Table of Contents

We Are All Blind: Cognetics and the Designing of Interfaces for Accessibility ........................................ 1
   J. Raskin

From the Human Interface to the Humane Interface

The Design Question of Development of Multimedia Educational Software for Aphasia Patients.......................... 6
   C. Sik Lányi, E. Bacsza, R. Mátrai, Z. Kosztyán, and I. Pataky

Multimedia Programs for Children with Hearing Difficulties ............ 14
   C. Sik Lányi, Á. Váry, A. Sik, A. Nemetz, and Z. Geiszt

Multimedia and Virtual Reality in the Rehabilitation of Autistic Children ........................................ 22
   C. Sik Lányi and Á. Tilinger

Mobile Phone Based User Interface Concept for Health Data Acquisition at Home ........................................ 29
   G. Schreier, A. Kollmann, M. Kramer, J. Messmer, A. Hochgatterer, and P. Kastner

Multi-parameter Data Acquisition on Interface Devices for the Development of Adaptive Input Systems ............ 37
   S. Mina, A. Hochgatterer, B. Prazak, S. Hanke, and G. Schreier

Design for All: Awareness, Guidelines and Policy

How Governments Can Use Technology to Promote Employment of People with Disabilities .................. 45
   D.F.B. Cohen and I.R. Zeitzer

Influence of Accessibility Related Activities on the Usability of Business Software .................................. 52
   R. Jani and M. Schrepp

Data Entry in Application-Independent Voice Interfaces ....................... 60
   F. James, J. Roelands, and R. Gurram

Designing User Interfaces Tailored to the Current User’s Requirements in Real Time .......................... 69
   M. González Rodríguez, J.R. Pérez Pérez, and M.P. Paule Ruiz
## Table of Contents

Evaluating Accessibility of Public Information Kiosks.................. 76  
  
  S. Lee and J.E. Cho  
  
**Design for All in IST – Co-operation in Europe**  
  
European Co-operation Activities Promoting Design for All in Information Society Technologies ....................... 80  
  
  C. Bühler and C. Stephanidis  
  
A Special Design Approach for Special People .................. 88  
  
  M. Zajicek  
  
Accessibility from Scratch:  
  How an Open Focus Contributes to Inclusive Design ................. 96  
  
  D. Crombie, R. Lenoir, and N. McKenzie  
  
Design for All: Experience-Based Strategies for User Involvement in IST Research Projects ........................................ 104  
  
  T. Verelst  
  
IDCnet: Inclusive Design Curriculum Network – First Results .......... 110  
  
  C.A. Velasco, J. Engelen, C. Strobbe, J. Darzentas, P. Tahkokallio,  
  C. Nicolle, and R. Romero  
  
**Personalization of Interactive Systems**  
  
Personalization of Interactive Systems .................................. 117  
  
  H. Petrie and G. Weber  
  
Learning from Internet Requirements of People  
  with Communication Needs ................................................ 121  
  
  C. Nicolle, Z. Osman, K. Black, and A. Lysley  
  
IPCA: Adaptive Interfaces Based upon Biofeedback Sensors .............. 129  
  
  C.A. Velasco, Y. Mohamad, D. Stegemann, H. Gappa, G. Nordbrock,  
  E. Hartsuiker, J. Sánchez-Lacuesta, and J.M. Belda  
  
Adaptation of Multimedia Browsing Techniques .......................... 135  
  
  K. Weimann, I. Langer, and G. Weber  
  
Adapting Presentation and Interaction with XML Documents to User Preferences ............................................. 143  
  
  B. Encelle and N. Baptiste-Jessel
# e-Learning and Accessibility

Living, Teaching and Learning at Any Time and at Any Place. 

e-Learning – Opportunities and Barriers for Visually Impaired Students ... 151

*J. Klaus*

Accessibility for e-Learning Environments ............................. 157

*M.L. Guenaga, D. Burger, and J. Oliver*

ECDL-PD: International Co-operation to Keep the Syllabus and MQTB Open for Everybody ................................. 164

*K. Miesenberger, M. Morandell, A. Petz, and D. Leahy*

Essential Competencies of Special Educator in Integrating Assistive Technology into the Curriculum ............... 171

*M.-C. Chen, T.-F. Wu, and C.-N. Chu*

Web Adaptation of Learning Objects for Special Access WALOSA ....... 178

*C. Salis, C. Lai, and C. Moulin*

Postgraduate Course on Accessible Web Design ........................ 183

*D. Ortner, M. Batušić, and K. Miesenberger*

Cognitive Training with Animated Pedagogical Agents (TAPA) in Children with Learning Disabilities .......................... 187

