

Table of contents

Part I. Regular Sessions: Knowledge Discovery and Exploration

Feature Extraction by the SCoTLASS: An Illustrative Example	3
<i>Anna Bartkowiak, Nickolay T. Trendafilov</i>	
Rule Induction for Click-Stream Analysis: Set Covering and Compositional Approach	13
<i>Petr Berka, Vladimír Laš, Tomáš Kočka</i>	
Family of Instance Reduction Algorithms Versus Other Approaches	23
<i>Ireneusz Czarnowski, Piotr Jędrzejowicz</i>	
Minimum Spanning Trees Displaying Semantic Similarity	31
<i>Włodzisław Duch, Paweł Matykiewicz</i>	
Concept Description Vectors and the 20 Question Game	41
<i>Włodzisław Duch, Julian Szymański, Tomasz Sarnatowicz</i>	
Automatic Scripts Retrieval and Its Possibilities for Social Sciences Support Applications	51
<i>Yali Ge, Rafał Rzepka, Kenji Araki</i>	
The Analysis of the Unlabeled Samples of the Iron Age Glass Data	59
<i>Karol Grudziński, Maciej Karwowski</i>	
Discriminant versus Strong Rule Sets	67
<i>Jerzy W. Grzymala-Busse, Witold J. Grzymala-Busse, Jay Hamilton IV</i>	
IDARM — Mining of Indirect Association Rules	77
<i>Przemysław Kazienko</i>	
Building a Concept Hierarchy from a Distance Matrix	87
<i>Huang-Cheng Kuo, Jen-Peng Huang</i>	
Literal Trees and Resolution Technique	97
<i>Alexander Lyaletski, Alexander Letichevsky, Oleksandr Kalinovskyy</i>	
Rough Classification Used for Learning Scenario Determination in Intelligent Learning System	107
<i>Ngoc Thanh Nguyen, Janusz Sobecki</i>	

Rough Ethograms: Study of Intelligent System Behavior	117
<i>James F. Peters, Christopher Henry, Sheela Ramanna</i>	
Automatic Knowledge Retrieval from the Web	127
<i>Marcin Skowron, Kenji Araki</i>	
Knowledge Visualization Using Optimized General Logic Diagrams	137
<i>Bartłomiej Śnieżyński, Robert Szymacha, Ryszard S. Michalski</i>	
Efficient Processing of Frequent Itemset Queries Using a Collection of Materialized Views	147
<i>Marek Wojciechowski, Maciej Zakrzewicz</i>	

Part II. Regular Sessions: Computational Linguistics

GramCat and GramEsp: two grammars for chunking	159
<i>Montserrat Civit, M. Antònia Martí</i>	
Dynamic Perfect Hashing with Finite-State Automata	169
<i>Jan Daciuk, Denis Maurel, Agata Savary</i>	
Dictionary-Based Part-of-Speech Tagging of Polish	179
<i>Stanisław Galus</i>	
Enhancing a Portuguese Text Classifier Using Part-of-Speech Tags	189
<i>Teresa Gonçalves, Paulo Quaresma</i>	
A Neural Network Based Morphological Analyser of the Natural Language	199
<i>Piotr Jędrzejowicz, Jakub Strychowski</i>	
An Oracle Grammar-Rule Learning Based on Syntactic Knowledge	209
<i>Minghu Jiang, Huiying Cai, Dafan Liu, Junzhen Wang</i>	
Speech Interface for Internet Service “Yellow Pages”	219
<i>Alexey Karpov, Andrey Ronzhin</i>	
Automatic Information Classifier Using Rhetorical Structure Theory	229
<i>Hassan Mathkour, Ameer Touir, Waleed Al-Sanie</i>	
Rule-Based Medical Content Extraction and Classification	237
<i>Agnieszka Mykowiecka, Anna Kupść, Małgorzata Marciniak</i>	
A Rule-Based Tagger for Polish Based on Genetic Algorithm	247
<i>Maciej Piasecki, Bartłomiej Gawel</i>	

