Part I  Surgical Management of Strabismus

1  Surgically Important Anatomy ............. 3
1.1  The Ocular Adnexa ...................... 3
1.1.1  Surgical Access ...................... 3
1.1.2  Eyelid Fissure Orientation .......... 4
1.1.3  Facial Asymmetry .................... 4
1.1.4  Pseudostrabismus .................... 5
1.1.5  Strabismus-Induced Eyelid Changes ... 6
1.1.6  Pseudoptosis ........................ 7
1.2  The Conjunctiva .......................... 7
1.3  The Sclera ............................... 7
1.4  Fascial System .......................... 9
1.4.1  Tenon’s Fascia ....................... 9
1.4.2  Function of Tenon’s Capsule and Orbital Connective Tissues ............. 9
1.5  The Rectus Muscle Pulley System ...... 10
1.6  Gross Anatomy of the Extraocular Muscles 12
1.6.1  Rectus Muscles ...................... 12
1.7  Innervation of the Extraocular Muscles 15
1.8  Blood Supply to Extraocular Muscles ... 15
1.9  Surgically Important Anatomy of Individual Extraocular Muscles ....... 16
1.9.1  Medial Rectus Muscle ............... 16
1.9.2  Lateral Rectus Muscle ............... 16
1.9.3  Inferior Rectus Muscle .............. 17
1.9.4  Superior Rectus Muscle ............. 17
1.9.5  Superior Oblique Muscle/Tendon ... 18
1.9.6  Inferior Oblique Muscle ............. 18
1.10  References ................................ 19

2  Physiology of Eye Movements ............. 21
2.1  Axes of Ocular Rotation and Listing’s Plane 21
2.2  Duction Movements ..................... 22
2.3  Version Movements ..................... 22
2.4  Vergence Movements ................... 22
2.5  Basic Laws Governing Eye Movements ... 22
2.6  Sherrington’s Law of Reciprocal Innervation .................. 23
2.7  Hering’s Law of Equal Innervation ...... 23
2.8  Donders’ Law ........................... 23
2.9  Cardinal and Diagnostic Positions of Gaze 23
2.10  Actions of Individual Muscles ........ 24
2.10.1  Horizontal Rectus Muscles ........ 24
2.10.2  Vertical Rectus Muscles ............ 24
2.10.3  The Oblique Muscles ............... 25
References ................................ 26

Indications for Strabismus Surgery ........ 27
1.1  Restoration of Binocular Vision ........ 27
1.2  Diplopia ................................. 28
1.3  Incomitant Strabismus .................. 28
1.4  Asymptomatic Patients .................. 29
1.5  Compensatory Head Posture ............ 29
1.6  Miscellaneous Surgical Indications .... 30
1.7  Nystagmus ............................... 30
1.8  Expansion of the Field of Vision in Patients with Esotropia ............... 30
1.9  Psychosocial and Vocational Indications .... 31
References ................................ 32

Surgical Decision Making .................. 35
1.1  Preoperative Evaluation ................. 35
1.2  Strabismus History ...................... 35
1.3  Ocular Motor and Sensory Examination .. 35
1.4  Devising the Surgical Plan ............... 36
1.5  Which Eye to Operate? ................... 36
1.6  How Many Muscles to Operate? .......... 36
1.7  Surgical “Dose” .......................... 37
1.8  Special Considerations ................... 39
1.9  Torsion ................................. 39
1.10  Incomitant Strabismus .................. 39
1.11  Adjustable Suture Surgery ............... 39
References ................................ 39

Preoperative and Postoperative Care ....... 41
1.1  Scheduling Surgery ..................... 41
1.2  Preparation for Surgery ................ 41
1.3  Arrival in the Operating Room ......... 42
1.4  Care of the Patient Following Surgery .. 43
1.5  Timing of the First Postsurgical Visit ... 43
1.6  Preoperative and Postoperative Drops ... 43
1.7  References ................................ 46

Anesthesia Considerations .................. 47
1.1  Preoperative Preparation ................. 47
1.2  Laboratory Testing ........................ 47
1.3  Fasting Recommendations ............... 47
1.4  Preoperative Medications ............... 48
6.2 General Anesthesia .......................... 48
6.2.1 Induction of Anesthesia ................. 48
6.3 Retrobulbar and Peribulbar Anesthesia .... 49
6.4 Sub-Tenon’s Anesthesia ....................... 49
6.5 Topical Anesthesia .............................. 49
6.5.1 Modification of Surgical Technique for Topical Anesthesia ................. 50
6.6 Postoperative Nausea and Vomiting ......... 51
6.7 The Oculocardiac Reflex ......................... 52
6.8 The Ocular Respiratory Reflex ............... 53
6.9 Postoperative Pain ................................ 53

