Preface

With its fourth edition, the ANTS series of workshops\(^1\) has changed its name. The original “ANTS – From Ant Colonies to Artificial Ants: International Workshop on Ant Algorithms” has become “ANTS – International Workshop on Ant Colony Optimization and Swarm Intelligence”. This change is mainly due to the following reasons.

First, the term “ant algorithms” was slower in spreading in the research community than the term “swarm intelligence”, while at the same time research in so-called swarm robotics was the subject of increasing activity: it was therefore an obvious choice to substitute the term ant algorithms with the more accepted and used term swarm intelligence.

Second, although swarm intelligence research has undoubtedly produced a number of interesting and promising research directions\(^2\), we think it is fair to say that its most successful strand is the one known as “ant colony optimization”. Ant colony optimization, first introduced in the early 1990s as a novel tool for the approximate solution of discrete optimization problems, has recently seen an explosion in the number of its applications, both to academic and real-world problems, and is currently being extended to the realm of continuous optimization (a few papers on this subject being published in these proceedings). It is therefore a reasonable choice to have the term ant colony optimization as part of the workshop name.

As mentioned above, this is the fourth edition of the ANTS workshops. The series started in 1998 with the organization of ANTS’98. On that occasion more than 50 researchers from around the world joined for the first time in Brussels, Belgium to discuss swarm intelligence related research, and a selection of the best papers presented at the workshop was published as a special issue of the Future Generation Computer Systems journal (Vol. 16, No. 8, 2000). Two years later the experience was repeated with the organization of ANTS 2000, which attracted more than 70 participants. The 41 extended abstracts presented as talks or posters at the workshop were collected in a booklet distributed to participants, and a selection of the best papers was published as a special section of the IEEE Transactions on Evolutionary Computation (Vol. 6, No. 4, 2002). After these first two successful editions, it was decided to make of ANTS a series of biannual events. Accordingly, the third edition was organized in September 2002, in Brussels, Belgium. The success of the workshop and the quality of the papers presented in the second edition had also made it clear that it was the right time to have an official workshop proceedings: the ANTS 2002 proceedings was

\(^1\)http://iridia.ulb.ac.be/~ants/

\(^2\)Think, for example, in addition to the already mentioned swarm robotics, of algorithms for clustering and data mining inspired by the ants’ cemetery building behavior, of dynamic task allocation algorithms inspired by the behavior of wasp colonies, of particle swarm optimization, and so on.
published by Springer as Volume 2463 of LNCS, and contained 36 contributions: 17 full papers, 11 short papers, and 8 extended abstracts, selected out of a total of 52 submissions.

The *Ant Colony Optimization and Swarm Intelligence* field is still growing, as testified, for example, by the success of the 1st IEEE Swarm Intelligence Symposium, held in 2003 in Indianapolis, Indiana, US; or by the steady increase we are observing in the number of submissions to ANTS workshops, which resulted in the 79 papers submitted to ANTS 2004. This relatively high number of submissions allowed us to set the acceptance threshold for full and short papers at approximately 50%, which guaranteed a fairly high quality of the proceedings, and, at the same time, a reasonably dense workshop program\(^3\). We are sure that the readers of these proceedings will enjoy the quality of the papers collected in this volume, quality that somehow reflects the growing maturity of the *swarm intelligence* field.

We wish to conclude by saying that we are very grateful to the authors who submitted their works; to the members of the international program committee and to the additional referees for their detailed reviews; to the IRIDIA people for their enthusiasm in helping with organization matters; to the Université Libre de Bruxelles for providing rooms and logistic support; and, more generally, to all those contributing to the organization of the workshop. Finally, we would like to thank our sponsors, the company *AntOptima*\(^4\) and the *Metaheuristics Network*\(^5\), who financially supported the workshop.

June 2004

Marco Dorigo
Mauro Birattari
Christian Blum
Luca M. Gambardella
Francesco Mondada
Thomas Stützle

---

\(^3\) In addition to the accepted papers, a small number of posters were selected for presentation: these are works that, although in a rather preliminary phase, show high potential and are therefore worth discussing at the workshop.

ANTS 2004 was organized by IRIDIA, Université Libre de Bruxelles, Belgium.

Workshop Chair

Marco Dorigo  IRIDIA, ULB, Brussels, Belgium

Technical Program Chairs

Luca M. Gambardella  IDSIA, USI-SUPSI, Manno-Lugano, Switzerland
Francesco Mondada  ASL, EPFL, Lausanne, Switzerland
Thomas Stützle  Intellektik, TUD, Darmstadt, Germany

Publication Chairs

Mauro Birattari  IRIDIA, ULB, Brussels, Belgium
Christian Blum  IRIDIA, ULB, Brussels, Belgium

Program Committee

Tucker Balch  Georgia Tech, Atlanta, GA, USA
Christian Blum  IRIDIA, ULB, Brussels, Belgium
Eric Bonabeau  Icosystem, Boston, MA, USA
Oscar Cordón  Universidad de Granada, Spain
David Corne  University of Reading, UK
Jean-Louis Deneubourg  CENOLI, ULB, Brussels, Belgium
Gianni di Caro  IDSIA, Manno-Lugano, Switzerland
Dario Floreano  ASL, EPFL, Lausanne, Switzerland
Michel Gendreau  Université de Montréal, Canada
Deborah Gordon  Stanford University, CA, USA
Walter Gutjahr  Universität Wien, Austria
Richard Hartl  Universität Wien, Austria
Owen Holland  University of Essex, Colchester, UK
Holger Hoos  University of British Columbia, Vancouver, Canada
Paul B. Kantor  Rutgers University, New Brunswick, NJ, USA
Joshua Knowles  MIB, UMIST, Manchester, UK
Sven Koenig  Georgia Tech, Atlanta, GA, USA
Vittorio Maniezzo
Università di Bologna, Italy

Alcherio Martinoli
EPFL, Lausanne, Switzerland

Chris Melluish
University of the West of England, Bristol, UK

Ronaldo Menezes
Florida Tech, Melbourne, FL, USA

Daniel Merkle
Universität Karlsruhe, Germany

Peter Merz
Universität Tübingen, Germany

Martin Middendorf
Universität Leipzig, Germany

Stefano Nolfi
CNR, Rome, Italy

Ben Paechter
Napier University, Edinburgh, UK

Van Parunak
Altarum Institute, Ann Arbor, MI, USA

Andrea Roli
Università degli Studi G. D’Annunzio, Chieti, Italy

Erol Şahin
Middle East Technical University, Ankara, Turkey

Michael Sampels
IRIDIA, ULB, Brussels, Belgium

Guy Theraulaz
Université Paul Sabatier, Toulouse, France

Franco Zambonelli
Università di Modena, Italy

Mark Zlochin
Weizmann Institute, Rehovot, Israel

Publicity Chair
Andrea Roli
Università degli Studi G. D’Annunzio, Chieti, Italy

Local Arrangements
Max Manfrin
IRIDIA, ULB, Brussels, Belgium

Carlotta Piscopo
IRIDIA, ULB, Brussels, Belgium

Additional Referees
Ashraf Abdelbar
Julia Handl
Rubén Ruiz García
Christian Almeder
Stephane Magnenat
Jürgen Schmidhuber
Erkin Bahceci
Marco Manei
Alena Shmygelska
