### Introduction

Andrology: Definition, Clinical Issues and Prevalence

W.-B. Schill, F. Comhaire, T.B. Hargreave | 1

References | 3

### Layout and How to Use the Book

F. Comhaire | 4

### General Considerations

Evidence-Based Medicine in Reproductive Medicine and Andrology

F. Comhaire, A. Mahmoud | 5

References | 6

Economic Cost and Cost-Effectiveness

F. Comhaire, A. Mahmoud | 7

References | 9

Ethics of Reproductive Research and Treatment

T.B. Hargreave | 9

Introduction | 9

Basic Principles Underlying Ethical Considerations | 10

Consent | 10

Applying the Principles to Reproductive Medicine | 11

Conclusion | 13

References | 13

Human Tissue for Research

T.B. Hargreave | 14

### Diagnosing and Solving Clinical Problems

I. Problem: Gender Dysphoria and Disorders of Sexual Differentiation

I.1 Gender Dysphoria

G.G.R. T’Sjoen | 19

I.1.1 Definition | 19

I.1.2 Aetiology and Pathogenesis | 19

I.1.3 Clinical Findings | 19

I.1.4 Treatment | 20

I.1.5 Prognosis | 22

References | 22

I.1.6 Disorders of Sexual Differentiation

G.G.R. T’Sjoen | 23

I.1.2.1 Definition | 23

I.1.2.2 Aetiology and Pathogenesis | 23

I.1.2.3 Classification of Intersex | 23

I.1.2.4 Clinical Findings | 24

I.1.2.5 Management | 24

I.1.2.6 Prevention | 25

References | 25

I.2 Problem: Abnormal Pubertal Development

S.A. Wudy | 27

I.2.1 Physiology | 27

I.2.2 Precocious Puberty | 27

I.2.3 Delayed Puberty | 28

References | 28

I.3 Male Factor Fertility Problems

I.3.1 Consensus-Based Approach to Standardized Diagnosis and Management of the Infertile Male

F. Comhaire, A. Mahmoud | 29

References | 30

I.3.2 WHO Recommended Diagnostic Flow Chart

F. Comhaire, A. Mahmoud | 31

I.3.3 Implications of Multifactorial Aetiology in the Diagnosis and Management of Male Infertility

F. Comhaire, A. Mahmoud | 33

References | 35

I.3.4 Sexual Dysfunction and Male Fertility

T.B. Hargreave | 35

I.3.4.1 Definition of the Disease | 35

I.3.4.2 Aetiology and Pathogenesis | 35

I.3.4.3 Clinical Findings: History, Physical Examination, Technical Investigations, Laboratory Findings | 36
## Contents

### I.5.2 Vasectomy Reversal
- A. Belker .................................. 119
  - Indications ................................ 119
  - Contraindications ....................... 119
  - Vasectomy Reversal Techniques ........ 119
  - Postoperative Care ....................... 120
  - Complications ............................ 120
  - Results .................................. 120
  - Conclusions ................................ 120
  - References ................................ 121

### I.5.3 Male Contraception
- D. Handelsman, G. Waites ................. 121
  - Introduction ................................ 121
  - Hormonal Methods ......................... 121
  - Nonhormonal Methods ..................... 121
  - Vaccines .................................. 121
  - Conclusions ................................ 122
  - References ................................ 122

### I.5.4 Traditional Methods
- D. Handelsman, G. Waites ................. 122
  - Introduction ................................ 122
  - Conclusions ................................ 124
  - References ................................ 124

### I.6 Problem: Reproductive Tract Infections

#### I.6.1 Reproductive Tract Infections/Sexually Transmitted Diseases
- E.R. Ochsendorf ............................ 125
  - Definition of the Disease ............... 125
  - Aetiology and Pathogenesis ............. 125
  - Clinical Findings: History, Physical Examination, Technical Investigations, Laboratory Findings ........... 126
  - Differential Diagnosis .................... 129
  - Treatment ................................ 129
  - Results of Treatment ..................... 129
  - Prognosis ................................ 129
  - Prevention ................................ 129
  - Other ................................... 129
  - References ................................ 130

