Contents

I What Are Sand Dunes?

1 A Perspective on Coastal Dunes ................................. 3
   M.L. Martínez, N.P. Psuty, and R.A. Lubke
   1.1 Coastal Dunes and Their Occurrence ..................... 3
   1.2 Relevance of Coastal Dunes ................................. 3
   1.3 Current Conservation Status ............................... 5
   1.4 Aims and Scope of the Book ............................... 6
   References ...................................................... 10

2 The Coastal Foredune: A Morphological Basis
   for Regional Coastal Dune Development ..................... 11
   N.P. Psuty
   2.1 Conceptual Setting .......................................... 11
   2.2 Dichotomies of Inquiry .................................... 12
   2.3 Dune Morphology Related to Sediment Supply
       and Dune–Beach Exchange .................................. 15
   2.4 Continuum Scenario ......................................... 17
   2.4.1 River Mouth Discharge ................................. 18
   2.4.2 Scenario Complexity ..................................... 20
   2.5 General Model ............................................ 22
   2.6 Humans as a Variable ...................................... 24
   2.7 Conclusions .............................................. 24
   References ...................................................... 25
### 3 Coastal Dunes in the Tropics and Temperate Regions:
Location, Formation, Morphology and Vegetation Processes

**P.A. HESP**

<table>
<thead>
<tr>
<th>Section</th>

12 The Role of Algal Mats on Community Succession in Dunes and Dune Slacks

G. VÁZQUEZ

12.1 Introduction

12.2 Hydrological Dynamics of Slacks in Coastal Dune Systems

12.3 Algal Communities in Slacks and Other Coastal Zones

12.4 The Role of Algae During Primary Succession

12.5 A Study Case on the Gulf of Mexico

12.6 Importance of Algae for Slack Conservation

12.7 Conclusions

References

13 Plant–Plant Interactions in Coastal Dunes

M.L. MARTÍNEZ and J.G. GARCÍA-FRANCO

13.1 Introduction

13.2 Facilitation

13.3 Competition

13.3.1 Grass Encroachment

13.3.2 Invasive Plants

13.4 Epiphytes

13.4.1 Non-Parasites

13.4.2 Parasites

13.5 Conclusions

14 Ant-Plant Interactions: Their Seasonal Variation and Effects on Plant Fitness

V. RICO-GRAY, P.S. OLIVEIRA, V. PARRA-TABLA, M. CUAUTLE, and C. DÍAZ-CASTELAZO

14.1 Importance of Interspecific Interactions

14.2 Richness and Seasonal Variation of Ant–Plant Interactions

14.3 Importance of Nectar to Ants in Tropical Seasonal Environments

14.4 Effect of Ants on Plant Fitness

14.4.1 Myrmecophylla (Schomburgkia tibicinis) christinae (Orchidaceae)

14.4.2 Paullinia fusescens (Sapindaceae)

14.4.3 Opuntia stricta (Cactaceae)
14.4.4  
*Turnera ulmifolia* (Turneraceae)  ........................................... 234
14.5  Conclusion  ................................................................. 235

**Environmental Problems and Conservation**

15  
**Environmental Problems and Restoration Measures**
  in Coastal Dunes in the Netherlands  ........................................... 243
  A.M. Kooijman

  15.1  Introduction  ................................................................. 243
  15.2  Differences Between Renodunaal and Wadden Districts  ........ 244
  15.3  Impact of Availability of P on Biomass Production  
       and Successional Trends  ...................................................... 245
  15.3.1  Renodunaal District  ...................................................... 245
  15.3.2  Wadden District  ............................................................ 247
  15.4  Effect of Mineralization of Nitrogen  .................................. 247
  15.4.1  Impact of Litter Production  .............................................. 247
  15.4.2  Impact of Litter Decomposition  ......................................... 249
  15.5  Role of *Ammophila arenaria* in the Wadden District  ............ 250
  15.6  Restoration  ................................................................. 250
  15.6.1  Effect of Grazing and Annual Mowing  .................................. 251
  15.6.2  Effect of Sod Cutting  .................................................... 253
  15.6.3  Effect of Increased Aeolian Activity  .................................. 254
  15.7  Concluding Remarks  ....................................................... 255
References  ................................................................. 256

**The Costs of our Coasts: Examples of Dynamic**
  Dune Management from Western Europe  ........................................... 259
  F. van der Meulen, T.W.M. Bakker, and J.A. Houston

