# Table of Contents

1. Group IV Catalysts and Cocatalysts ........................................... 1

UV/VIS Studies on the Activation of Zirconocene-Based
Olefin-Polymerization Catalysts
*U. Wieser, H.-H. Brintzinger* .................................................. 3

Activation of Siloxy-Substituted Compounds and Homopolymerisation
of Ethylene by Different Soluble Alumoxane Cocatalysts
*K. Kallio, J. Kauhanen* .......................................................... 14

Methylaluminoxane as a Cocatalyst for Olefin Polymerization. Structure,
Reactivity and Cocatalytic Effect
*E. Rytter, M. Ystenes, J. L. Eilertsen, M. Ott, J. A. Stvneng, J. Liu* ................. 23

Olefin Polymerization under High-pressure: Formation of Super-high
Molecular Weight Polyolefins
*N. Suzuki, Y. Masubuchi, C. Takayama, Y. Yamaguchi, T. Kase,
T. K. Miyamoto, A. Horiuchi, T. Mise* ........................................ 37

Higher-Order Kinetics in Propene Polymerisations by Zirconocene
Catalysts. Analysis of Alternative Reaction Mechanisms *via* a Genetic
Algorithm
*F. Schaper, H.-H. Brintzinger* ............................................. 46

Structures of MAO: Experimental Data and Molecular Models According
to DFT Quantum-Chemical Simulations
*V.A. Zakharov, I.I. Zakharov, V.N. Panchenko* ............................... 63

A DFT Study of Ethylene Polymerization by Zirconocene-Boron Catalytic
Systems
*I. E. Nifant'ev, L. Y. Ustynyuk, D. N. Laikov* ................................ 72

Activation Reactions of Cp₂ZrCl₂ and Cp₂ZrMe₂ with Aluminium Alkyl
Type Cocatalysts Studied by *in situ* FTIR Spectroscopy
*J. L. Eilertsen, E. Rytter, M. Ystenes* ...................................... 86

Elementary Steps of Ziegler-Natta Catalyst Intermediates Formation.
Incorporation of Magnesium Alkoxydes with [Ti(dipp)₄], Ph₅SiOH,
[Al(CH₃)₃], and MCl₃₄ (M = V, Zr)
S. Szafert, J. Utko, J. Ejfler, L. Jerzykiewicz, P. Sobota 240

4. Polymerization Mechanisms, Catalyst Structure and Polymer Structure
   Relationships 251

Mechanistic Aspects of Olefin Polymerization with Metallocene Catalysts:
Evidence from NMR Investigations
I. Tritto, M.C. Sacchi, P. Locatelli, F. Forlini 253

Syndiotactic Specific Structures, Symmetry Considerations, Mechanistic
Aspects
A. Razavi, D. Baekelmans, V. Bellia, Y. De Brauwer, K. Hortmann,
M. Lambrecht, O. Miserque, L. Peters, M. Sławinski, S. Van Belle 267

The Particularities of Isospecific Polypropylene Synthesis in Bulk
with Ansa-Metallocene Catalysts
P.M. Nedorezova, V.I. Tsvetkova, A.M. Aladyshew, D.V. Savinov,
D.A. Lemenovskii 280

Ethene Polymerization Catalyzed by Monoalkyl and Methyl Substituted
Zirconocenes. Possible Effects of Reaction Barriers and Ligand-Metal
Agostic Interactions
K. Thorhaug, J.A. Støvnen, H. Wigum, E. Rytter 289

A Density Functional Theroy Study of the Syndiotactic-Specific
Polymerization of Styrene
L. Cavallo, G. Minieri, P. Corradini, A. Zambelli, G. Guerra 299

Influence of Ligands on the Deactivation of Group IV Metallocene
Catalysts in the High-Temperature Polymerization of Ethene
A. Rau, T. Wieczorek, G. Luft 307

5. Polymerization, Co-Polymerization, Non-Traditional Monomers
   and Polymer Characterization 315

Correlations Between Chain Branching, Morphology Development
and Properties of Polyethenes
P. Walter, J. Heinemann, H. Ebeling, D. Mäder, S. Trinkle, R. Mühlaupt 317

Heterogenized Bifunctional Catalysts in Olefin Polymerization
E. Mushina, Y. Podolsky, V. Frolov 327

Long-Chain Branched Polyethene via Metallocene-Catalysis: Comparison
of Catalysts
E. Kokko, P. Lehmus, A. Malmberg, B. Löfgren, J. V. Seppälä 335
New Half-Sandwich Titanocenes for the Polymerization of Butadiene  
W. Kaminsky, V. Scholz ........................................... 346

Metalloocene Catalyzed Copolymerization of Propene with Mono-  
and Diolefins  
M. Arnold, S. Bornemann, J. Knorr, T. Schimmel .................... 353

A Comparison of the Behavior of Nickel/MAO Catalytic Systems  
in the Polymerization of Styrene and 1,3-Cyclohexadiene  
R. Po, N. Cardi, M. A. Cardaci, R. Santi .......................... 365

6. Catalyst Heterogenization and Particle Microreactor Effects .... 375

Activity Limits of Heterogeneous Polymerization Catalysts  
T.R. McKenna, R. Spitz ........................................... 377

Reversibly Crosslinked Polystyrene as a Support for Metallocenes Part I:  
Covalently Bonded Metaallocenes and Functionalized Supports  
M. Klapper, M. Koch, M. Stork, N. Nenov, K. Müllen ................ 387

Reversibly Crosslinked Polystyrene as a Support for Metallocenes Part II:  
Non-Covalent Bonding for the Immobilization  
M. Koch, M. Klapper, K. Müllen .................................. 396

An Intrinsic Defect of Slow Monomer Diffusion Theroy for Explaining  
Broad MWDs  
T. Keii ................................................................... 404

Prepolymerization and Copolymerization Studies Using Homogeneous  
and Silica-supported Cp₂ZrCl₂/MAO Catalyst Systems  
P.J.T. Tait, J.A.M. Awudza ......................................... 414

Unique Flowability Behavior of Ethylene Copolymers Produced  
by a Catalyst System Comprising Ethylenebis(indenyl)hafnium Dichloride  
and Aluminoxane  
J.-I. Imuta, T. Tsutsui, K. Yoshitugu, T. Matsugi, N. Kashiwa .... 427

Diffusion Measurements in Porous Polymer Particles  
J.G. Seland, B. Hafskjold ........................................... 434
Organometallic Catalysts and Olefin Polymerization
Catalysts for a New Millennium
Blom, R.; Follostad, A.; Rytter, E.; Tilset, M.; Ystenes, M. (Eds.)
2001, XII, 443 p., Hardcover
ISBN: 978-3-540-41402-5
