Table of Contents

ART Based Predictive Caching System for XML P2P Database .......................... 3
Wan-Song Zhang and Da-Xin Liu

DART-FAS: Federated Access Service on Database Grid ............................... 11
Guozhou Zheng, Zhaohui Wu, and Chang Huang

A Scalable Information Grid Architecture
Based on P2P and Web Service Technologies ........................................ 19
Dugki Min and Eunmi Choi

Research on Service-Oriented Software Framework ...................................... 27
Ying Li, Zhaohui Wu, and Shuiguang Deng

An Accounting and QoS Model for Grid Computing ................................. 36
Yang Guangwen, Yongwei Wu, Dazheng Huang, and Weimin Zheng

Reputation-Aware Contract-Supervised Grid Computing ............................ 44
Xiangli Qu, Nong Xiao, Guang Xiang, and Xue-Jun Yang

The Analysis of Efficient Monitoring Grid Traffic
with Flow Conservation Equation .......................................................... 52
Xianghui Liu, Jianping Yin, Xicheng Lu, Zhiping Cai, and Jianmin Zhao

Dynamic Semantic Clustering Approach for Web User Interest .................... 59
Jiu Jun Chen, Ji Gao, Bei Shui Liao, and Jun Hu

Building Interoperable Software Components Repository
Based on MMF ......................................................................................... 67
Bing Li, Keqing He, Jin Liu, Qiang Wang, Peng Liang, and Rong Peng

An Approach for Constructing Software Component Repository
in Grid Environments .............................................................................. 75
Dehui Du, Shi Ying, Keqing He, and Yangfan He

Agent-Based Modeling for Virtual Organizations in Grid .......................... 83
Yuqing Zhai, Yuzhong Qu, and Zhiqiang Gao

A Pattern-Based Approach to Facilitating Service Composition .................. 90
Haitao Hu, Yanbo Han, Kui Huang, Gang Li, and Zhuofeng Zhao

Design and Implementation of a Non-volatile RAM Disk in the SAN Environment ........................................... 203
  Ji-wu Shu, Bing Yu, and Rui Yan

Engineering Web Storage Servers Using Session Management .................. 213
  Min Qu, Yafei Dai, and Yang Zhao

Topology and Resource Discovery in Peer-to-Peer Overlay Networks ............. 221
  Dongsheng Li, Nong Xiao, and Xicheng Lu

An Implementation of Semi-synchronous Remote Mirroring System for SANs .................................................. 229
  Rui Yan, Ji-wu Shu, and Dong-chan Wen

A Security Scheme for United Storage Network ........................................... 238
  Yihui Luo, Changsheng Xie, and Chengfeng Zhang

STS: A Share Taper System for Storage Area Networks ............................. 246
  Jiefeng Xu and Zheng Qin

Storage Virtualization System with Load Balancing for SAN ...................... 254
  Weitao Sun, Ji-wu Shu, and Weimin Zheng

Design and Optimization of an iSCSI System ............................................ 262
  Bigang Li, Ji-wu Shu, and Weimin Zheng

Measurement and Modeling of Large-Scale Peer-to-Peer Storage System ....... 270
  Gang Liu, Mingzeng Hu, Binxing Fang, and Hongli Zhang

A Virtual Tape System Based on Storage Area Networks .......................... 278
  Fei Mu, Ji-wu Shu, Bigang Li, and Weimin Zheng

Cocktail Search in Unstructured P2P Networks ......................................... 286
  Xiuguo Bao, Binxing Fang, and Mingzeng Hu

Data I/O Optimization in Storage Systems ................................................. 294
  Di Wang, Ji-wu Shu, and Meiming Shen

Data Resource Discovery in a Computational Grid .................................... 303
  Sajindra Jayasena, Chin-Peng Yee, Jie Song, Abele Stoelwinder,
  Chong Wee See, and Wai-Hong Wong

The Design and Implementation of a Locking Mechanism for a Distributed Computing Environment .................................................. 311
  Jaechun No, Hyo Kim, and Jang-sun Lee

Replica Location Mechanism Based on DHT and the Small–World Theory ........ 319
  Xindong You, Guiran Chang, Wei Yang, Wandan Zeng,
  and Xueyao Chen

A New Chameleon Multi-signature Based on Bilinear Pairing .......................... 329  
*Chunbo Ma and Dake He*

A Topology-Adapted Network Defense Model Based on Mobile Agent .................. 335  
*Yichuan Jiang, Yiping Zhong, and Shiyong Zhang*