*Y. Mohamad, C.A. Velasco, S. Damm, and H. Tebarth*

A Concept Map-Based Adaptive Tutoring System Supporting Learning Diagnosis for Students with Learning Disability .................. 194

*S.-Y. Choi*

Tutor Informatico: Increasing the Selfteaching in Down Syndrome People. 202

*E. Campos, A. Granados, S. Jiménez, and J. Garrido*

The Effect of Assistive Technology on Educational Costs:
Two Case Studies ............................................................. 206

*A. Gips, P.A. DiMattia, and J. Gips*

# Making Music Accessible

Making Music Accessible, Introduction to the Special Thematic Session ... 214

*D. Crombie, R. Lenoir, N. McKenzie, and B. Challis*

The Design of Spoken Music Web Browser for Teaching Learning-Disabled Children: A Chevé System Approach to Music Notation ................. 218

*C.-N. Chu and Y.T. Huang*
DaCapo, a Project on Transforming Ink Printed
to Braille Notes Semi-automatically. The Project’s Current State........ 224
   T. Kahlisch, M. Leopold, and C. Waldvogel

Using SVG and a Force Feedback Mouse to Enable Blind People
to Access “Graphical” Web Based Documents ......................... 228
   N. Baptiste-Jessel, B. Tornil, and B. Encelle

Modified Stave Notation – An Approach to Making Stave Notation
More Accessible to Users Who Are Partially Sighted............... 236
   S.-A. Zimmermann

Accessible Games and Entertainment

Entertaining Software for Young Persons with Disabilities .......... 240
   M. Tollefsen and M. Lunde

The TiM Project: Overview of Results ............................... 248
   D. Archambault

3D Shooting Games, Multimodal Games, Sound Games
and More Working Examples of the Future of Games for the Blind ..... 257
   E. Velleman, R. van Tol, S. Huiberts, and H. Verwey

Choosing Methods for Prototype Testing of Inclusive Computer Games ... 264
   L. van Leeuwen, A. Power, and P. Ellis

Accessible Tourism

It’s Time to Make eTourism Accessible .............................. 272
   F. Pühretmair

Tourism Information Systems Promoting Barrier-Free Tourism
for People with Disabilities ............................................... 280
   H. Rumetshofer and W. Wöß

AccesSights – A Multimodal Location-Aware Mobile Tourist
Information System ......................................................... 287
   P. Klante, J. Krösche, and S. Boll

Accessibility and the Next Generation
of Web Development Tools

Accessibility and the Next Generation of Web Development Tools .... 295
   C.A. Velasco
Preferences of People with Disabilities to Improve Information Presentation and Information Retrieval
Inside Internet Services – Results of a User Study ................................. 296
   H. Gappa, G. Nordbrock, Y. Mohamad, and C.A. Velasco

Web Accessibility through Adaptation ............................................. 302
   C. Alexandraki, A. Paramythis, N. Maou, and C. Stephanidis

imergo: Supporting Accessibility and Web Standards to Meet the Needs of the Industry via Process-Oriented Software Tools .......................... 310
   Y. Mohamad, D. Stegemann, J. Koch, and C.A. Velasco

Evaluation Methodology and Quality Mark for Web Accessibility ........ 317
   E. Velleman

A Cost-Benefit Approach for Accessible Web Presence ....................... 323
   V. Heerdt and C. Strauss

The Use of Current Content Management Systems for Accessibility ...... 331
   L. Burzagli, M. Billi, F. Gabbanini, P. Graziani, and E. Palchetti

Accessing Documents via Audio: An Extensible Transcoder for HTML to VoiceXML Conversion ...................................................... 339
   N. Annamalai, G. Gupta, and B. Prabhakaran

Listener-Controlled Dynamic Navigation of VoiceXML Documents ...... 347
   H. Reddy, N. Annamalai, and G. Gupta

Toward User-Centered, Scenario-Based Planning and Evaluation Tools .... 355
   P. Bohman and S. Anderson

Discovering Structure of Web Pages for Non-visual Navigation:
Binding Text to Forms ................................................................. 361
   E. Pontelli and R. Reddy

