Table of Contents

Invited Presentations

Voronoi-Based Systems of Coordinates and Surface Reconstruction ....... 1
Jean-Daniel Boissonnat (INRIA, Unité de Sophia Antipolis)

Essentially Every Unimodular Matrix Defines an Expander ............ 2
Jin-Yi Cai (State University of New York at Buffalo, University of Wisconsin)

Algorithms and Data Structures (I)

Strategies for Hotlink Assignments .......................... 23
Prosenjit Bose, Evangelos Kranakis, Danny Krizanc (Carleton University), Jurek Czyzowicz, Andrzej Pelc (Univ. du Québec à Hull), Leszek Gąsieniec (University of Liverpool), and Miguel V. Martin (Carleton University)

A New Competitive Analysis of Randomized Caching .................. 35
Ching Law and Charles E. Leiserson (MIT Laboratory for Computer Science)

Online Routing in Convex Subdivisions .......................... 47
Prosenjit Bose, Pat Morin (Carleton University), Andrej Brodnik (University of Ljubljana), Svante Carlsson (University of Karlskona/Ronneby), Erik D. Demaine, Rudolf Fleischer, J. Ian Munro (University of Waterloo), and Alejandro López-Ortiz (University of New Brunswick)

Combinatorial Optimization

A Simple Linear-Time Approximation Algorithm for Multi-processor Job Scheduling on Four Processors ............................. 60
Jingui Huang, Jianer Chen, and Songqiao Chen (Central-South University)

Classification of Various Neighborhood Operations for the Nurse Scheduling Problem ............................. 72
Takayuki Osogami (IBM Research) and Hiroshi Imai (University of Tokyo)
### Table of Contents

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Optimal Bid Sequences for Multiple-Object Auctions with Unequal</td>
<td>84</td>
</tr>
<tr>
<td>Budgets</td>
<td></td>
</tr>
<tr>
<td>Yuyu Chen, Ming-Yang Kao (Yale University), and Hsueh-I. Lu</td>
<td></td>
</tr>
<tr>
<td>(Academia Sinica)</td>
<td></td>
</tr>
<tr>
<td><strong>Algorithms and Data Structures (II)</strong></td>
<td></td>
</tr>
<tr>
<td>Coping with Delays and Time-Outs in Binary Search Procedures</td>
<td>96</td>
</tr>
<tr>
<td>Ferdinando Cicalese and Ugo Vaccaro (Università di Salerno)</td>
<td></td>
</tr>
<tr>
<td>Some Formal Analysis of Rocchio's Similarity-Based Relevance Feedback</td>
<td>108</td>
</tr>
<tr>
<td>Algorithm</td>
<td></td>
</tr>
<tr>
<td>Zhixiang Chen (University of Texas-Pan American) and Binhai Zhu</td>
<td></td>
</tr>
<tr>
<td>(Montana State University)</td>
<td></td>
</tr>
<tr>
<td>Reasoning with Ordered Binary Decision Diagrams</td>
<td>120</td>
</tr>
<tr>
<td>Takashi Horiyama (Nara Institute of Science and Technology) and</td>
<td></td>
</tr>
<tr>
<td>Toshihide Ibaraki (Kyoto University)</td>
<td></td>
</tr>
<tr>
<td><strong>Approximation and Randomized Algorithms (I)</strong></td>
<td></td>
</tr>
<tr>
<td>On Approximating Minimum Vertex Cover for Graphs with Perfect</td>
<td>132</td>
</tr>
<tr>
<td>Matching</td>
<td></td>
</tr>
<tr>
<td>Jianer Chen and Iyad A. Kanj (Texas A&amp;M University)</td>
<td></td>
</tr>
<tr>
<td>A 2-Approximation Algorithm for Path Coloring on Trees of Rings</td>
<td>144</td>
</tr>
<tr>
<td>Xiaotie Deng, Yi Zhou (City University of Hong Kong), Guojun Li</td>
<td></td>
</tr>
<tr>
<td>(Shandong University), and Wenan Zang (The University of Hong Kong)</td>
<td></td>
</tr>
<tr>
<td>An Approximate Algorithm for the Weighted Hamiltonian Path</td>
<td>156</td>
</tr>
<tr>
<td>Completion Problem on a Tree</td>
<td></td>
</tr>
<tr>
<td>Q. S. Wu (National Tsing-Hua University), C. L. Lu (National Center</td>
<td></td>
</tr>
<tr>
<td>for High-Performance Computing), and R. C. T. Lee (National Chi-Nan</td>
<td></td>
</tr>
<tr>
<td>University)</td>
<td></td>
</tr>
<tr>
<td><strong>Algorithms and Data Structures (III)</strong></td>
<td></td>
</tr>
<tr>
<td>Finding Independent Spanning Trees in Partial k-Trees</td>
<td>168</td>
</tr>
<tr>
<td>Xiao Zhou and Takao Nishizeki (Tohoku University)</td>
<td></td>
</tr>
<tr>
<td>On Efficient Fixed Parameter Algorithms for Weighted Vertex Cover</td>
<td>180</td>
</tr>
<tr>
<td>Rolf Niedermeier (Universität Tübingen) and Peter Rossmanith</td>
<td></td>
</tr>
<tr>
<td>(Technische Universität München)</td>
<td></td>
</tr>

