# Table of Contents

## Invited Talks

Automated Reasoning Tools for Molecular Biology ....................... 1  
*François Fages*

ΩMEGA: Computer Supported Mathematics ............................... 3  
*Jörg Siekmann and Christoph Benzmüller*

An Overview of Planning Technology in Robotics ....................... 29  
*Malik Ghallab*

SmartWeb: Mobile Applications of the Semantic Web .................. 50  
*Wolfgang Wahlster*

Machine Learning for Autonomous Robots ............................... 52  
*Martin Riedmiller*

## Natural Language Processing

Generation of Sentence Parse Trees Using Parts of Speech ............ 56  
*Tunga Gungör*

Application of Machine Learning Techniques to the Re-ranking of Search Results ........................................ 67  
*Martin Buchholz, Dirk Pfüger, and Josiah Poon*

A Pragmatics-First Approach to the Analysis and Generation of Dialogues ................................................ 82  
*Bernd Ludwig*

Hybrid Natural Language Generation in a Spoken Language Dialog System .......................................................... 97  
*Martin Klarnner and Bernd Ludwig*

Error-Tolerant Finite-State Lookup for Trademark Search ............. 112  
*Andreas Eisele and Tim vor der Brück*

## Knowledge Representation and Ontologies

Mining Hierarchical Temporal Patterns in Multivariate Time Series .... 127  
*Fabian Mörchen and Alfred Ultsch*
Using Behavioral Knowledge for Situated Prediction of Movements 141
  Michael Arens, Artur Ottlik, and Hans-Hellmut Nagel

Integration of Manual and Automatic Text Categorization.
A Categorization Workbench for Text-Based Email and Spam 156
  Qin Sun, Christoph Schommer, and Alexander Lang

Model Based Deduction for Database Schema Reasoning 168
  Peter Baumgartner, Ulrich Furbach, Margret Gross-Hardt,
  and Thomas Kleemann

Planning and Search

Applying Automatic Planning Systems
to Airport Ground-Traffic Control – A Feasibility Study 183
  Sebastian Trüg, Jörg Hoffmann, and Bernhard Nebel

Generalizing the Relaxed Planning Heuristic to Non-linear Tasks 198
  Stefan Edelkamp

Decision-Theoretic Planning for Playing Table Soccer 213
  Moritz Tacke, Thilo Weigel, and Bernhard Nebel

External A* 226
  Stefan Edelkamp, Shahid Jabbar, and Stefan Schrödl

Neural Networks and Machine Learning

Combining Recurrent Neural Networks and Support Vector Machines
for Structural Pattern Recognition 241
  Brijnesh J. Jain, Peter Geibel, and Fritz Wysotzki

Genre Classification of Web Pages 256
  Sven Meyer zu Eissen and Benno Stein

Integration of Statistical and Neural Methods to Design Classifiers
in Case of Unequal Covariance Matrices 270
  Šarūnas Raudys

Semiring Artificial Neural Networks and Weighted Automata.
And an Application to Digital Image Encoding 281
  Sebastian Bader, Steffen Hölldobler, and Alexandre Scalzitti

A New Method to Fit a Linear Regression Model
for Interval-Valued Data 295
  Francisco de A.T. de Carvalho, Eufrasio de A. Lima Neto,
  and Camilo P. Tenorio
# Reasoning

Specifying Abnormal Action Qualifications with Sensing in FLUX .......... 307
  *Yves Martin*

On-Line Decision-Theoretic Golog for Unpredictable Domains .......... 322
  *Alexander Ferrein, Christian Fritz, and Gerhard Lakemeyer*

Relation Variables in Qualitative Spatial Reasoning ................ 337
  *Sebastian Brand*

Default Reasoning over Domains and Concept Hierarchies ............ 351
  *Pascal Hitzler*

Improving Fault Localization of Programs
by Using Labeled Dependencies ........................................... 366
  *Rong Chen, Daniel Köb, and Franz Wotawa*

Improving the Scalability of Rule Base Verification
Using Binary Decision Diagrams: An Empirical Study ................ 381
  *Christophe Mues and Jan Vanthienen*

Modeling of Tutoring Processes in Intelligent Tutoring Systems .... 396
  *Alke Martens and Adelinde M. Uhrmacher*

# Robotics and Machine Perception

A New Method for Asynchronous Multisensor Information Fusion ........ 410
  *Kejun Zhang and Jianbo Su*

Adaptive Vision for Playing Table Soccer ................................ 424
  *Thilo Weigel, Dapeng Zhang, Klaus Rechert, and Bernhard Nebel*

Shape-Based Robot Mapping ............................................... 439
  *Diedrich Wolter, Longin J. Latecki, Rolf Lakämper, and Xinyui Sun*

Vision-Based Facial and Eye Gaze Tracking System .................... 453
  *Kang Ryoung Park*

**Author Index** ................................................................. 467
KI 2004: Advances in Artificial Intelligence
Biundo, S.; Frühwirth, T.; Palm, G. (Eds.)
2004, XII, 472 p., Softcover
ISBN: 978-3-540-23166-0