#### I.6.2 HIV Infection
- E.R. Ochsendorf ............................ 131
  - Definition of the Disease ............... 131
  - Aetiology and Pathogenesis ............. 131
  - Clinical Findings: History, Physical Examination, Technical Investigations, Laboratory Findings ........... 131
  - Treatment ................................ 131
  - Results of Treatment ..................... 132
  - Prognosis ................................ 132
  - Prevention ................................ 132
  - Other ................................... 132
  - References ................................ 132

### I.7 Problem: Emergencies in Andrology

#### I.7.1 Testicular Torsion
- C.F. Heyns, A.J. Visser ..................... 134
  - Definition ................................ 134
  - Aetiology and Pathogenesis ............. 136
  - Clinical Findings ......................... 138
  - Differential Diagnosis .................... 145
  - Treatment ................................ 146
  - Results of Treatment ..................... 150
  - Prognosis ................................ 151
  - Prevention ................................ 155
  - Conclusions ................................ 156
  - References ................................ 156

#### I.7.2 Blunt Testicular Trauma
- J. Vale ................................ 162
  - Definition ................................ 162
  - Aetiology and Pathogenesis ............. 162
  - Diagnosis ................................ 162
  - Treatment – Conservative Versus Surgical .......... 163
  - Postoperative Follow-up .................. 163
  - References ................................ 163

#### I.7.3 Penile Fractures
- W.D. Aiken ................................. 164
  - Definition of the Disease ............... 164
  - Aetiology and Pathogenesis ............. 164
  - Clinical Findings ......................... 164
  - Physical Examination ..................... 165
  - Investigations ............................ 165
  - Differential Diagnosis .................... 165
  - Treatment ................................ 165
  - Results of Treatment ..................... 166
  - Prognosis ................................ 166
  - Prevention ................................ 166
  - References ................................ 166

#### I.7.4 Priapism
- P. Kumar, D.J. Ralph ....................... 166
  - Definition ................................ 166
  - Aetiology and Pathogenesis ............. 166
  - Clinical Findings, Technical Investigations and Laboratory Findings ................... 167
  - Treatment ................................ 168
  - Conclusion ................................ 169
  - References ................................ 169

#### I.7.5 Testicular Pain and Related Pain Syndromes
- T.B. Hargreave, L. Turner-Stokes ....... 170
  - Definition of the Disease ............... 170
  - Aetiology and Pathogenesis ............. 170
  - Clinical Findings: History, Physical Examination, Technical Investigations, Laboratory Findings ................... 173
  - Differential Diagnosis .................... 174
  - Treatment ................................ 174

### References

- T.B. Hargreave, L. Turner-Stokes ....... 170
- P. Kumar, D.J. Ralph ....................... 166

II Rationale
II.1 Understanding Normal Anatomy and Function
II.1.1 Anatomy and Histology of the Male Genital Tract
A. Meinhardt 259
II.1.1.1 Testis and Scrotum 259
II.1.1.2 Epididymis 260
II.1.1.3 Spermatic Cord and Ductus Deferens 261
II.1.1.4 Prostate 262
II.1.1.5 Seminal Vesicle, Bulbourethral Gland 263
II.1.1.6 Penis and Urethra 263
Suggested Reading 266
II.1.2 Sexual Differentiation and Development
Y.L. Giwercman, A. Nordenskjöld 266
II.1.2.1 Introduction 266
II.1.2.2 Genes Involved in Male Sex Differentiation 268
II.1.2.3 Diagnosis of Sexual Ambiguity 271
References 271
II.1.3 Physiology of Spermatogenesis
M. Bergmann 272
II.1.3.1 Spermatogenesis 272
II.1.3.2 Seminiferous Tubules 272
II.1.3.3 Spermatogonia 274
II.1.3.4 Spermatocytes/Meliosis 274
II.1.3.5 Spermatids/Spermiogenesis 274
II.1.3.6 Spermatoozon 276
II.1.3.7 Sertoli Cell 276
II.1.3.8 Apoptosis and Spermatogenesis 278
II.1.3.9 Kinetics of Spermatogenesis 278
II.1.3.10 Pathophysiology of Spermatogenesis and Infertility 279
References 280
II.1.4 Physiology of Sexual Function
O. Baldo, I. Eardley 281
II.1.4.1 Penile Erection 282
II.1.4.2 Ejaculation and Orgasm 285
References 288
II.1.5 Endocrine Regulation
F. Comhaire, A. Mahmoud 288
II.1.5.1 Hypothalamo–Pituitary–Testicular Axis 288
References 290
II.1.6 Immunology of the Testis and Excurrent Ducts
H.-C. Schuppe, A. Meinhardt 292
II.1.6.1 Immune Privilege of the Testis 292
II.1.6.2 Immune Cells in the Testis 292
II.1.6.3 Blood–Testis Barrier 293
II.1.6.4 Mechanisms of Immune Tolerance in the Testis 294
II.1.6.5 Local Factors of Testicular Immunoregulation – The Dual Role of Cytokines 294
II.1.6.6 Inflammation of the Testis 296
II.1.6.7 Immunobiology and Pathology of the Excurrent Ducts 297

