PREFACE .......................................................................................................................... VII

PART ONE: ECONOMIC AND FINANCIAL MARKET CONSEQUENCES OF
GLOBAL AGEING ........................................................................................................ 1

EXECUTIVE OVERVIEW ............................................................................................ 3

INTRODUCTION .............................................................................................................. 9

SECTION 1: GLOBAL DEMOGRAPHIC TRENDS AND FORECASTS 1950-2050.... 13

SECTION 2: HOW IS AGEING LIKELY TO IMPACT ECONOMICALLY OVER
THE NEXT 50 YEARS: WHAT ARE THE MAIN TRANSMISSION
MECHANISMS? .............................................................................................................. 25

2.1: EXPENDITURE PRESSURES ON THE PUBLIC FINANCES .................................. 26

2.2: DEMOGRAPHIC CHANGE AND SAVINGS BEHAVIOUR .................................. 31

2.3: LABOUR SUPPLY IMPLICATIONS ...................................................................... 39

2.4: CAPITAL ACCUMULATION AND TOTAL FACTOR PRODUCTIVITY ............ 42

2.5: INTEREST RATE, EXCHANGE RATE AND BALANCE OF PAYMENTS
DEVELOPMENTS ......................................................................................................... 48

BOX 1: DEMOGRAPHIC CHANGE AND SAVINGS BEHAVIOUR :
THEORETICAL CONSIDERATIONS AND EMPIRICAL EVIDENCE ...... 33

BOX 2: OVERVIEW OF THE BASIC THEORETICAL MECHANISMS IN THE
AGEING MODEL ............................................................................................................ 51

SECTION 3: GLOBAL CAPITAL MARKET DEVELOPMENTS, CURRENT
ACCOUNT IMBALANCES AND THE EVIDENCE FOR AGE-
RELATED INTERNATIONAL CAPITAL FLOWS......................................................... 55

3.1: EXTERNAL CAPITAL MOVEMENTS: AN HISTORICAL PERSPECTIVE .... 55

NATURE OF CAPITAL MARKET INTEGRATION CHANGED
OVER TIME? .............................................................................................................. 56

3.1.2: COUNTRY SPECIFIC DEVELOPMENTS: OVERVIEW OF
CAPITAL MARKET INTEGRATION TRENDS FOR THE EU, US,
JAPAN, FAST AGING AND SLOW AGEING COUNTRIES :
1970-1998 .............................................................................................................. 62

3.2: DEMOGRAPHICS AND FOREIGN CAPITAL FLOWS: HAVE AGE-
RELATED CAPITAL MOVEMENTS BEEN A FEATURE OF RECENT
DECADES? ............................................................................................................... 73

3.3: FUTURE TRENDS IN INTERNATIONAL CAPITAL MOVEMENTS .......... 82

BOX 3: GROSS CAPITAL MOVEMENTS: INDICATOR OF DEGREE OF
CAPITAL MARKET OPENNESS .............................................................................. 69
ECONOMIC AND FINANCIAL MARKET CONSEQUENCES OF GLOBAL AGEING

Box 4: Tracking the Trend Evolution of Net Foreign Assets: Global Capital Market Restrictions and the Growing Concentration of Capital Flows into the US

Section 4: Global Ageing Scenario 2000-2050

4.1: Model Assumptions

4.2: Key Results

Box 5: Comparison of Growth Rates of GDP, Population and Living Standards for the Period 1950-2000 with That of the Model's Central Scenario for 2000-2050

Section 5: Policy Response: How Can the EU and the World as a Whole Effectively Deal with the Challenges of Ageing?

5.1: Dealing with Ageing - What Should be the Focus of EU Policy Reforms?

5.2: Dealing with the International Financial Market Effects of Ageing: More Not Less Globalisation is Needed

Box 6: EU Budgetary Prudence: The Importance of Respecting the Stability and Growth Pact

Box 7: Income Convergence: Theoretical and Empirical Evidence

Detailed Summary of Main Points from Part 1

Part Two: EU Pension Reform - An Overview of the Debate and an Empirical Assessment of the Main Policy Reform Options

Executive Overview of Key Policy Conclusions

Introductory Remarks

Section 1: Overview of the Pension Reform Debate

1.1: Key Issues and Concepts

1.2: Main Driving Forces Behind the Growing Calls for Pension Reform

1.2.1: Historical Analysis 1960-2000: What Was the Role of Demographic, Labour Market and Generosity Factors in Determining the Past Growth of EU and US Public Pension Expenditure?

1.2.2: Future Evolution 2000-2050: What are the Implications of Ageing for Growth and Pension Expenditure Trends in the EU and the US?

1.3: What are the Possible Policy Solutions?

Section 2: Description of Model Used to Assess the Pension Reform Options

2.1: Model's Central Scenario of the Growth and Pension Expenditure Implications in the EU of Ageing Populations (2000-2050)
2.2: Assessing the Explanatory Power of the Ageing Model: A Comparison with the Pension Projections from the EU's Economic Policy Committee ......................................................... 190

2.3: Criteria for Evaluating the Effectiveness of the Various PAYG and Systemic Pension Reform Options Analysed in Sections 3 to 5 ....................................................................................... 195

Section 3: PAYG System: Economic Assessment of the Main Parametric/Labour Market Reform Options: What is needed to Bring the System Back into Equilibrium?........... 199

3.1: Changes to the Generosity of the PAYG System (Partial V Full Shift from Wage to Price Indexation) .......................................................... 199

3.2: An Increase in the Effective Retirement Age ........................................... 201

3.3: Broad Package of "PAYG" Reforms: Labour Market + Generosity + Retirement Age Changes ................................................................. 204

Section 4: Systemic Reform: 2 Key Factors to be Considered:

Internal Rates of Return + Transition Burden .............................................. 207

4.1: Forecasts for the Internal Rate of Return of the PAYG + Funded Pension Systems: 2000-2050 (Central Scenario + Sensitivity Analysis) .................................................. 207

4.2: Forecasts for the Transition Burden in 2000 and its Evolution to 2050 (Central Scenario + Sensitivity Analysis) .................................................. 219

Section 5: Economic Assessment of a Full/Partial Shift to Funding ........................................................................................................... 225

5.1: 100% Shift to Funding: Compulsory Savings Option ......................... 225

5.2: 100% Shift to Funding: Voluntary Savings Option .............................. 232

5.3: Partial Shift to Funding + Stabilisation of PAYG System.................. 234

Section 6: An "Optimal" EU Pension Reform Strategy.................................. 239

6.1: Basic Policy Options with Regard to Public Pension Systems .............. 240

6.2: Optimal Package of Reforms + Two Stage Transition Path .............. 243

| Box 1: "Optimal" Policy Strategy: Maximising the Growth Rate Effects from Reform .................. 246 |

Detailed Summary of Main Points from Part 2 ........................................... 251

Part Three: Annexes .................................................................................. 261

Annex 1: Member States Analysis ............................................................. 263

Annex 2: Detailed Description of Ageing Model ........................................ 277

Annex 4: Results of Comparable Ageing Studies ...................................... 303

Annex 5: Prefunding within the PAYG System: Intergenerational Equity Objective .................. 307
The Economic and Financial Market Consequences of Global Ageing
McMorrow, K.; Röger, W.
2004, XIV, 346 p., Hardcover