7 Equipment, Operating Room Supplies, and Patient Preparation .......... 57
7.1 Preoperative Patient Preparation .............. 57
7.2 Draping the Patient ............................... 57
7.3 Arrangement of the Operating Room Space .................. 58
7.4 Surgical Instruments ............................. 58
7.4.1 Curved Locking 0.5-mm Forceps .......... 61
7.4.2 Gass Muscle Hook ........................... 61
7.4.3 Scobee Muscle Hook ......................... 62
7.5 Surgical Needles .................................. 62
7.5.1 Choosing a Surgical Needle ................. 62
7.5.2 Use of a Surgical Needle ..................... 63
7.6 Sutures ............................................. 63
7.6.1 Absorbable Sutures ......................... 63
7.6.1.1 Collagen Sutures ......................... 63
7.6.1.2 Synthetic Sutures ......................... 64
7.7 Nonabsorbable Sutures ......................... 64
7.8 Surgical Gloves ................................... 64
7.9 Magnification ...................................... 64
7.9.1 References ..................................... 65

8 Techniques of Exposure and Closure and Preliminary Steps of Surgery .... 67
8.1 What to do Prior to Making a Conjunctival Incision for Strabismus Surgery .................. 67
8.1.1 Visual Inspection of the Patient's Conjunctival Anatomical Landmarks .... 67
8.1.2 Visual and Tactile Identification of the Rectus Muscles .................. 67
8.1.3 Rectus Muscle Forced Traction Testing .... 67
8.1.3.1 Technique for Rectus Muscle Traction Testing .................. 67
8.1.4 Oblique Muscle/Tendon Forced Traction Testing .................. 69
8.1.4.1 Technique for Forced Traction Testing of the Superior Oblique Muscle/Tendon .... 69
8.1.4.2 Technique for Forced Traction Testing of the Inferior Oblique Muscle .......... 69
8.1.5 Spring Back Test for Slipped or Lost Muscle .......................... 71
8.2 Conjunctival Incisions for Rectus Muscle Surgery .......................... 72
8.2.1 Fornix (Cal-de-Sac) Incision ................. 73

8.2.1.1 Fornix Incision Technique ................. 73
8.2.1.1.1 Initial Incision .......................... 74
8.2.1.1.2 Isolation of a Rectus Muscle .......... 75
8.2.1.1.3 Heel or Toe Maneuver .................. 76
8.2.1.1.4 Exposure of the Muscle Insertion .... 76
8.2.1.1.5 The Pole Test .......................... 76
8.2.1.1.6 Dissection of the Muscle Fascia .... 76
8.2.1.1.7 Closure of a Fornix Incision ........ 79
8.2.2 Limbal Incision .................................. 79
8.2.2.1 Limbal Incision Technique ............. 80
8.2.2.1.1 Initial Incision .......................... 80
8.2.2.1.2 Isolation of the Muscle and Dissection of the Muscle Fascia ............. 80
8.2.2.1.3 Closure of a Limbal Incision ........ 81
8.2.2.1.4 Modified Limbal Incision .............. 82
8.2.2.1.5 Conjunctival Recession ............... 82
8.2.3 Converting a Fornix Incision into a Limbal Incision .................. 83
8.2.3.1 Technique ................................. 83
8.2.4 Swan “Over the Muscle” Incision ........ 84
8.2.4.1 Technique ................................. 84
8.3 Conjunctival Incisions for Oblique Surgery .......................... 86
8.3.1 References ..................................... 86

9 Recession of the Rectus Muscles and Other Weakening Procedures .......... 87
9.1 General Principles for Recession of the Rectus Muscles .................. 87
9.2 Measurement of Recession .......................... 88
9.3 Specific Considerations for Surgery on Individual Rectus Muscles .... 88
9.4 Rectus Muscle Recession Techniques .................. 89
9.4.1 Standard Rectus Muscle Recession Technique .......................... 90
9.4.1.1 Placing Suture Near the Muscle Insertion .................. 90
9.4.1.2 Detachment of the Muscle from the Globe .................. 90
9.4.1.3 Securing the Muscle to the Sclera at its New Location .................. 92
9.4.2 Hang-Back Recession Techniques .................. 92
9.4.2.1 Introduction ............................... 92
9.4.2.2 Securing the Muscle to the Sclera .......................... 94
9.4.2.3 Measuring the Recession ..................... 94
9.4.2.4 Hemi Hang-Back Modifications .................. 95
9.4.3 Modified Recession Procedures .................. 96
9.5 A- and V-Patterns .................................. 96
9.5.1 Recession Following Scleral Buckling Procedures .................. 96
9.5.2 Recessions in Patients with Thin Sclera ............ 96
9.5.3 Free Tenotomy of a Rectus Muscle .................. 96
9.5.4 Recession with Fixation to the Adjacent Orbital Wall .................. 97
9.5.5 Y Splitting of the Lateral Rectus ............ 97
9.5.6 References ..................................... 97
### Resection of the Rectus Muscles and other "Strengthening" Procedures