### Male Contributions to the Biology of Conception and Fertilization

**H.J. Tournaye** ........................................... 300

#### II.1.7.1 The Foreplay ................................. 300

#### II.1.7.2 Paternal Contributions to Conception ....... 301

#### II.1.7.3 Other Spermatozoal Attributes ............... 303

### Endocrine Disorders and the Role of Hormone Disrupters

**A. Mahmoud, Frank Comhaire** .................. 311

#### II.2.2.2 Endocrine Disorders .......................... 313

#### II.2.2.1 Introduction .................................. 313

#### II.2.2.3 Primary Disorders of Gonadal Development ................................. 315

#### II.2.2.4 Disorders of the Hypothalamic – Pituitary – Gonadal Axis ...................... 311

#### II.2.2.5 Hypospadias and Undescended Testes . . . . 311

### Infection/Inflammation of the Male Genital Tract as Cause of Abnormal Spermatozoa

**C. Deputdt, A. Mahmoud, K. Everaert** ........... 322

#### II.2.3.1 Introduction .................................. 322

#### II.2.3.2 Causal Factors and Cytokines ................. 323

#### II.2.3.3 White Blood Cells and Reactive Oxygen Species ........................................... 325

#### II.2.3.4 Obstruction of Sperm Transport and Anti-sperm Antibodies ......................... 325

### Urethritis, Sexually Transmitted Diseases (STD), Acquired Immunodeficiency Syndrome (AIDS)

**F.R. Ochsendorf** ........................................... 327

#### II.2.4.1 Introduction .................................. 327

#### II.2.4.2 Urethritis ..................................... 328

#### II.2.4.3 STD ............................................ 331

#### II.2.4.4 HIV ............................................. 331

### Disorders of Blood Flow: Arterial and Venous/Sexual Dysfunction and Varicocele

**G.M. Colpi, M. Mancini, G. Pediferro, F.I. Scroppo** .................. 338

#### II.2.5.1 Erectile Dysfunction and Vascular Disease ................................................. 339

#### II.2.5.2 Varicocele ..................................... 340

#### II.2.5.3 Testicular Torsion ........................... 342

#### II.2.5.4 Undescended Testis .......................... 343

### Effects of Lifestyle and Toxins

**J. P. Bonde** ................................................. 348

#### II.2.6.1 Introduction .................................. 348

#### II.2.6.2 Lifestyle Factors ................................ 349

#### II.2.6.3 Workplace Factors ............................ 350

#### II.2.6.4 Environmental Exposures ....................... 354

#### II.2.6.5 Male-Mediated Developmental Toxicity ................................. 354

#### II.2.6.6 Conclusion .................................. 354

### Mechanisms of Dysfunction and Pathology

**A. Mahmoud, Frank Comhaire** .................. 362

#### II.2.7.1 Introduction .................................. 358

#### II.2.7.2 Sexual and Reproductive Function ............. 358

#### II.2.7.3 Systemic Diseases and Fertility ................................. 362

### Pathogenesis of Uro-Genital Cancers

**K. Everaert** ................................................. 370

#### II.2.8.1 Pathogenesis of Cancer in General ............. 362

#### II.2.8.2 Pathogenesis of Prostate Cancer .................. 366

#### II.2.8.3 Pathogenesis of Testis Cancer .................. 368

#### II.2.8.4 Pathogenesis of Penile Cancer .................. 