Part III. Regular Sessions: Search Engines

On Some Clustering Algorithms for Document Maps Creation	259
<i>Krzysztof Ciesielski, Michał Dramiński, Mieczysław A. Kłopotek, Mariusz Kujawiak, Sławomir T. Wierzchoń</i>	
Filtering Web Documents for a Thematic Warehouse Case Study: eDot a Food Risk Data Warehouse (extended) ...	269
<i>Amar-Djalil Mezaour</i>	
Data Merging in Life Science Data Integration Systems	279
<i>Tadeusz Pankowski, Ela Hunt</i>	
Approximation Quality of the RBS Ranking Algorithm	289
<i>Marcin Sydow</i>	

Part IV. Regular Sessions: Biologically Motivated Algorithms and Systems

Effects of Versatile Crossover and Mutation Operators on Evolutionary Search in Partition and Permutation Problems ..	299
<i>Zbigniew Kokosiński</i>	
Global Induction of Oblique Decision Trees: An Evolutionary Approach	309
<i>Marek Krętowski, Marek Grześ</i>	
Nature-Inspired Algorithms for the TSP	319
<i>Jarosław Skaruz, Franciszek Seredyński, Michał Gamus</i>	
Graph-Based Analysis of Evolutionary Algorithm	329
<i>Zbigniew Walczak</i>	

Part V. Regular Sessions: Statistical and Database Methods in AI

Probability of Misclassification in Bayesian Hierarchical Clas- sifier	341
<i>Robert Burduk</i>	
A study on Monte Carlo Gene Screening	349
<i>Michał Dramiński, Jacek Koronacki, Jan Komorowski</i>	
Spatial Telemetric Data Warehouse Balancing Algorithm in Oracle9i/Java Environment	357
<i>Marcin Gorawski, Robert Chechelski</i>	

Comparison of Efficiency of Some Updating Schemes on Bayesian Networks	367
<i>Tomasz Łukaszewski</i>	
Analysis of the Statistical Characteristics in Mining of Frequent Sequences	377
<i>Romanas Tumasonis, Gintautas Dzemyda</i>	
PCA and ICA Methods for Prediction Results Enhancement .	387
<i>Ryszard Szupiluk, Piotr Wojewnik, Tomasz Ząbkowski</i>	
Creating Reliable Database for Experiments on Extracting Emotions from Music	395
<i>Alicja Wieczorkowska, Piotr Synak, Rory Lewis, Zbigniew Ras</i>	

Part VI. Poster Session

You Must Be Cautious While Looking For Patterns With Multiresponse Questionnaire Data	405
<i>Guillermo Bali Ch., Dariusz Czerski, Mieczysław Kłopotek, Andrzej Matuszewski</i>	
Immunological Selection Mechanism in Agent-Based Evolutionary Computation	411
<i>Aleksander Byrski, Marek Kisiel-Dorohinicki</i>	
Unfavorable Behavior Detection in Real World Systems Using the Multiagent System	416
<i>Krzysztof Cetnarowicz, Renata Cięciwa, Edward Nawarecki, Gabriel Rojek</i>	
Intelligent Navigation in Documents Sets Comparative Study .	421
<i>Maciej Czyżowicz</i>	
Assessing Information Heard on the Radio	426
<i>Antoni Diller</i>	
Belief Rules vs. Decision Rules: A Preliminary Appraisal of the Problem	431
<i>Jerzy W. Grzymala-Busse, Zdzisław S. Hippe, Teresa Mroczek</i>	
iMatch — A New Matchmaker For Large Scale Agent Applications	436
<i>Ashwin Bhat Gurpur</i>	
Machine Learning and Statistical MAP Methods	441
<i>Mark Kon, Leszek Plaskota, Andrzej Przybyszewski</i>	