**Elderly and Disabled People: Therapy and Care**

Virtual Reality Based Therapy Application for Developmental Disordered Children ...................................................... 369
   Y. Takahashi, Y. Ito, T. Yamashita, T. Terada, K. Inoue, Y. Ikeda,
   K. Suzuki, H. Lee, and T. Komed

Real-Time Health-Monitoring Network for Disabled and Elderly People ... 377
   Y.B. Kim and J.Y. Kim

A Computer-Based Self-health Monitoring System for the Elderly Living in a Low Income Housing Environment ............................ 385
   J.F. Karshmer and A.I. Karshmer

The Development of Virtual 3D Acoustic Environment for Training ‘Perception of Crossability’

T. Shiose, K. Ito, and K. Mamada

Blind People: Braille Interfaces

Six-In – Braille Input from a QWERTY Keyboard

P. Blenkhorn and G. Evans

A Pair of Wireless Braille-Based Chording Gloves

OBOE: Oboe-Like Braille Interface for Outdoor Environment

T. Amemiya, K. Hirota, and M. Hirose

Java-Powered Braille Slate Talker

A. Arato, Z. Juhasz, P. Blenkhorn, G. Evans, and G. Evreinov

Blind and Visually Impaired People: Access to Documents and Information

Towards an Integrated Publishing Chain for Accessible Multimodal Documents

B. Guillon, J.-L. Monteiro, C. Checoury, D. Archambault, and D. Burger

Presenting UML Software Engineering Diagrams to Blind People

A. King, P. Blenkhorn, D. Crombie, S. Dijkstra, G. Evans, and J. Wood

Linear Searching in a Non-linear Environment: The Information Seeking Behaviour of Visually Impaired People on the World Wide Web

J. Craven

Text Comprehension by Blind People Using Speech Synthesis Systems

L. González García

Access to Information at Your Own Choice by the Aid of Digital Talking Books

T.K. Christensen

Talking Linux for the Blind – A CD Distribution with Speech

D. Butorac

Accessing Web Based Documents through a Tree Structural Interface

E. Walshe and B. McMullin
Multimedia Medicine Consultant for Visually Impaired People ............... 564
   J. Tejedor, D. Bolaños, N. Morales, A. Granados, J. Colás,
   and S. Aguilera

Blind and Visually Impaired People:
Education and Training

Computer for Persons with Visually Impairment:
A Door to Education, Information and Employment ....................... 571
   A.H.M.N. Khan and S.N. Chowdhury

Usability of Educational Software for Visual Impairment:
A Question of Viewpoint ............................................. 575
   S. Dini, L. Ferlino, and C. Martinoli

Use of Bar Code and RFID for the Visually Impaired
in Educational Environment ............................................ 583
   H. Tatsumi, Y. Murai, M. Miyakawa, and S. Tokumasu

Virtual Disability: Simulations
as an Aid to Lecturers’ Understanding of Disability ..................... 589
   S. Ball and J. Rousell

for Persons with Visual and Mobile Impairments in Four Languages ...... 597
   A. Mousadakou, M. Gemou, and E. Bekiaris

Designing New Technology Based Services
to Support Visually Impaired Computer Workers (VICWs) ............... 601
   J.J. Beumer, M. Wiethoff, and J. Attema

Design and Use of Pseudo-electronic Whiteboard
for Low-Vision Education .............................................. 609
   Y. Murai, H. Tatsumi, M. Miyakawa, and S. Tokumasu

Blind People: Access to Mathematics

Mathematics for Blind People ........................................ 613
   A.I. Karshmer

The Architecture of a Comprehensive Equation Browser
for the Print Impaired ................................................ 614
   A.I. Karshmer, C. Bledsoe, and P.B. Stanley

Translating between Formats for Mathematics:
Current Approach and an Agenda for Future Developments ............. 620
   E. Pontelli and B. Palmer
Utilizing Scalable Vector Graphics in the Instruction of Mathematics to the Print Impaired Student ........................................ 626
  P.B. Stanley, C. Bledsoe, and A.I. Karshmer

Cognitive Analysis of Equation Reading: Application to the Development of the Math Genie ...................... 630
  D.J. Gillan, P. Barraza, A.I. Karshmer, and S. Pazuchanics

Automatic Conversions of Mathematical Braille: A Survey of Main Difficulties in Different Languages ........... 638
  V. Moço and D. Archambault

Multi-modal Mathematics: Conveying Math Using Synthetic Speech and Speech Recognition ............. 644
  D. Fitzpatrick and A.I. Karshmer

