## Contents

1 Hirschsprung's Disease: A Historical Perspective — 1691–2005 .......................... 1  
   J. L. Grosfeld

2 Development of the Enteric Nervous System 13
   P. Puri and U. Rolle
   2.1 Introduction ............................. 13
   2.2 Embryonic Origin of ENS .................. 13
   2.3 Origin and Development of Neural Crest-Derived Cells .......................... 14
   2.4 Functional Development of the ENS ........ 15
   2.5 Development of Intestinal Motility ...... 15
   2.6 Genes Involved in ENS Development .... 15
   2.7 Other Factors Implicated in the Control of ENS Development .................. 17
   2.8 Conclusions ............................. 17

3 Functional Anatomy of the Enteric Nervous System 21
   M. D. Gershon
   3.1 Introduction ............................. 21
   3.2 The Normal Enteric Nervous System ...... 22
   3.3 Organization of Enteric Neurons .......... 23
   3.4 The ENS is Derived from the Neural Crest ................................ 23
   3.5 The Crest-Derived Cells that Colonize the Gut are Originally Pluripotent and Migrate to the Bowel Along Defined Pathways in the Embryo ....... 25
   3.6 Enteric Neurons are Derived from More Than One Progenitor Lineage ........ 25
   3.7 Dependence of Enteric Neuronal Subsets on Different Microenvironmenal Signals (Growth/Differentiation Factors) Defines Sublineages of Precursor Cells: RET and Glial Cell Line-Derived Neurotrophic Factor .......................... 27
   3.8 The Development of the ENS is Probably Influenced by a Neurotrophin .......... 28
   3.9 NT-3 Promotes the Development of Enteric Neurons .............................. 29
   3.10 The Development of the ENS is Probably Influenced by a Cytokine .......... 31
   3.11 An Aganglionosis Similar to That in Hirschsprung's Disease Occurs in ls/ls and sl/sl Mice ................................ 32
   3.12 Genetic Abnormalities in Genes Encoding Endothelin-3 or its Receptor, Endothelin-B, are Associated with Spotted Coats and Aganglionosis .. 32
   3.13 An Action of EDN3 on Crest-Derived Precursors Does Not, by Itself, Account for the Pathogenesis of Aganglionosis .......... 33
   3.14 The Pathogenesis of Aganglionosis Is Not Explained by an Abnormality Limited to Crest-Derived Neural Precursors .............................. 34
   3.15 The Extracellular Matrix is Abnormal in the Presumptive Aganglionic Bowel of ls/ls Mice ................................ 35
   3.16 Laminin-1 Promotes the Development of Neurons from Enteric Cells of Neural Crest Origin .............................. 36
   3.17 The Effect of Laminin-1 on Enteric Neuronal Development Depends on the Binding of its α1 Chain to LBP110 .............................. 36
   3.18 The Effects of Laminin-1 on Crest-Derived Cells Immunoselected from the Fetal Bowel Are Different from those of Laminin-1 on Cells Isolated from the Crest Itself .............................. 37
   3.19 Premature Neuronal Differentiation May Result When Inadequately Resistant Progenitors Encounter an Excessively Permissive Extracellular Matrix ........ 38
   3.20 Both Crest-Derived and Non-Neuronal Cells of the Colon Probably Respond to EDN3 .............................. 38
3.21 Interstitial Cells of Cajal are Present, but Abnormal, in the Aganglionic Bowel of Hirschsprung's Disease ........................................... 39
3.22 Hirschsprung's Disease is Associated with Many Different Genetic Abnormalities: Conclusion From Animal Models .......................... 40
3.23 Summary ................................................. 40

4 Animal Models of Aganglionosis ........................................ 51
A.M. Alzahem and D.T. Cass

4.1 Introduction ............................................. 51
4.2 History .................................................. 51
4.3 Histologic Anatomy ..................................... 52
4.4 Physiology ............................................... 53
4.5 Embryologic Studies on Rodent Models of Aganglionosis .... 54
4.6 Molecular Genetics ....................................... 55
4.7 Contribution of Animal Models to Theories as to the Cause of Aganglionosis ............................................. 57
4.8 Summary ................................................. 58

5 The Molecular Genetics of Hirschsprung's Disease .................. 63

5.1 Epidemiology and Genetics of HSCR ................................ 63
5.2 The RET Protooncogene ................................... 64
5.3 Other Genes Involved in HSCR Pathogenesis ...................... 65
5.4 Genetic Analysis to Identify Other HSCR Loci ...................... 71
5.5 Additional Contribution of the RET Gene: SNPs and Haplotypes 72
5.6 Genetic Counseling ....................................... 73

6 Normal Colonic Motor Function and Relevant Structure ............ 79
J. Christensen

6.1 Introduction ............................................. 79
6.2 Morphology ............................................ 80
6.3 Motor Functions of the Large Intestine ............................ 86

7 Pathophysiology of Hirschsprung's Disease ......................... 95
P. Puri and S. Montedonico

7.1 Introduction ............................................. 95
7.2 Organization of the Gut ................................... 95
7.3 Motility of the Gut ...................................... 98

