449
Optimal Shape Design of Diesel Intake Ports with Evolutionary Algorithm <i>András Horváth, Zoltán Horváth</i>	459
Numerical Simulation of Compressible Fluids with Moving Boundaries: An Effective Method with Applications <i>Zoltán Horváth, András Horváth</i>	471
Discontinuous Galerkin Methods for the Time-Harmonic Maxwell Equations <i>Paul Houston, Ilaria Perugia, Anna Schneebeli, Dominik Schötzau</i>	483

Mixed hp-Discontinuous Galerkin Finite Element Methods for the Stokes Problem in Polygons <i>Paul Houston, Dominik Schötzau, Thomas P. Wihler</i>	493
A Postprocessing of Hopf Bifurcation Points <i>Dáša Janovská, Vladimír Janovský</i>	502
Givens' Reduction of Quaternion-Valued Matrices to Upper Hessenberg Form <i>Drahoslava Janovská, Gerhard Opfer</i>	510
Model of Compressible Flow and Transport in a Time-Dependent Domain <i>Pavel Jiránek, Jiří Maryška, Jan Šembera</i>	521
Numerical Study of Convection of Multi-Component Fluid in Porous Medium <i>Olga Kantur, Vyacheslav Tsybulin</i>	531
Multi-yield Elastoplastic Continuum-Modeling and Computations <i>Johanna Kienesberger, Jan Valdman</i>	539
Celebrating Fifty Years of David M. Young's Successive Overrelaxation Method <i>David R. Kincaid</i>	549
On the Relational Database Style Parallel Numerical Programming <i>Béla Kiss, Anna Krebsz</i>	559
A Dynamical System Describing Evolution of the Implicit Surfaces in Incompressible Viscous Liquids <i>Petr Klouček, Michel V. Romero, Jennifer L. Wightman</i>	569
Discrete Maximum Principles in Finite Element Modelling <i>Sergey Korotov, Michal Krížek</i>	580
A Posteriori Error Estimation in Terms of Linear Functionals for Boundary Value Problems of Elliptic Type <i>Sergey Korotov, Pekka Neittaanmäki, Sergey Repin</i>	587
Numerical Solution of Flow in Backward Facing Step <i>Karel Kozel, Petr Louda, Petr Sváček</i>	596
Periodicity Properties of Solutions to a Hysteresis Model in Micromagnetics <i>Martin Kružík</i>	605

Mixed Finite Element Method on Polygonal and Polyhedral Meshes <i>Yuri Kuznetsov, Sergey Repin</i>	615
Semi-discrete Schemes for Hamilton-Jacobi Equations on Unstructured Grids <i>Doron Levy, Suhas Nayak</i>	623
Numerical Simulation of Dislocation Dynamics <i>Vojtěch Minářík, Jan Kratochvíl, Karol Mikula, Michal Beneš</i>	631
Implicit FEM-FCT algorithm for compressible flows <i>Matthias Möller, Dmitri Kuzmin, Stefan Turek</i>	641
A Singular Limit Method for the Stefan Problems <i>Hideki Murakawa, Tatsuyuki Nakaki</i>	651
Higher-Order Split-Step Schemes for the Generalized Nonlinear Schrödinger Equation <i>Gulcin M. Mushu, Husnu A. Erbay</i>	658
Numerical Methods and Simulation Techniques for Flow with Shear and Pressure Dependent Viscosity <i>Abderrahim Ouazzi, Stefan Turek</i>	668
Piecewise Polynomial Approximations for Linear Volterra Integro-Differential Equations with Nonsmooth Kernels <i>Arvet Pedas</i>	677
On a Discontinuous Galerkin Method for Radiation-Diffusion Problems <i>Ilaria Perugia, Dominik Schötzau, James Warsa</i>	687
Modeling of Multi-Phase Flows with a Level-Set Method <i>Sander P. van der Pijl, A. Segal, C. Vuik</i>	698
Numerical Modeling of Bypass Flow <i>Vladimír Prokop, Karel Kozel</i>	708
A Posteriori Estimation of Dimension Reduction Errors <i>Sergey Repin, Stefan Sauter, Anton Smolianski</i>	716
Analysis of a Multi-Numerics/Multi-Physics Problem <i>Béatrice Rivière</i>	726
The Discontinuous Galerkin Method for Singularly Perturbed Problems <i>Hans-Görg Roos, Helena Zarin</i>	736

A Finite-Volume Mass- and Vorticity-Conserving Shallow-Water Model using Penta-/Hexagonal Grids <i>William Sawyer, Rolf Jeltsch</i>	746
Application of Parallel Computing Techniques for Problems of Degenerated Diffusion <i>Milan Šenkýř, Jiří Mikyška, Michal Beneš</i>	756
The Finite Element Analysis of an Elliptic Problem with a Nonlinear Newton Boundary Condition <i>Veronika Sobotíková</i>	766
Automatic Goal-Oriented hp-Adaptivity Without Error Estimates <i>Pavel Šolín, Leszek Demkowicz</i>	775
A Compression Method for the Helmholtz Equation <i>Mirjam Stolper, Sergej Rjasanow</i>	786
Application of a Stabilized FEM to Problems of Aeroelasticity <i>Petr Sváček, Miloslav Feistauer</i>	796
A Numerical Approach to the Dynamical Behavior of Initiated Pulses in Some Nonlinear Diffusion Equations <i>Kenji Tomoeda</i>	806
Fully Two-dimensional HLLEC Riemann Solver and Associated Difference Schemes <i>Pavel Váchal, Richard Liska, Burton Wendroff</i>	815
Deflation Accelerated Parallel Preconditioned Conjugate Gradient Method in Finite Element Problems <i>Fred J. Vermolen, Kees Vuik, Guus Segal</i>	825
Advantages of Binomial Checkpointing for Memory-reduced Adjoint Calculations <i>Andrea Walther, Andreas Griewank</i>	834
An Efficient Multigrid FEM Solution Technique for Incompressible Flow with Moving Rigid Bodies <i>Decheng Wan, Stefan Turek, Liudmila S. Rivkind</i>	844
Higher-Order FEM for a System of Nonlinear Parabolic PDE's in 2D with A-Posteriori Error Estimates <i>Martin Zítka, Karel Segeth, Pavel Šolín</i>	854
