Contents

Section one: Some Basic Perspectives
Introduction............................................................................................................. 1
Chapter 1. Towards a More Holistic Approach to Urban Transport Studies................................................................. 5
    Bengt Kasemo
Chapter 2. How to Describe Large Technical Systems and Their Changes over Time?......................................................... 12
    Arne Kaijser
Chapter 3. The Meaning of the Words ‘Complex’ and ‘Complexity’................................................................................. 20
    Emin Tengström

Section two: Urban Transport Systems Today:
a Variety of Complexity
Introduction.............................................................................................................26
Chapter 4. Responding to the Complex Transport Needs of Dispersed Wealthy Cities: a Comparison of Melbourne, Australia and Toronto, Canada.........................................................32
    Paul Mees
Chapter 5. Urban Public Transport in an International Perspective.......................................................................................45
    Hans Örn
Chapter 6. An Analysis of the Situation in Dar-es-Salaam in Tanzania from an Institutional Coordination Perspective.........65
    A.Kanyama, A.Carlsson-Kanyama, A-L.Lindén, J.Lupala
    Liya Liu
Chapter 8. The Complex Relationships between Motorized Mobility, Societal Development and Sustainability….103
    Marie Thynell

Section three: Coping with Complexity: Some Analytical Perspectives
Introduction…………………………………………………………..112
Chapter 9. Progress in Coping with Complex Urban Transport Problems in the United States……………………………..118
    Robert Cervero
Chapter 10. Self-organizing Systems and Innovation in Asian Cities…………………………………………………………144
    Geetam Tiwari
Chapter 11. Urban Transport in Africa: Opportunities for Maximising Intervention in Complex Systems………………158
    V.M. Nantulya, M. Khayesi, W. Odero
Chapter 12. Examples of Positive Changes of Complex Urban Transport Problems in Europe…………………………174
    John Whitelegg

Section four: The Role of Actors in Coping with Urban Transport Development
Introduction…………………………………………………………… 185
Chapter 13. The “Non-Technical” Issues that Create Barriers to Successful Implementation of Urban Projects in Developing Countries……………………………………190
    Desmon A.Brown
Chapter 14. Portland and Smart Growth: What you can Learn from the Portland Experience…………………………..206
    Ethan Seltzer and Andy Cotugno
    Stephanos Anastasiadis
Chapter 16. Economic Impact of Light Rail Investments: Summary of the Results for 15 Urban Areas in France, Germany, UK and North America .......................... 245
Carmen Hass-Klau and Graham Crampton

Section five: Challenges in Dealing with the Complexity of Urban Transport
Introduction ........................................................................................................ 256
Chapter 17. How do Political Actors Deal with the Complexity of Urban Transport? .................................................................................. 260
Måns Lönnroth
Chapter 18. Academic Studies of Complex Engineered Systems: How this New Knowledge can be Used to Improve Education and Practice for Mobility .................................................. 268
David H. Marks
Chapter 19. Safety and Sustainable Urban Transport .................. 279
Dinesh Mohan
Chapter 20. How does VREF Proceed? ............................................ 292
Gunilla Jönson and Bengt Kasemo

List of Figures, Graphs, Tables and Boxes........................................ 299

Some useful addresses............................................................................. 301
Urban Transport Development
A Complex Issue
