3.2 Specification by Fuzzy Sets

3.2.1 The Idea of a Fuzzy Set

3.2.2 Specification of Fuzzy Sets

3.2.3 Operations with Fuzzy Sets

3.2.4 Connections Via Functions and of Fuzzy Numbers

3.2.5 Fuzzy Relations

4 Specification and Use of Uncertain Variability

4.1 Chance and Probability

4.1.1 Model Ideas for the Notion Chance

4.1.2 Probability

4.1.3 Random Variables and Their Distributions

4.1.4 Asymptotic Statements

4.2 Probabilistic Inference

4.2.1 Samples

4.2.2 Parameter Estimation

4.2.3 Testing of Hypotheses

4.2.4 Problems with Imprecise Data

4.3 Bayesian Theory

4.3.1 Bayesian Inference

4.3.2 Hierarchical Inference and Robustness

4.3.3 Numerical Problems

5 Specification of Vagueness of Statements on Sets

5.1 Fuzzy Measures

5.1.1 The Idea of a Fuzzy Measure

5.1.2 Forms and Properties of Fuzzy Measures

5.2 Simple Inference with Fuzzy Measures

5.2.1 Specification of Partial Ignorance

5.2.2 Possibilistic Inference

5.3 Probability and Fuzziness

5.3.1 Probability of Fuzzy Events

5.3.2 Random Fuzzy Sets

6 Methods from Qualitative Data Analysis

6.1 Crisp Classification of Crisp Data

6.1.1 The Problem of Cluster Analysis

6.1.2 Mathematical Formulation of the Problem

6.1.3 Some Procedures for Crisp Cluster Partition

6.1.4 Clustering with a Mathematical-Statistical Background

6.1.5 Basic Ideas of Neural Networks

6.2 Fuzzy Classification of Crisp Data

6.2.1 Fuzzy Cluster

6.2.2 Procedures of Fuzzy Cluster Analysis
Mathematics of Uncertainty
Ideas, Methods, Application Problems
Bandemer, H.
2006, XIV, 190 p., Hardcover
ISBN: 978-3-540-28457-4