Autocovariance Based Weighting Strategy for Time Series Prediction with Weighted LS-SVM	446
<i>Paweł Majewski</i>	
Workflow Mining Alpha Algorithm — A Complexity Study ..	451
<i>Bolesław Mikolajczak, Jian-Lun Chen</i>	
Recommendation Rules — a Data Mining Tool to Enhance Business-to-Customer Communication in Web Applications ...	456
<i>Mikołaj Morzy</i>	
Feasibility Studies of Quality of Knowledge Mined from Multiple Secondary Sources	
I. Implementation of generic operations	461
<i>Wiesław Paja, Zdzisław S. Hippe</i>	
Modern Metaheuristics for Function Optimization Problem ...	466
<i>Marek Pilski, Pascal Bouvry, Franciszek Seredyński</i>	
Property Driven Mining in Workflow Logs	471
<i>Ella E. Roubtsova</i>	
Logical Design with Molecular Components	476
<i>Filomena de Santis, Gennaro Iaccarino</i>	
A New Programming Interface for Reinforcement Learning Simulations	481
<i>Gabriela Șerban</i>	
Anomaly Detection System for Network Security: Immunity-based Approach	486
<i>Franciszek Seredyński, Pascal Bouvry, Dawid R. Rutkowski</i>	
Importance of TDS Attribute in Computer Assisted Classification of Melanocytic Skin Lesions	491
<i>Aleksander Sokółowski</i>	
A Rules-to-Trees Conversion in the Inductive Database System VINLEN	496
<i>Tomasz Szydło, Bartłomiej Śnieżyński, Ryszard S. Michalski</i>	
<hr/>	
Part VII. Invited Session: Syntactic Parsing and Machine Learning	
<hr/>	
Deep Parser for Free English Texts Based on Machine Learning with Limited Resources	503
<i>Marek Łabuzek, Maciej Piasecki</i>	

Baseline Experiments in the Extraction of Polish Valence Frames	511
<i>Adam Przepiórkowski, Jakub Fast</i>	

**Part VIII. Invited Session: New Trends in Data Mining and
Knowledge Discovery in Uncertain, Nonstationary Spatio-
Temporal Data**

Gene Expression Clustering: Dealing with the Missing Values	521
<i>Alicja Grużdź, Aleksandra Ihnatowicz, Dominik Ślęzak</i>	
Estimation the Rhythmic Saliency of Sound with Association Rules and Neural Networks	531
<i>Bożena Kostek, Jarosław Wójcik, Piotr Holonowicz</i>	
A Neuro-Fuzzy Classifier Based on Rough Sets	541
<i>Huanglin Zeng, Roman W. Swiniarski</i>	

Part IX. Invited Session: Knowledge Base Systems

Evolutionary Multi-Agent Model for Knowledge Acquisition ..	553
<i>Wojciech Froelich</i>	
Restricted Linear Information Systems	561
<i>Mikhail Ju. Moshkov</i>	
The Concept of the Hierarchical Clustering Algorithms for Rules Based Systems	565
<i>Agnieszka Nowak, Alicja Wakulicz-Deja</i>	
Petri Net and Matrix Representation of Rule Knowledge Base for Verification Task	571
<i>Roman Siminski</i>	
Artificial Neural Networks in Incomplete Data Sets Processing	577
<i>Magdalena Tkacz</i>	
Intelligent Data Processing in Distributed Internet Applications	585
<i>Beata Zielosko, Alicja Wakulicz-Deja</i>	

Part X. Invited Session: KDD and Facial Recognition

- Skyline with Presorting: Theory and Optimizations** 595
Jan Chomicki, Parke Godfrey, Jarek Gryz, Dongming Liang
- Faster Clustering with DBSCAN** 605
Marzena Kryszkiewicz, Lukasz Skonieczny
- Innertron: New Methodology of Facial Recognition, Part I** ... 615
Rory A. Lewis, Zbigniew W. Raś
- Innertron: New Methodology of Facial Recognition, Part II**... 625
Rory A. Lewis, Zbigniew W. Raś
- Approximating a Set of Approximate Inclusion Dependencies** . 633
Fabien De Marchi, Jean-Marc Petit

Part XI. Invited Session: Recent Developments in Bioinformatics

- Informatic Approaches to Molecular Translation** 643
David H. Ardell
- An Approach to Mining Data with Continuous Decision Values** 653
Hung Son Nguyen, Marta Luksza, Ewa Mąkosa, Henryk Jan Komorowski
- Soft Computing Approach to the Analysis of the Amino Acid Similarity Matrices** 663
Witold R. Rudnicki, Jan Komorowski

Part XII. Special Session: Artificial Immune Systems

- Computing with Idiotypic Networks** 673
Francisco Martins, Neva Slani