An Integrated OCR Software for Mathematical Documents and Its Output with Accessibility ..................... 648
  M. Suzuki, T. Kanahori, N. Ohtake, and K. Yamaguchi

Mathematical Working Environment for the Blind Motivation and Basic Ideas ........................................ 656
  B. Stöger, K. Miesenberger, and M. Batušić

Towards a Universal Maths Conversion Library ................................................................. 664
  D. Archambault, D. Fitzpatrick, G. Gupta, A.I. Karshmer, K. Miesenberger, and E. Pontelli

math2braille: Opening Access to Mathematics ......................... 670
  D. Crombie, R. Lenoir, N. McKenzie, and A. Barker

Enhancing the Accessibility of Mathematics for Blind People: The AudioMath Project ...................... 678
  H. Ferreira and D. Freitas

Handwriting Input System of Graphs for Barrier-Free Mathematical Communications ...................... 686
  R. Fukuda, M. Yo, and T. Kawahara

Blind People: Access to Graphics and Haptic Interfaces

Three Dimensionally Perceived Planar Tactile Illusion Device and Method .................................................. 690
  G.R. Gonzales

Touching Geometry for Blind Pupils ................................ 697
  S. Rouzier, B. Hennion, T. Pérez Segovia, and D. Chêne
### Table of Contents

An Indicating, Leading Manipulator as a Good Hand at Teaching Strokes: A Mental-Image-Creation Support System .......................... 705  
  Y. Nomura, H. Kakehashi, T. Sugiuera, H. Matsui, and N. Kato

The Bigger Picture: Automated Production Tools for Tactile Graphics .... 713  
  D. Crombie, R. Lenoir, N. McKenzie, and G. Ioannidis

Two Dimension Interactive Voice Browser for the Visually Impaired ...... 721  
  C.-N. Chu

Exploring Scalable Vector Graphics for Visually Impaired Users......... 725  
  M. Rotard, K. Otte, and T. Ertl

Communication System for the Blind Using Tactile Displays and Ultrasonic Pens – MIMIZU ................................. 731  
  M. Kobayashi and T. Watanabe

Directly Accessible Mainstream Graphical Information .................. 739  
  J.A. Gardner and V. Bulatov

Simple Pattern Creation Using a Pen Input Guide and Sound Localization for the Visually Impaired ........................................ 745  
  M. Sugimoto, K. Itoh, and M. Shimizu

An Approach for Direct Manipulation by Tactile Modality for Blind Computer Users: Principle and Practice of Detecting Information Generated by Touch Action .................. 753  
  M. Shimojo, M. Shinohara, M. Tanii, and Y. Shimizu

## Mobility Impaired People: HCI

Remote Eye Gaze Tracking System as a Computer Interface for Persons with Severe Motor Disability ...................................................... 761  
  M. Adjouadi, A. Sesin, M. Ayala, and M. Cabrerizo

Controlling a PC by Eye Movements: The MEMREC Project ............... 770  
  M. Fejtová, J. Fejt, and L. Lhotská

HeadControl+: A Multi-modal Input Device .................................. 774  
  M. Mühlechner and K. Miesenberger

Accessibility through Standard Low Cost Pointing Devices ............... 782  
  B. Prazak, S. Mina, and G. Kronreif

Optimisation of the Selection Set Features for Scanning Text Input .... 788  
  J. Abascal, L. Gardeazabal, and N. Garay

FastScanner: An Accessibility Tool for Motor Impaired Users ........... 796  
  S. Ntoa, A. Savidis, and C. Stephanidis
A Real-Time Voice Controlled Human Computer Interface to Help Persons with Motor Disability .............................................. 804
  M. Adjouadi, D. Landestoy, M. Ayala, and W. Tischer

First User Test Results with the Predictive Typing System FASTY ........ 813
  C. Beck, G. Seisenbacher, G. Edelmayer, and W.L. Zagler

Mobility Impaired People: Rehabilitation and Health Care

Movement Variability and Speed of Performance
Using a Head-Operated Device and Expanded Membrane Cursor Keys .... 820
  G.J. Capilouto

An Examination about Walking Posture on Gait Training System
for Computer-Aided Rehabilitation ........................................ 827
  H. Ikeuchi, F. Kamifukumoto, S. Arakane, K. Ohnishi, K. Imado,
  H. Miyagawa, and Y. Saito

Optimizing Menu Selection Process for Single-Switch Manipulation ...... 836
  G. Evreinov and R. Raisamo

