Contents

1 Introduction .................................................. 1
   References .................................................. 4

2 A Brief Historical Survey ................................. 5
   References .................................................. 7

3 Compton Scattering from the Proton ....................... 9
   3.1 Low-Energy Expansion .................................. 9
       3.1.1 Low-Energy Expansion to \( \mathcal{O}(\omega \omega') \) .... 9
       3.1.2 Energy Expansion to \( \mathcal{O}(\omega \omega')^2 \) ........... 13
       3.1.3 Forward Scattering and Sum Rules ................. 18
       3.1.4 Reevaluation of the Sum Rules ................... 22
   3.2 Dispersion Relations at Fixed \( t \) .................. 24
       3.2.1 Invariant Scattering Amplitudes .................... 25
       3.2.2 Dispersion Relations at Fixed \( t \) ................. 27
       3.2.3 Constraints from Forward Scattering ............... 27
       3.2.4 Constraints from Backward Scattering .......... 30
       3.2.5 Asymptotic Contributions ........................ 31
       3.2.6 Higher-Order Electromagnetic Polarizabilities .... 33
       3.2.7 Spin Polarizabilities ............................. 34
   References .................................................. 35

4 Experiments on the Proton .................................. 37
   4.1 Experiment at Low Photon Energies ................... 37
       4.1.1 TAPS Experiment ................................ 37
       4.1.2 Determination of the Electromagnetic Polarizabilities 38
       4.1.3 Backward Spin Polarizability \( \gamma^{(5)}_\pi \) ......... 43
   4.2 Experiments in the \( \Delta \)-Resonance Region ........... 44
       4.2.1 Experiments with the CATS NaI(Tl) Detector ....... 44
       4.2.2 LARA Experiment ................................. 45
       4.2.3 Results of the LARA and CATS NaI(Tl) Experiments 47
   References .................................................. 54
5 Quasi-Free Compton Scattering

5.1 Status of the Polarizabilities of the Neutron

5.2 Theoretical Description of Quasi-Free Scattering

5.3 Quasi-Free Compton Scattering from the Proton

5.3.1 TAPS Experiment

5.3.2 Results of the TAPS Experiment

5.4 Quasi-Free Compton Scattering from the Neutron

5.4.1 The CATS NaI(Tl)/SENECA Experiment

5.4.2 Results of the CATS NaI(Tl)/SENECA Experiment

References

6 Polarizabilities of the Nucleon

6.1 Polarizabilities of the Proton

6.1.1 Contributions to the Electromagnetic Polarizabilities

6.1.2 Contributions to the Spin Polarizabilities

6.2 Polarizabilities of the Neutron

6.2.1 Contributions to the Electromagnetic Polarizabilities

6.2.2 Contributions to the Spin Polarizabilities

6.3 Theoretical Predictions of the Polarizabilities

References

7 Summary and Outlook

References

A Appendix

A.1 Units

A.2 Photoabsorption and π Photoproduction Multipoles

A.3 Relations Between the Invariant Amplitudes

A.4 Tagged Photon Beam at MAMI

A.5 Kinematical Description of Compton Scattering

A.6 Kinematical Description of Quasi-Free Compton Scattering

A.7 TAPS Detector

A.8 CATS NaI(Tl) Detector

A.9 LARA Detector
