## Table of Contents

### Constraint Propagation

GCC-Like Restrictions on the \emph{Same} Constraint ............................... 1  
\textit{Nicolas Beldiceanu, Irit Katriel, and Sven Thiel}

A Note on Bilattices and Open Constraint Programming ...................... 12  
\textit{Arnaud Lallouet}

Pruning by Equally Constrained Variables ........................................ 26  
\textit{Igor Razgon and Amnon Meisels}

### Search

Trying Again to Fail-First .......................................................... 41  
\textit{J. Christopher Beck, Patrick Prosser, and Richard J. Wallace}

Characterization of a New Restart Strategy  
for Randomized Backtrack Search .................................................. 56  
\textit{Venkata Praveen Guddeti and Berthe Y. Choueiry}

Dynamic Distributed BackJumping .................................................... 71  
\textit{Viet Nguyen, Djamila Sam-Haroud, and Boi Faltings}

A Value Ordering Heuristic for Local Search  
in Distributed Resource Allocation .................................................. 86  
\textit{Adrian Petcu and Boi Faltings}

Automatically Exploiting Symmetries in Constraint Programming .............. 98  
\textit{Arathi Ramani and Igor L. Markov}

New Structural Decomposition Techniques  
for Constraint Satisfaction Problems ............................................... 113  
\textit{Yaling Zheng and Berthe Y. Choueiry}

### Applications

Algorithms for the Maximum Hamming Distance Problem ....................... 128  
\textit{Ola Angelsmark and Johan Thapper}

A System Prototype for Solving Multi-granularity Temporal CSP ............ 142  
\textit{Claudio Bettini, Sergio Mascetti, and Vincenzo Pupillo}