Designing an Evaluation Method for Computer Accessibility
for People with Severe Disabilities ........................................... 845
  R. Kadouche, B. Abdulrazak, and M. Mokhtari

Computerized Assessment Tool for Mouse Operating Proficiency ........ 849
  M.-C. Chen, L.-F. Meng, C.-F. Hsieh, T.-F. Wu, C.-N. Chu,
  and T.-Y. Li

Applications of Computer Access Approach
to Persons with Quadriplegics ............................................. 857
  A.-M. Chou, T. Yang, C.C. Hui, K.A. Chiao, Y.L. Lin, P.-t. Weng,
  Y.-c. Shih, T.-y. Lu, and N.-h. Yeh

Computer Access for Persons with Spinal Cord Injury ................... 865

An Assessment into Touch Screen Input Devices
for Cervical Spinal Injured Computer Users ................................ 873
  R.C.C. Chen, D.T. Tsai, L.-C. Chang, and N. Higgett

Home-Use Upper Limb Rehabilitation Device
for Cervical Spinal Cord Injured Patients .................................. 880
  K. Ohnishi, E. Goto, F. Sugiki, K. Imado, H. Ikeuchi, N. Kito,
  H. Miyagawa, and Y. Saito
Smart Environments for All

Smart Environments for All ........................................... 889
   G. Nussbaum

The Assistive Home –
More than Just Another Approach to Independent Living? .......... 891
   G. Nussbaum and K. Miesenberger

Technology Usage for Dependant People:
Towards the Right Balance between User Needs and Technology .... 898
   C. Penaud, M. Mokhtari, and B. Abdulrazak

Coupling Context Awareness and Multimodality
in Smart Homes Concept ................................................... 906
   M.A. Feki, S. Renouard, B. Abdulrazak, G. Chollet, and M. Mokhtari

On the Design of Ambient Intelligent Systems
in the Context of Assistive Technologies ............................ 914
   J.L. Sevillano, J. Falcó, J. Abascal, A. Civit-Balcells, G. Jiménez,
   S. Vicente, and R. Casas

PACS: Communication and Environment Control System for Disabled .... 922
   V. Lauruska

Performance Analysis of User Interface for the Disabled
in Real-Time Ubiquitous Information Network .......................... 926
   Y.B. Kim and J.Y. Kim

The HM2PH Project:
A Database to Help Prescription of Assistive Technologies .......... 930
   J. Leloup, P. Gaucher, and S. Pellieux

Networking and Communication in Smart Home
for People with Disabilities .............................................. 937
   M. Ghorbel, M.-T. Segarra, J. Kerdreux, R. Keryell, A. Thepaut,
   and M. Mokhtari

SmartX – Enabling Traditional Environmental Control
to Use Standard HCI ...................................................... 945
   G. Nussbaum and K. Miesenberger

Indoors Pervasive Computing and Outdoors Mobile Computing
for Cognitive Assistance and Telemonitoring ........................ 953
   S. Giroux, H. Pigot, and A. Mayers
People with Cognitive, Speech and Learning Impairment: Autism

Computer Use for People with Learning Difficulties: Basic Needs 961
   P. Tréhin

Using ‘Ambient Intelligence’ for Compensating Intellectual Difficulties
of People with Severe Learning Difficulties and/or Autistic Spectrum Disorders 969
   G. Herrera, A. Plasencia, G. Labajo, R. Jordan, and C. de Pablo

Assessing B.A.Bar Device as a Tool
for Supporting Labour Integration of a Severely Affected Person
with Autism Who Carries Out Classifying Tasks 976
   G. Herrera and G. Labajo

People with Cognitive, Speech and Learning Impairment: Software Accessibility

An Adaptive and Predictive Environment
to Support Augmentative and Alternative Communication 983
   N. Gatti, M. Matteucci, and L. Sbattella

Intelligent Model for Rating Cognitive Capability for Computer Access
of People with Disabilities 991
   T.A. Pushchak and S. Sasi

Automatic Modification of Text for People with Learning Disabilities
Using Internet Services 995
   G. Nordbrock, H. Gappa, Y. Mohamad, and C.A. Velasco

Soft Keyboard for the Disabled 999
   P. Gnanayutham, C. Bloor, and G. Cockton

A Talking Word Processor and Web Browser 1003
   G. Evans, M. Kritikos, A. King, and P. Blenkhorn