369

#### II.2.8.5 Future ........................................... 370

### Diagnostic Tools

**F. Comhaire, A. Mahmoud** .................. 381

#### II.3.1.1 History Taking ................................ 371

#### II.3.1.2 Scheme for History Taking ....................... 371

#### II.3.1.3 Problem-Specific Special History Taking .................... 372

#### II.3.1.4 Clinical Examination for Andrological Conditions ......................... 376

### Semen Analysis and Sperm Function Tests

**F. Comhaire, A. Mahmoud** .................. 381

#### II.3.2.1 Introduction .................................. 381

#### II.3.2.2 Sample Collection and Delivery .................. 381

#### II.3.2.3 Initial Macroscopic Examination .................. 382

#### II.3.2.4 Initial Microscopic Investigation .................. 382

#### II.3.2.5 Evaluation of Morphological Characteristics ................................. 385

#### II.3.2.6 Testing for Antibody-Coated Spermatozoa ................................................. 386

#### II.3.2.7 Counting of Spermatozoa .......................... 387
II.3.4.1 Normal Flora of the Male Urogenital Tract
II.3.4.2 Pathogens in the Male Urogenital Tract
II.3.4.3 Microbiological Examinations in the Diagnosis of Male Urogenital Infections
II.3.4.4 Clinical Relevance of Cytomorphological Semen Analysis
II.3.4.5 Sperm Morphology and ICSI

II.3.5 Hormonal Evaluation in Infertility and Sexual Dysfunction
II.3.5.1 Introduction
II.3.5.2 Total Testosterone
II.3.5.3 Free Testosterone
II.3.5.4 Luteinizing Hormone (LH) and Follicle-Stimulating Hormone (FSH)
II.3.5.5 Inhibin B
II.3.5.6 Anti-Müllerian Hormone
II.3.5.7 Oestradiol
II.3.5.8 Sex Hormone Binding Globulin (SHBG)
II.3.5.9 Prolactin
II.3.5.10 Dihydrotestosterone
II.3.5.11 Hormonal Evaluation of Sexual Dysfunction
II.3.5.12 Human Chorionic Gonadotrophin (hCG) Stimulation Test
II.3.5.13 Gonadotrophin Releasing-Hormone (GnRH) Stimulation Test
II.3.5.14 Stimulation Tests

II.3.6 Tumour Markers in Andrology
II.3.6.1 Introduction
II.3.6.2 Markers for Prostatic Carcinoma:
Prostate-specific Antigen (PSA) and Others
II.3.6.3 Markers for Testicular Carcinoma:
α-Fetoprotein, Human Chorionic Gonadotrophin and Others

II.3.7 Technical Investigations Including Imaging Procedures: Doppler, MRI, PET, Echo for Tumours
II.3.7.1 Ultrasound (US)
II.3.7.2 Doppler
II.3.7.3 MRI (Magnetic Resonance Imaging)
II.3.7.4 PET (Positron Emission Tomography)
II.3.7.5 Emergencies in Andrology
II.3.7.6 Tumours

II.3.8.1 Introduction on the Bilaterality of the Disease
II.3.8.2 How to Use Contact Scrotal Thermograph
II.3.8.3 Medical Importance of the Complete and Accurate Diagnosis of Varicocele
II.3.8.4 Is There a Relationship Between Varicocele and Male Infertility?
II.3.8.5 Is Subclinical Varicocele Relevant to Male Infertility and Does it Require Treatment?
II.3.8.6 Is Ultrasoundography a Better Diagnostic Tool because Venography is Subject to Technical Variations?
II.3.8.7 Why Right Varicocele Could Not be Detected
II.3.8.8 Goren-Gat Technique for Detection and Treatment of Right and Left Varicocele
II.3.8.9 “Recurrent” Varicocele After Left High Ligation is Actually “Survived” Varicocele

II.3.9 Evaluation of Testicular Biopsy Samples from the Clinical Perspective
II.3.9.1 Indication
II.3.9.2 Preparation
II.3.9.3 Evaluation

II.3.10 Genetics and Male Infertility
II.3.10.1 Introduction
**II.4.9** Therapeutic Options for Benign Prostate Hyperplasia (BPH) and Prostatic Cancer

S.K.W. Leung, S.A. Mc Neill