7.4 The Gut in Hirschsprung's Disease .................................. 100
7.5 Gut motility in Hirschsprung's Disease ............................ 102
7.6 Final Remarks ........................................... 103

8 Hirschsprung's Disease: Clinical Features ............................... 107
P. Puri and S. Montedonico

8.1 Introduction ............................................. 107
8.2 Incidence .............................................. 107
8.3 Classification ........................................... 107
8.4 Sex ................................................... 107
8.5 Race .................................................. 108
8.6 Heredity ............................................... 108
8.7 Clinical Presentation ..................................... 110

9 Congenital Anomalies and Genetic Associations in Hirschsprung's Disease .................................................. 115
S.W. Moore

9.1 Introduction ............................................. 115
9.2 Etiology of HSCR ....................................... 115
9.3 Overview of Associated Anomalies in HSCR ..................... 116
9.4 Gene-related Associations of HSCR ............................ 118
9.5 Significant Clinical Associations of HSCR ....................... 119
9.6 Other Less Common Associations with HSCR .................. 124

10 Enterocolitis Complicating Hirschsprung's Disease .................. 133
F. Murphy, M. Menezes and P. Puri

10.1 Introduction ............................................. 133
10.2 Pathogenesis ........................................... 133
10.3 Theories of Pathogenesis ................................... 134
10.4 Microbiology .......................................... 137
10.5 Pathology ............................................. 137
10.6 Risk Factors for Enterocolitis ................................ 137
10.7 Clinical Presentation and Diagnosis ............................ 138
10.8 Treatment .............................................. 140
10.9 Prognosis .............................................. 141

11 Diagnosis of Hirschsprung's Disease and Allied Disorders ........ 145
J. Kelleher and N. Blake

11.1 Radiological Diagnosis ..................................... 145
11.2 Initial Radiographs ..................................... 145
11.3 Differential Diagnosis ................................... 146
11.4 Enema Technique ...................................... 146
11.5 Enema Findings ....................................... 148
11.6 Enterocolitis .......................................... 149
12 Functional Diagnosis ............................ 153
A.M. Holschneider and I. Steinwegs

12.1 Anorectal Motility .......................... 153
12.2 Physiology of the Internal Anal Sphincter .......... 155
12.3 Comparison of the Internal Anal Sphincter and the Rectum .... 156
12.4 Electromanometry .......................... 157
12.5 Pathological Electromanometric Criteria .......... 166
12.6 Potential Electromanometric Errors ....... 171
12.7 Accuracy of Electromanometry ........ 173
12.8 Anorectal Manovolumetry .......... 174
12.9 Electromyography ...................... 174
12.10 Electromyography ..................... 175
12.11 Transit-time studies ................... 175
12.12 Conclusions ............................ 180

13 Histopathological Diagnosis and Differential Diagnosis of Hirschsprung's Disease .......... 185
W. Meier-Ruge and E. Bruder

13.1 Introduction ................................ 185
13.2 Hirschsprung's Disease ................. 185
13.3 Ultrashort Hirschsprung's Disease (UHD) ....... 187
13.4 Total Aganglionosis of the Colon ........ 187
13.5 Hypoganglionosis of the Colon .......... 188
13.6 Immaturity of the Submucous and Myenteric Plexus ...... 188
13.7 Intestinal Neuronal Dysplasia Type B (IND B) .......... 189
13.8 Intestinal Neuronal Dysplasia Type A (IND A) .......... 191
13.9 Hypoplasia of Nerve Cells in the Submucous and Myenteric Plexus (Hypoplastic Dysganglionic Oligoneuronal Hypoganglionosis) .......... 191
13.10 Desmosis of the Colon ................. 193
13.11 Pathogenesis of Hirschsprung's Disease and Related Disorders ........ 194
13.12 Artifacts and Pitfalls in the Enzyme Histochemical Technique .......... 194

14 NADPH-Diaphorase Histochemistry .......... 199
U. Rolle and P. Puri

14.1 Introduction .............................. 199
14.2 Nitric Oxide and NADPH-Diaphorase 199
14.3 Tissue Preparation for NADPH-Diaphorase Histochemistry .......... 200
14.4 Whole-Mount Preparation Technique .......... 200
14.5 NADPH-Diaphorase Histochemistry .......... 200

15 Immunohistochemical Studies .............. 207
U. Rolle and P. Puri

15.1 Introduction ................................ 207
15.2 General Markers .......................... 209
15.3 Cholinergic Markers .................... 212
15.4 (Nor)Adrenergic markers (Tyrosine Hydroxylase/Dopamine β-Hydroxylase) .......... 213
15.5 Non-adrenergic Non-cholinergic Markers .......... 213
15.6 Neuropeptides ............................ 214
15.7 Markers of Neuron-supporting Cells .......... 215
15.8 Synaptic Markers ....................... 215
15.9 Specific Staining of Hypertrophic Nerve Fibers in HD .......... 216
15.10 Diagnostic and Clinical Use: Recommendations for Diagnosis .......... 216

