Contents

Introduction.........................................................................................................................1
   Peter Sachsenmeier, Martin Schottenloher

President's Introduction: From Idea to Implementation..................................................9
   Herbert Köpflinger

Plenary Presentations

Between Collaboration and Competition — The Future of the
European Manufacturing Industry....................................................................................13
   Hans-Jörg Bullinger, Dietmar Fischer

ERA: A Challenge for Co-opetition — "Towards Knowledge-based
Enterprises".......................................................................................................................23
   Hervé Péron

Plant Engineering in Global Competition .................................................................31
   Ludolf Plass

Jaguar Racing — Collaboration in the Workflow?.........................................................45
   Steve Nevey

Long-Term Cooperation in the European Aerospace Industry —
A Model for Future Successful Partnering in Competitive
Environments....................................................................................................................59
   Hans-Erich Mundt

The Network of Automotive Excellence as a Potential Response to
Change in Development / Production and Brand Policy.............................................63
   Wilhelm Becker

The European Automotive Supply Industry at the Crossroads.........................79
   Peter Stehle
Network of Automotive Excellence – The Future Role of Tier 1
from a Development Standpoint........................................... 87
  Peter Köpf

eEurope and the European Research Area – EU Policies to Address
Major Business and Work Challenges.................................... 91
  Erastos Filos

Networks of Excellence: Relevance, Feasibility, Sustainability........ 111
  Peter Sachsenmeier

Discussion Forums

Secure Engineering Collaboration – Engineering Alliances
Among Collaborative Enterprises.......................................... 125
  Martin Schmidt

e-Business: The Importance of Standards for e-Marketplaces ...... 127
  Preface and Summary...................................................... 127
  Alexander Scholz
  Electronic Catalogues..................................................... 131
  Peter Mund
  Transaction Standards..................................................... 135
  Boris Otto
  Business Process Standards............................................. 139
  Jacques Spee
  A Generic Reference Model for the Description of Plants and
  Products................................................................. 143
  Udo Döbrich, Roland Heidel
  Conclusion............................................................... 147
  Roland E Wolff

Neutrality, Openness and Co-operation in the Service Industry...... 149
  Hagen Wenzek, Harry Teifel

Core Competences: Recognition, Development and Successful
Implementation – Network of Automotive Excellence.................. 155
  Reiner Speiser, Hans H Jung
