# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	The Point of Departure . . . . .	1
1.2	Overview of the Book . . . . .	4
1.3	Preliminaries . . . . .	5
<b>2</b>	<b>Wavelet Transforms and Group Representations</b> . . . . .	15
2.1	Haar Measure and the Regular Representation . . . . .	15
2.2	Coherent States and Resolutions of the Identity . . . . .	18
2.3	Continuous Wavelet Transforms and the Regular Representation . . . . .	21
2.4	Discrete Series Representations . . . . .	26
2.5	Selfadjoint Convolution Idempotents and Support Properties . . . . .	39
2.6	Discretized Transforms and Sampling . . . . .	45
2.7	The Toy Example . . . . .	51
<b>3</b>	<b>The Plancherel Transform for Locally Compact Groups</b> . . . . .	59
3.1	A Direct Integral View of the Toy Example . . . . .	59
3.2	Regularity Properties of Borel Spaces* . . . . .	66
3.3	Direct Integrals . . . . .	67
3.3.1	Direct Integrals of Hilbert Spaces . . . . .	67
3.3.2	Direct Integrals of von Neumann Algebras . . . . .	69
3.4	Direct Integral Decomposition . . . . .	71
3.4.1	The Dual and Quasi-Dual of a Locally Compact Group* . . . . .	71
3.4.2	Central Decompositions* . . . . .	74
3.4.3	Type I Representations and Their Decompositions . . . . .	75
3.4.4	Measure Decompositions and Direct Integrals . . . . .	79
3.5	The Plancherel Transform for Unimodular Groups . . . . .	80
3.6	The Mackey Machine* . . . . .	85
3.7	Operator-Valued Integral Kernels* . . . . .	93
3.8	The Plancherel Formula for Nonunimodular Groups . . . . .	97
3.8.1	The Plancherel Theorem . . . . .	97
3.8.2	Construction Details* . . . . .	99

<b>4</b>	<b>Plancherel Inversion and Wavelet Transforms</b> .....	105
4.1	Fourier Inversion and the Fourier Algebra*	105
4.2	Plancherel Inversion*	113
4.3	Admissibility Criteria	119
4.4	Admissibility Criteria and the Type I Condition**	129
4.5	Wigner Functions Associated to Nilpotent Lie Groups**	130
<b>5</b>	<b>Admissible Vectors for Group Extensions</b> .....	139
5.1	Quasiregular Representations and the Dual Orbit Space	141
5.2	Concrete Admissibility Conditions	145
5.3	Concrete and Abstract Admissibility Conditions	155
5.4	Wavelets on Homogeneous Groups**	160
5.5	Zak Transform Conditions for Weyl-Heisenberg Frames	162
<b>6</b>	<b>Sampling Theorems for the Heisenberg Group</b> .....	169
6.1	The Heisenberg Group and Its Lattices	171
6.2	Main Results	172
6.3	Reduction to Weyl-Heisenberg Systems*	174
6.4	Weyl-Heisenberg Frames*	176
6.5	Proofs of the Main Results*	178
6.6	A Concrete Example	182
	<b>References</b> .....	185
	<b>Index</b> .....	191