16 Electron Microscopic Studies of Hirschsprung's Disease ........ 221
T. Wedel, H.-J. Krammer and A.M. Holschneider

16.1 Introduction ................................ 221
16.2 Ultrastructural Features of Intestinal Aganglionosis .......... 221
16.3 Pathogenetic Implications ................ 226

17 Intestinal Neuronal Malformations (IND): Clinical Experience and Treatment .......... 229
A. M. Holschneider, P. Puri, L. H. Homrighausen, and W. Meier-Ruge

17.1 Introduction ................................ 229
17.2 Genetic Observations ............... 229
17.3 Occurrence .............................. 230
17.4 Classification ......................... 231
17.5 Symptoms .............................. 232
17.6 Incidence .............................. 233
17.7 Biopsy Technique ..................... 234
17.8 Diagnostic Criteria ..................... 235
17.9 Newer Staining Techniques .......... 236
17.10 Age .............................. 237
17.11 Correlation Between Histological Findings and Clinical Symptoms .......... 237
17.12 Maturation and Apoptosis ............ 238
17.13 Association Between IND and HD .......... 238
17.14 Management ....................... 244
17.15 Conclusion: Is IND a Real Disease? .......... 247
18 Neurocristopathies and Particular Associations with Hirschsprung's Disease . . . 253
S. W. Moore

18.1 Introduction ................................. 253
18.2 Neurocristopathies Associated with HSCR ................................. 253

19 Megacystis-Microcolon-Intestinal Hypoperistalsis Syndrome ................. 267
P. Puri

19.1 Introduction ................................. 267
19.2 Pathogenesis ................................. 267
19.3 Prenatal Diagnosis ............................. 268
19.4 Clinical Presentation ........................... 268
19.5 Radiological Findings ........................... 268
19.6 Surgical or Autopsy Findings .......... 269
19.7 Histological Findings ......................... 269
19.8 Outcome ............................... 270
19.9 Conclusion ................................. 270

20 Degenerative Hollow Visceral Myopathy Mimicking Hirschsprung's Disease ................................. 275
H. Rode, R.A. Brown and A. Numanoglu

20.1 Introduction ................................. 275
20.2 Classification ................................. 276
20.3 Etiology ................................. 276
20.4 Diagnosis ................................. 277
20.5 Pathology ................................. 280
20.6 Extraintestinal Lesions ......................... 281
20.7 Specific Disorders of Smooth Muscle .. 281
20.8 Differential Diagnosis ......................... 284
20.9 Treatment ............................... 284
20.10 Prognosis ................................. 285
20.11 Conclusion ................................. 285

21 Adynamic Bowel Syndrome .................. 287
P. J. Milla

21.1 Introduction ................................. 287
21.2 Clinical Presentation ........................... 288
21.3 Disorders Causing Pseudo-
Hirschsprung's Disease ......................... 288
21.4 Enteric Nervous System Disease ........ 288
21.5 Disorders Affecting Intestinal and Urinary Smooth Muscle .......... 291
21.6 Disorders of the Endocrine Environment ......................... 292
21.7 Diagnostic Techniques ......................... 294
21.8 Conclusions ................................. 295

22 Anal Sphincter Achalasia and Ultrashort Hirschsprung's Disease ................................. 297
A. M. Holschneider and M. Kunst

22.1 Anal Sphincter Achalasia ................. 297
22.2 Ultrashort Hirschsprung's Disease ........ 298
22.3 Classification of Anal Sphincter Achalasia ......................... 300
22.4 Symptoms ................................. 307
22.5 Anal Sphincter Achalasia in Combination with Hirschsprung's Disease ................................. 308
22.6 Reinnervation of the Internal Anal Sphincter ......................... 312
22.7 Diagnosis ................................. 312
22.8 Therapy of Anal Sphincter Achalasia .......... 314
22.9 Results ................................. 318

23 Laparoscopically Assisted Anorectal Pull-Through .................. 323
K. E. Georgeson and O. J. Muensterer

23.1 Introduction ................................. 323
23.2 Operative Technique ......................... 323
23.3 Results ................................. 326
23.4 Discussion ................................. 326

24 Swenson's Procedure .................. 329
P. Puri

24.1 Swenson's Procedure ......................... 329
24.2 Experience with Swenson's Operation .......... 331

25 Soave's Extramucosal Endorectal Pull-Through Procedure .................. 337
V. Jasomni, A. Pini Prato and G. Martucciello

25.1 History of the Endorectal Pull-Through Procedure .................. 337
25.3 Operative Technique ......................... 338
25.4 Anatomic Postoperative Condition .......... 342
25.5 Modifications of Soave's Technique .......... 344
25.6 Treatment of Hirschsprung's Disease .......... 344

26 Rehbein's Procedure (Deep Anterior Resection) .................. 349
A. M. Holschneider and R. Rassoul

26.1 Principles ................................. 349
26.2 Age at Operation ......................... 349
26.3 Colostomy: Yes or No? ...................... 349