</table>
Constructive Linear Time Algorithms for Small Cutwidth and Carving-Width ................................................................. 192
  *Dimitros M. Thilikos, Maria J. Serna (Universitat Politècnica de Catalunya), and Hans L. Bodlaender (Utrecht University)*

**Approximation and Randomized Algorithms (II)**

Approximation Algorithms for the Maximum Power Consumption Problem on Combinatorial Circuits ........................................ 204
  *Takao Asano (Chuo University), Magnús M. Halldórsson (University of Iceland), Kazuo Iwama (Kyoto University), and Takeshi Matsuda (Kyoto University)*

A Simple and Quick Approximation Algorithm for Traveling Salesman Problem in the Plane .................................................. 216
  *Norihiro Kubo, Shinichi Shimazono (Kyushu Inst. of Tech.), and Katsuhiko Muramoto (Iwashita Engineering Inc.)*

Simple Algorithms for a Weighted Interval Selection Problem ............. 228
  *Thomas Erlebach (Computer Engineering and Networks Laboratory, ETH Zürich) and Frits C. R. Spieksma (Maastricht University)*

**Graph Drawing and Algorithms**

Efficient Minus and Signed Domination in Graphs .......................... 241
  *Chin L. Lu (National Center for High-Performance Computing), Sheng-Lung Peng (National Dong Hwa University), and Chuan Y. Tang (National Tsing Hua University)*

Convex Grid Drawings of Four-Connected Plane Graphs ...................... 254
  *Kazuyuki Miura, Takao Nishizeki (Tohoku University), and Shin-ichi Nakano (Gunma University)*

An Algorithm for Finding Three-Dimensional Symmetry in Series-Parallel Digraphs .......................................................... 266
  *Seok-Hee Hong and Peter Eades (University of Sydney)*

**Automata, Cryptography, and Complexity Theory**

Undecidability Results for Monoids with Linear-Time Decidable Word Problems ................................................................. 278
  *Masashi Katsura (Kyoto Sangyo University), Yuji Kobayashi (Toho University), and Friedrich Otto (Universität Kassel)*

Secret Key Exchange Using Random Deals of Cards on Hierarchical Structures ................................................................. 290
  *Reina Yoshikawa, Shimin Guo, Kazuhiro Motegi, and Yoshihide Igarashi (Gunma University)*
Derandomizing Arthur-Merlin Games under Uniform Assumptions ........ 302
Chi-Jen Lu (Academia Sinica)

Algorithms and Data Structures (IV)

A Near Optimal Algorithm for Vertex Connectivity Augmentation ....... 313
Bill Jackson (Goldsmiths College) and Tibor Jordán (Eötvös University)

Simultaneous Augmentation of Two Graphs to an \( \ell \)-Edge-Connected Graph and a Biconnected Graph ............................... 326
Toshimasa Ishii and Hiroshi Nagamochi (Toyohashi University of Technology)

Location Problems Based on Node-Connectivity and Edge-Connectivity between Nodes and Node-Subsets ............................................. 338
Hiro Ito, Yuichiro Itatsu, Hideyuki Uehara, Mitsuo Yokoyama
(Toyohashi University of Technology), and Motoyasu Ito (Hitachi, Ltd.)