  16.1  Introduction  ................................................................. 259
  16.2  Coastal Dunes: Dynamic Systems and Management  ................... 259
  16.3  Examples from Western Europe: England  
       and The Netherlands  ............................................................ 261
  16.4  The Sefton Coast (England)  ................................................ 262
  16.4.1  Area  ................................................................. 262
  16.4.2  Management  ................................................................. 263
  16.4.3  The Sefton Coast in the 21st Century  .................................... 264
  16.4.4  Recreation  ................................................................. 266
16.4.4.1 Visitor Research ................................. 266
16.4.4.2 Visitor Typology ............................... 266
16.4.5 Costs of Management ............................. 267
16.5 The Meijendel Dunes (The Netherlands) .......... 268
16.5.1 Area ............................................. 268
16.5.2 Management by the Dunewater Company ....... 269
16.5.3 Recreation: Better Possibilities for People to Enjoy Nature .... 269
16.5.4 Meijendel and the Production of Drinking Water ...... 272
16.5.5 Development of a Natural Core Area .............. 272
16.5.6 Costs of Management ............................. 274
16.5.7 Visitors Appraisal ................................ 275
16.6 Dune Management in a Changing Society .......... 275
References .............................................. 276

17 Animal Life in Sand Dunes: From Exploitation and Prosecution to Protection and Monitoring ...... 279
G. Baeyens and M.L. Martínez

17.1 Introduction ....................................... 279
17.2 Cropping Stock and Game: The Medieval Sand Dunes as a Store of Animal Goods .................. 280
17.3 Nature Conservation Starts with Bird Protection .... 281
17.4 The Complexity of Biotic Interactions ............... 284
17.5 Coastal Zone Management: Can Animals be Integrated? .... 290
References .............................................. 293

18 Coastal Vegetation as Indicators for Conservation ...... 297
I. Espejel, B. Ahumada, Y. Cruz, and A. Heredia

18.1 Introduction ....................................... 297
18.1.1 Environmental Indicators ......................... 297
18.1.2 Ecological Indicators ............................ 298
18.2 Methods .......................................... 301
18.2.1 Ecological Indicators Selection ................... 301
18.2.2 Calculation of Ecological Indicators .............. 304
18.3 Results .......................................... 306
18.3.1 Environmental Indicators for the Region (Landscape-Scale Indicators) ..................... 306
18.3.2 Ecological Indicators for Coastal Dunes (Plant-Community Scale) ..................... 306
18.4 Discussion and Conclusion ........................... 309
### 19 A Case Study of Conservation and Management of Tropical Sand Dune Systems: La Mancha-El Llano

P. MORENO-CASASOLA

19.1 Introduction

19.2 Dune Conservation and Management

19.3 Beach and Dune Biodiversity and Protected Areas in Mexico

19.4 Community Management for the Conservation of Coastal Resources: La Mancha-El Llano Case Study

References

### 20 European Coastal Dunes: Ecological Values, Threats, Opportunities and Policy Development

P. HESLENFELD, P.D. JUNGERIUS, and J.A. KLIJN

20.1 Introduction

20.2 Distribution of Coastal Dunes along Europe’s Coast: A Short Geography

20.3 Ecological Values Related to Biodiversity

20.4 Trends, Threats and Opportunities

20.4.1 Agriculture: Intensification as well as Marginalization

20.4.2 Urbanisation, Industries, Harbour Development

20.4.3 Infrastructure

20.4.4 Tourism/Recreation

20.4.5 Forestry

20.4.6 Coastal Processes, Climate Change and Sea Level Rise, Aeolian Processes

20.4.7 Coastal Defence Works

20.5 Policy Analysis of Dune Conservation in Europe

20.5.1 Bern Convention

20.5.2 EU Policy

20.5.3 National Policies

20.6 SWOT Analysis

20.7 Conclusions

20.7.1 EU Countries

20.7.2 Accession Countries

20.7.3 Non-EU Countries
VI The Coastal Dune Paradox: Conservation vs Exploitation?

21 The Fragility and Conservation of the World’s Coastal Dunes: Geomorphological, Ecological and Socioeconomic Perspectives

M.L. Martínez, M.A. Maun, and N.P. Psuty

21.1 Current Worldwide Status of Coastal Dunes
21.2 Current Research Trends (What Do We Know?)
21.2.1 Variable Morphologies
21.2.2 Succession
21.2.3 Adaptations
21.2.4 Tropical vs. Mid-Latitudes
21.3 Fragile Ecosystems?
21.4 Management Practices
21.5 Future Trends and Perspectives