Contents

15  Special Procedures  151
    15.1  Periosteal Flap Fixation of the Globe  151
    15.2  Recession and Periosteal Fixation of a Rectus Muscle  151
    15.3  Postoperative Traction Sutures  153
    15.4  Marginal Tenotomy/Myotomy  153
    15.5  Treatment of Esotropia and Hypotropia Associated with High Axial Myopia  154
    15.6  Horizontal Transposition of the Vertical Rectus Muscles to Treat Isolated Ocular Torticollis/Torsion  156
    15.7  Posterior Fixation Suture (Retroequatorial Myopexy, Fadenoperation)  156
    References  158

16  The Use of Botulinum Neurotoxin in the Treatment of Strabismus  159
    16.1  Mechanism of Action  159
    16.2  Effect on the Neuromuscular Junction  159
    16.3  Other Actions of Botulinum Neurotoxin  159
    16.4  History of Botulinum Neurotoxin in the Treatment of Strabismus  159
    16.5  Injection Techniques  160
    16.6  Treatment of Strabismus with Botulinum Toxin  161
    16.7  Botulinum Toxin in the Treatment of Nystagmus  162
    16.8  Complications  163
    References  163

17  Nonsurgical Treatment of Strabismus  165
    17.1  Spectacles  165
    17.1.1  Accommodative Esotropia  165
    17.1.2  Poor Uncorrected Visual Acuity  165
    17.1.3  Over Minus Lens Therapy  166
    17.1.4  Bifocal Lenses  166
    17.2  Occlusion Therapy  166
    17.2.1  Part-Time Occlusion  166
    17.2.2  Full-Time Occlusion  167

22.1.1 Glove Perforation 223
22.1.2 Operating Room Equipment and Supplies 223
22.2 Endophthalmitis 224
22.3 Periocular Infection (Orbital and Preseptal Cellulitis) 227
22.4 Scleritis 229
22.5 Subconjunctival Abscess 230
22.6 Corneal Ulcer 230
22.7 Concurrent Systemic Infections 230
22.8 Subacute Bacterial Endocarditis Prophylaxis 231
22.9 Concurrence Surgeries 231
22.10 Special Situations 231
22.11 Intraoperative Muscle Loss 239
22.1.1 The Snapped or Torn Extraocular Muscle 240
22.1.2 Delayed Loss of an Extraocular Muscle 241
22.1.3 Traumatic Disinsertion of an Extraocular Muscle 242

23 Slipped and Lost Muscles 233
23.1 The Slipped Muscle 233
23.1.1 Presentation and Diagnosis 233
23.1.2 Treatment 237
23.1.3 Prevention 237
23.2 The Lost Rectus Muscle 238
23.2.1 Clinical Presentation and Diagnosis 238
23.2.1.1 Intraoperative Muscle Loss 239
23.3 The Snapped or Torn Extraocular Muscle 240
23.4 Delayed Loss of an Extraocular Muscle 241
23.5 Traumatic Disinsertion of an Extraocular Muscle 242

23.6 Surgical Treatment of the Lost Extraocular Muscle 242
23.6.1 Retrieval and Reattachment 242
23.6.2 Transposition Procedures when Attempted Retrieval and Reattachment is Unsuccessful 243

23.7 Stretched Scar Syndrome 243
References 246

24 Hemorrhage 247
24.1 Introduction 247
24.2 Risk Factors 247
24.3 Eyelid Hemorrhages 247
24.4 Orbital Hemorrhage 248
24.5 Muscle Hemorrhage 249
24.6 Vortex Vein Hemorrhage 250
24.7 Subconjunctival Hemorrhage 250
24.8 Intraocular Hemorrhage 250

25 Adherence and Adhesion Syndromes 253
25.1 Fat Adherence Syndrome 253
25.2 Incidence 253
25.3 Prevention 254
25.4 Treatment 255
25.5 Miscellaneous Adhesion Syndromes Due to Strabismus Surgery 255
25.5.1 Adhesion Syndrome Following Superior Oblique Tendon Expander Surgery 255
25.5.2 Inferior Oblique Inclusion Syndrome 255
25.5.3 J-Deformity of a Rectus Muscle 256
25.5.4 Scarring of Tenon’s Capsule and Conjunctiva 256
References 256

26 Complications Involving the Ocular Adnexa 259
26.1 Eyelid Retraction and Advancement Following Vertical Rectus Muscle Surgery 259
26.2 Aberrant Regeneration of the Third Cranial Nerve 261
26.3 Eyelid Changes Following Horizontal Rectus Muscle Surgery 262
26.4 Ptosis and Pseudoptosis 263
26.5 Lid Changes Associated with Inferior Oblique Muscle Anterior Transposition 264
26.6 Eyelid Adhesions 264
26.7 Preseptal Cellulitis 265
26.8 Eyelid Ecchymosis and Hematoma 265
26.9 Burns 265
References 266

27 Unexpected and Atypical Anatomy 267
27.1 Congenital Aplasia of the Extraocular Muscles 267
27.2 Craniofacial Dysostosis Syndromes 267
27.3 Aplasia of the Superior Oblique Muscle and/or Tendon 268
27.4 Aplasia of the Inferior Oblique Muscle 269
Strabismus Surgery and its Complications