AT-RBAC: An Authentication Trustworthiness-Based RBAC Model ..................... 343  
*Lunwei Wang, Lifeng Wei, Xiangke Liao, and Huaimin Wang*

WBEM Based Distributed Network Monitoring .................................................. 351  
*Bo Liu and Hui Liu*

Multiparty Joint Authentication: Extending the Semantics of Single Sign-On for Grids .................................................. 358  
*Hui Liu and Minglu Li*

A Software Engineering Perspective for Services Security .............................. 366  
*Jun Han*

Algorithms for Congestion Detection and Control .......................................... 374  
*Wu Liu, Hai-Xin Duan, Jian-Ping Wu, Xing Li, and Ping Ren*

Modeling Time-Related Trust .......................................................................... 382  
*Chenlin Huang, Hua-Ping Hu, and Zhixing Wang*

Defending DDoS Attacks Using Network Traffic Analysis and Probabilistic Packet Drop .................................................. 390  
*Jungtaek Seo, Cheolho Lee, and Jongsub Moon*

Building a Secure Infrastructure for P2P Applications in Mobile Ad Hoc Networks ........................................................................ 398  
*Guangming Hu, Zunguo Huang, Hua-Ping Hu, and Zhenghu Gong*

Middleware Framework for Secure Grid Application in Mobile Web Services Environment .................................................. 406  
*Namje Park, Kiyoun Moon, Jongsu Jang, and Sungwon Sohn*

Autonomic Computing for Defense-in-Depth Information Assurance: Architecture and a Case Study .................................................. 414  
*Xin Xu, Zunguo Huang, and Lei Xuan*

Mining Maximal Frequent Itemsets for Intrusion Detection ................................ 422  
*Hui Wang, Qing-Hua Li, Huanyu Xiong, and Sheng-Yi Jiang*

# Workshop 5: International Workshop on Visualization and Visual Steering (VVS’2004)

Visualization Practice in Construction of a Computational Grid for Multidisciplinary Design Optimization of Aero-crafts .......................... 673  
*Hong Liu, Xin-hua Lin, Xi-li Sun, Xiao-Feng Qi, Qian-ni Deng, and Xin-da Lu*

EEMAS: An Enabling Environment for Multidisciplinary Application Simulations ........................................ 681  
*Lijun Xie, Yao Zheng, Jifa Zhang, Xin Huang, and Zhengge Huang*

Services for Parallel Remote-Sensing Image Processing Based on Computational Grid ........................................... 689  
*Xue-Jun Yang, Zhi-ming Chang, Haifang Zhou, Xiangli Qu, and Chun-Jiang Li*

Configuration of the Galaxy Grid Node Environment ........................................ 697  
*Guoteng Pan, Qiang Dou, Luoguo Xie, Guangming Liu, Haifang Zhou, Xiaqian Zhu, and Erhua He*

GVIs: A Java-Based Architecture for Grid Enabled Interactive Visualization ........................................ 704  
*Youbing Zhao, Wei Chen, Yingjun Qiu, and Jiaoying Shi*

Balancing CPU and GPU: Real-Time Visualization of Large Scale 3D Scanning Models ............................... 712  
*Zhao Dong, Wei Chen, Long Zhang, and Qunsheng Peng*

LRZB, a Hybrid Algorithm of Local Ray-Casting and Z-Buffering for Large Geometric Datasets ..................... 720  
*Xiaoxu Han, James Cremer, Zhihong Wang, and Jun Ni*

Image-Based Walkthrough over Internet on Mobile Devices ................................. 728  
*Yu Lei, Zhongding Jiang, Deren Chen, and Hujun Bao*

Service-Oriented RunTime Infrastructure on Grid ......................... 736  
*Tae-Dong Lee, Seung-Hun Yoo, and Chang-Sung Jeong*

Quality-of-Service Driven Visual Scheduling in Grid Computing ..................... 744  
*Changqin Huang, Guanghua Song, and Yao Zheng*

AFEC: An Advanced FEC Algorithm for Video Transmission Control over the Grid ........................................ 753  
*Yubo Tan, Yuxing Peng, Sikun Li, and Fujie Chen*

Delayed State Consistency in Distributed Virtual Environments .................. 761  
*Yuxing Peng, Yongjun Zhang, and Sikun Li*
Visual Semantic Query Construction in Dart Database Grid .......................... 768
  Yuxin Mao, Zhaohui Wu, and Huajun Chen

A Distributed Data Server in Grid Environment ........................................... 775
  Bin Chen, Nong Xiao, and Bo Liu

Author Index .................................................................................................... 783
