Preface

On behalf of the AH 2004 Program Committee, we were pleased to welcome attendees to Eindhoven for the 3rd International Conference on Adaptive Hypermedia and Adaptive Web-Based Systems.

Similar to previous years, the number of research groups involved in research and innovative applications of personalization and adaptation functionalities has continued to grow, resulting in a further increase of 33% in the number of papers submitted to the conference, compared to the previous conference. From the 138 submissions we received, the program committee, in a rigorous review process, accepted 27 submissions (i.e., 20%) as full papers and 18 (i.e., 13%) as short papers. The large number of papers submitted generated a tremendous amount of work for the program committee members and the external reviewers, and we are immensely grateful for the effort they put into the process of selecting the very best papers.

Together with three invited talks (by Emile Aarts, Philips Research, Candy Sidner, Mitsubishi Research, and Eric Horvitz, Microsoft Research), the AH 2004 papers provide an excellent view on the successful approaches for innovative personalization and adaptation functionalities in a variety of areas, including eLearning, eCommerce, mobile tourist guides and many more. They also show the integration of personalization functionalities being employed in Web environments, in ambient intelligence and intelligent agent contexts, and building upon adaptive hypermedia and Semantic Web technologies, Web search, Web services, social and peer-to-peer networks, and recommender systems, among others.

In addition, we were able to include four doctoral consortium papers in the proceedings, accompanying two doctoral consortium sessions at the conference, where young Ph.D. students presented promising initial work and got additional feedback on their presentations and ideas for their future research careers. Seventeen additional projects were presented during the AH 2004 poster reception, providing insights into new projects, many of which we expect to yield interesting results in several new innovative application areas in the future.

Many people contributed to the success of the program. First and foremost, we would like to thank all the authors for providing such an excellent set of papers for AH 2004, and the AH 2004 program committee members and external reviewers for their dedication in the review process. The three main professional organizations most related to the field of adaptive hypermedia all endorsed the AH 2004 conference: the International World-Wide Web Conference Committee (IW3C2), the Association for Computing Machinery (ACM), and in particular SIGART, SIGCHI, SIGecom, SIGIR and SIGWEB, and User Modeling, Inc. AH 2004 was actively sponsored by the Eindhoven University of Technology, the School for Information and Knowledge Systems, and the PROLEARN Network of Excellence in Professional Learning.

Last, but not least, the AH 2004 conference was run by a team of enthusiastic organizers, from the Eindhoven University of Technology and the University of Hannover. We wish to mention Ad Aerts, Lora Aroyo, Alexandra Cristea, Nicola Henze, Geert-Jan
Houben, Pim Lemmens and Reinier Post who dealt with submissions, workshops, tutorials, the industrial track, proceedings, registrations, the website and all local arrangements. A special word of thanks goes to Riet van Buul who did all the local coordination and administration.

August 2004

Wolfgang Nejdl
Paul De Bra
AH 2004 was organized by the Eindhoven University of Technology, Eindhoven, The Netherlands.

**General Chair**

Paul De Bra (Eindhoven University of Technology)

**Program Chair**

Wolfgang Nejdl (University of Hannover and L3S)

**Doctoral Consortium Chairs**

José-Luís Pérez de la Cruz (Universidad de Málaga, Spain)
Peter Brusilovsky (University of Pittsburgh, USA)

**Workshops/Tutorials Chairs**

Lora Aroyo (Eindhoven University of Technology, The Netherlands)
Carlo Tasso (University of Udine, Italy)

**Industry Chairs**

Mehmet Göker (Kaidara Software, USA)
Geert-Jan Houben (Eindhoven University of Technology, The Netherlands)

**Program Committee**

Elisabeth André, DFKI GmbH, Germany
Liliana Ardissono, Università degli Studi di Torino, Italy
Helen Ashman, University of Nottingham, UK
Peter Brusilovsky, University of Pittsburgh, USA
Ricardo Conejo, University of Malagà, Spain
Alexandra Cristea, Eindhoven University of Technology, The Netherlands
Serge Garlatti, ENST Bretagne, France
Franca Garzotto, Politecnico di Milano, Italy
Wendy Hall, University of Southampton, UK
Lynda Hardman, CWI, Amsterdam, The Netherlands
Nicola Henze, University of Hannover, Germany
Charalampos Karagiannidis, Informatics and Telematics Institute, Greece
Judy Kay, University of Sydney, Australia
Alfred Kobsa, University of California at Irvine, USA
Rob Koper, Open Universiteit Nederland, The Netherlands
Henry Lieberman, MIT Media Lab, USA
Paul Maglio, IBM Almaden Research Center, USA
Mark Maybury, The MITRE Corporation, USA
Maria Milosavljevich, Microsoft Research Inst. and Macquarie Univ., Australia
Tanja Mitrovic, University of Canterbury, New Zealand
Dunja Mladenic, J. Stefan Institute, Slovenia
Michael Pazzani, University of California at Irvine, USA
Fiorella de Rosis, University of Bari, Italy
Vittorio Scarano, Università degli Studi di Salerno, Italy
Daniel Schwabe, Catholic University of Rio de Janeiro, Brazil
Frank Shipman, Texas A&M University, USA
Alan Smeaton, Dublin City University, Ireland
Barry Smyth, University College Dublin, Ireland
Marcus Specht, Fraunhofer Institute, Germany
Rudi Studer, University of Karlsruhe, Germany
Julita Vassileva, University of Saskatchewan, Canada
Gerhard Weber, Pedagogical University Freiburg, Germany
Theo van der Weide, University of Nijmegen, The Netherlands
Massimo Zancanaro, ITC-IRST, Trento, Italy