Sibyl: AAC System Using NLP Techniques 1009
   I. Schadle

People with Cognitive, Speech and Learning Impairment: Education and Training

Mobile Devices Converted into a Speaking Communication Aid 1016
   B. Tóth, G. Németh, and G. Kiss
XXII Table of Contents

SOCRATES: Barrier Free Communities of Aphasics on the Internet .... 1024
M. Spaniol, L. Springer, R. Klamma, and M. Jarke

Evaluations of an Information and Communication Technology (ICT) Training Programme for Persons with Intellectual Disabilities .......... 1032
C.W.P. Li-Tsang, C.C.H. Chan, C.S. Lam, C. Hui-Chan, and S.-s. Yeung

Effect of Dynamic Features on Diagnostic Testing for Dyspraxia .... 1039
M.A. Razian, M.C. Fairhurst, and S. Hoque

Feature Selection Optimisation in an Automated Diagnostic Cancellation Task .................. 1047
S. Chindaro, R.M. Guest, M.C. Fairhurst, M.A. Razian, and J.M. Potter

Minus-Two: Multimedia, Sound Spatialization and 3D Representation for Cognitively Impaired Children ................................. 1054
T. Barbieri, A. Bianchi, and L. Sbattella

Neuropsychological Function for Accessibility of Computer Program for People with Mental Retardation ................................. 1062
A.W.W. Wong, C.C.H. Chan, C.W.P. Li-Tsang, and C.S. Lam

Deaf People: Sign Language and Digital Media

Accessible Digital Media and Sign Language .......................... 1069
D. Fels

Integration of Signage Information into the Web Environment .... 1071
R. Aouf and S. Hansen

Progress in Automated Computer Recognition of Sign Language .... 1079
B.L. Loeding, S. Sarkar, A. Parashar, and A.I. Karshmer

Creating Sign Language Web Pages .................................... 1088
D.G. Lee, J. Richards, J. Hardman, S. Soudain, and D. Fels

Sign Language Communication Support at the Class for Hearing Impaired Using a Control Camera ............................................. 1096
H. Minagawa

CD-ROM on Austrian Sign Language: Course OEGS 1, Lesson 1–6 ...... 1099
M. Hilzensauer

Developing an e-Learning Platform for the Greek Sign Language .... 1107
E. Efthimiou, G. Sapountzaki, K. Karpouzis, and S.-E. Fotinea
## Table of Contents

**Design of Computer Animation of Japanese Sign Language for Hearing-Impaired People in Stomach X-Ray Inspection** .......................... 1114  
*K. Morimoto, T. Kurokawa, N. Isobe, and J. Miyashita*

**Basic Study of a Communication Device for the Deaf-Blind Using a Finger and a Palm – Measurement of Finger Speed and Pressure** .......................... 1121  
*C. Wada and Y. Wada*

**A Tactile Display System in the Use of a PC for Individuals Who Are Deaf-Blind** .......................... 1129  
*M. Sakajiri, S. Okada, K. Ito, A. Sadakane, N. Sugiyama, H. Tomita, and T. Ifukube*

### Deaf and Hearing Impaired People: ICT and AT

**Approaches to Using a Wireless Mobile Terminal to Help Severely Hearing Impaired People** .......................... 1137  
*S. Moh*

**A Preparatory Study for Designing Web-Based Educational Materials for the Hearing-Impaired** .......................... 1144  
*M. Namatame, M. Kitajima, T. Nishioka, and F. Fukamauchi*

**FLIPPS: Fingertip Stimulation for Improved Speechreading** .......................... 1152  
*H.-H. Bothe, A.F. Mohamad, and M.R. Jensen*

**A New Mobile Text Telephony System Based on GPRS Communications** .......................... 1160  
*S. Aguilera, S. Jiménez, D. Bolaños, M.-S. Torre, and J. Colás*

**Head Mounted Display as a Information Guarantee Device for Hearing Impaired Students** .......................... 1167  
*T. Nishioka*

**Facial and Head Movements of a Sign Interpreter and Their Application to Japanese Sign Animation** .......................... 1172  
*S. Kawano and T. Kurokawa*

**SYNFACE – A Talking Head Telephone for the Hearing-Impaired** .......................... 1178  
*J. Beskow, I. Karlsson, J. Kewley, and G. Salvi*

**Author Index** .......................... 1187
Computers Helping People with Special Needs
Klaus, J.; Miesenberger, K.; Burger, D.; Zagler, W. (Eds.)
2004, XLVI, 1195 p., Softcover
ISBN: 978-3-540-22334-4