Parallel and Distributed Algorithms

An Intuitive and Effective New Representation for Interconnection Network Structures .......................................................... 350
Jianer Chen, Lihua Liu, Songqiao Chen (Central-South University),
and Weijia Jia (City University of Hong Kong)

Randomized Leader Election Protocols in Radio Networks with no Collision Detection ......................................................... 362
Koji Nakano (Nagoya Institute of Technology) and Stephan Olariu (Old Dominion University)

Deterministic Broadcasting Time with Partial Knowledge of the Network 374
Gianluca De Marco (Università di Salerno) and Andrzei Pelc
(Université du Québec à Hull)

Algorithms and Data Structures (V)

Minimizing Makespan in Batch Machine Scheduling .................. 386
Chung K. Poon (City University of Hong Kong) and Pizing Zhang
(Fudan University)

Preemptive Parallel Task Scheduling in \( O(n) + \text{Poly}(m) \) Time ............. 398
Klaus Jansen (University of Kiel) and Lorant Porkolab (Imperial College)

Compressed Text Databases with Efficient Query Algorithms Based on the Compressed Suffix Array ............................................. 410
Kunihiko Sadakane (Tohoku University)
## Computational Geometry (I)

A Better Lower Bound for Two-Circle Point Labeling .......................... 422  
Alexandra Wolff, Michael Thon (Ernst Moritz Arndt University),  
and Yinfeng Xu (Xi'an Jiaotong University)

Voronoi Diagram of a Circle Set Constructed from Voronoi Diagram of a  
Point Set  ......................................................... 432  
Deok-So Kim, Donguk Kim (Hanyang University), and  
Kokichi Sugihara (University of Tokyo)

An Improved Algorithm for Subdivision Traversal without Extra Storage... 444  
Prosenjit Bose and Pat Morin (Carleton University)

## Algorithms and Data Structures (VI)

Generalized H-Coloring of Graphs  ........................................... 456  
Petter Kristiansen and Jan A. Telle (University of Bergen)

Finding a Two-Core of a Tree in Linear Time  .............................. 467  
Biing-Feng Wang and Jyh-Jye Lin (National Tsing Hua University)

Unbalanced and Hierarchical Bipartite Matchings with Applications to  
Labeled Tree Comparison  .............................................. 479  
Ming-Yang Kao (Yale University), Tak-Wah Lam, Wing-Kin Sung, and  
Hing-Fung Ting (University of Hong Kong)

## Computational Geometry (II)

Optimal Beam Penetrations in Two and Three Dimensions ................. 491  
Danny Z. Chen, Xiaobo S. Hu (University of Notre Dame), and  
Jinhui Xu (State University of New York at Buffalo)

Searching a Simple Polygon by a k-Searcher  .............................. 503  
Xuehou Tan (Tokai University)

Characterization of Rooms Searchable by Two Guards ....................... 515  
Sang-Min Park, Kyung-Yong Chwa (Korea Advanced Institute of Science  
& Technology), and Jae-Ha Lee (Max-Planck-Institut für Informatik)

## Computational Biology

Improved Phylogeny Comparisons: Non-shared Edges, Nearest Neighbor  
Interchanges, and Subtree Transfers ....................................... 527  
Wing-Kai Hon, Tak-Wah Lam (The University of Hong Kong), and  
Ming-Yang Kao (Yale University)

Phylogenetic k-Root and Steiner k-Root ..................................... 539  
Guo-Hui Lin, Tao Jiang (University of Waterloo, McMaster  
University), and Paul E. Kearney (University of Waterloo)
Computational Geometry (III)

Maintenance of a Piercing Set for Intervals with Applications ............ 552
  Matthew J. Katz (Ben-Gurion University of the Negev),
  Frank Nielsen (SONY Computer Science Laboratories Inc.), and
  Michael Segal (University of British Columbia)

Optimal Polygon Cover Problems and Applications ....................... 564
  Danny Z. Chen, Xiaobo S. Hu, and Xiaodong Wu (University of Notre
  Dame)

Author Index ........................................................................ 577
Algorithms and Computation
Lee, D.T.; Teng, S.-H. (Eds.)
2000, XIV, 582 p., Softcover
ISBN: 978-3-540-41255-7
