## Contents

### I Chronic Viral and Inflammatory Cardiomyopathy – Overview and Outlook

1. Overview on Chronic Viral Cardiomyopathy/Chronic Myocarditis  
   **H.-P. Schultheiss, U. Kühl** .......................... 3

2. Unsolved Medical Issues and New Targets for Further Research in Viral Myocarditis and Dilated Cardiomyopathy  
   **K.U. Knowlton** ........................................ 19

### II Viruses

3. Frontiers in Viral Diagnostics  
   **M. Pauschinger, A. Kallwellis-Opara** ................... 39

4. Invited for Debate: Is Virus Persistence a Determinant for Disease Progression?  
   **A. Keren** .................................................. 55

5. Parvovirus B19: The Causative Agent of Dilated Cardiomyopathy or a Harmless Passenger of the Human Myocard?  
   **S. Modrow** ................................................ 63
Contents

6 Parvovirus B19: A New Emerging Pathogenic Agent of Inflammatory Cardiomyopathy
  C.-T. Bock .......................................................... 83

7 Role of Hepatitis C Virus in Cardiomyopathies
  A. Matsumori ....................................................... 99

III Immunity and Autoimmunity

8 Recent Insights into the Role of Host Innate and Acquired Immunity Responses
  P. Liu, K. Fuse, G. Chu, Y. Liu, A. Opavsky ................. 123

9 The Significance of Autoimmunity in Myocarditis
  N.R. Rose .......................................................... 141

10 The Roles of Immunity and Autoimmunity in Chronic Heart Failure
  S. von Haehling, W. Doehner, S.D. Anker .................... 155

11 Clinical Implications of Anti-cardiac Immunity in Dilated Cardiomyopathy
  A.L.P. Cafforio, N.G. Mahon, W.J. McKenna ............... 169

IV Cardiac Remodeling

12 Inflammation and Cardiac Remodeling During Viral Myocarditis
  S. Heymans ......................................................... 197

13 Inflammatory Cardiomyopathy: There Is a Specific Matrix Destruction in the Course of the Disease
  J.A. Towbin ......................................................... 219

14 Invited for Debate: Is There a Virus-Specific Matrix Destruction in the Course of Disease in Dilated Cardiomyopathy?
  F. Waagstein ....................................................... 251
V Diagnosis and Treatment

15 New Non-invasive Approaches for the Diagnosis of Cardiomyopathy: Magnetic Resonance Imaging
   U. Sechtem, H. Mahrholdt, S. Hager, H. Vogelsberg ........ 261

16 New Therapeutics Targets in Chronic Viral Cardiomyopathy
   W. Poller, H. Fechner, U. Kühl, M. Pauschinger,
   H.-P. Schultheiss ........................................... 287

17 Myocarditis and Inflammatory Cardiomyopathy:
   Histomorphological Diagnosis
   F. Calabrese, A. Angelini, E. Carturan, G. Thiene ........ 305

18 Anti-viral Treatment in Patients with Virus-Induced Cardiomyopathy
   U. Kühl, M. Pauschinger, W. Poller, H.-P. Schultheiss ...... 323

19 Immunosuppressive Treatment of Chronic Non-viral Myocarditis
   A. Frustaci, M. Pieroni, C. Chimenti ......................... 343

20 Immunoadsorption in Dilated Cardiomyopathy
   S.B. Felix ..................................................... 353

Previous Volumes Published in This Series .................... 363
Chronic Viral and Inflammatory Cardiomyopathy
Schultheiss, H.-P.; Kapp, J.-F.; Grötzbach, G. (Eds.)
2006, XVIII, 370 p., Hardcover
ISBN: 978-3-540-23971-0
