1	The Rise and Rise of Food and Nutritional Supplements – an Overview of the Market	
	<i>Joan K. Ransley</i>	1
1.1	Introduction	1
1.2	The Products	1
1.3	What are People Taking?	2
1.3.1	Cod Liver Oil	2
1.3.2	Multivitamins	3
1.3.3	Single Vitamins	3
1.3.4	Evening Primrose Oil	3
1.3.5	Minerals	4
1.3.6	Garlic Products	4
1.3.7	Functional Foods	4
1.4	Growth Across Western Europe	5
1.5	Who Manufactures Vitamin, Mineral and Dietary Supplements?	6
1.6	Retail Distribution of Vitamins, Minerals and Dietary Supplements	6
1.7	What is Driving the Growth in this Market?	7
1.7.1	Age and Lifestyle Trends Spin the Market	8
1.7.2	The Trend Towards Self-Medication	9
1.7.2.1	Concerns About Illness Drive Demand	9
1.7.2.2	Changes in the Pharmacy	10
1.7.2.3	Changes in Primary Health Care	10
1.8	Do Supplement Users Need to Take Supplements?	11
1.9	Regulating the Market	12
1.10	The Future for Vitamins, Minerals and Dietary Supplements . . .	14
1.11	Conclusion	15
1.12	References	15

2	Why do Health Professionals Need to Know More About Nutrition? <i>Matthew E. Joynson</i>	17
2.1	Introduction	17
2.1.1	The Implication of Diet in Disease	17
2.2	Our Hunger for Knowledge	18
2.3	Health Professionals: the Authorative Source of Nutrition Information?	19
2.4	Nutrition: the Orphan Discipline	21
2.5	What are the Obstacles to Giving Nutrition Advice?	22
2.6	The Updated Role of Health Professionals: a New Approach	23
2.6.1	Tailored Dietary Advice	23
2.6.2	Different People, Different Dietary Needs	24
2.6.3	Drug-Nutrient Interactions	25
2.6.4	The Impact of Diet in Health Economics	25
2.7	Conclusion	26
2.8	References	27
3	Nutrient Requirements in Health and Disease <i>Judith K. Donnelly</i>	29
3.1	Introduction	29
3.2	What Nutrients are Needed, and How Much?	29
3.3	Dietary Reference Values	30
3.4	Meeting the Targets	30
3.5	Pregnancy and Lactation – Life-Long Health Implications of Nutrition	32
3.6	The Weaning Process	35
3.7	Childhood	36
3.8	Younger Schoolchildren	38
3.9	Adolescence	38
3.10	Adulthood	39
3.11	Older Years	40
3.12	Conclusion	42
3.13	References	43
4	Placebo and Panacea: The Healing Effect of Nutritional Supplements <i>Nicholas W. Read</i>	45
4.1	Why Do So Many People Feel Unwell	47

4.2	The Placebo or Healing Effect	51
4.3	Who Responds to Placebo Medication	56
4.4	Nutritional Supplements as Placebos	57
4.5	The Ethics of Prescribing or Marketing Placebos as Nutritional Supplements	59
4.6	References	62
5	Antioxidants, Nutrition and Health	
	<i>Anthony Diplock</i>	65
5.1	Introduction	65
5.2	Involvement of Free Radicals in Degenerative Disease and Modulation by Antioxidants	65
5.3	Cancer Aetiology	66
5.4	Cardiovascular Disease Aetiology	68
5.5	Reduction of Disease Risk by Antioxidant Nutrients	70
5.6	Cancer	70
5.7	Cardiovascular Disease	73
5.8	References	77
6	Nutritional and Non-Nutritional Uses of Vitamin B₆	
	<i>David A. Bender</i>	81
6.1	Introduction	81
6.2	Metabolism and Metabolic Functions of Vitamin B ₆	82
6.3	Requirements and Reference Nutrient Intakes	84
6.4	Potential Benefits of Higher Levels of Intake: Homocysteine Metabolism	85
6.5	Pharmacological Uses of Vitamin B ₆	86
6.5.1	Side-Effects of Oral Contraceptives	88
6.5.2	Impaired Glucose Tolerance and Diabetes Mellitus	89
6.5.3	Depression	90
6.5.4	The Premenstrual Syndrome	91
6.5.5	Morning Sickness	92
6.5.6	Carpal Tunnel Syndrome	92
6.5.7	Hypertension	93
6.6	Drug Interactions with Vitamin B ₆	94
6.7	Toxicity of Vitamin B ₆	95
6.8	References	96

7	Folic Acid and Disease Prevention: A Long Day's Journey Into Light	
	<i>Christopher Schorah</i>	101
7.1	Introduction	101
7.2	Folate Prevention of Neural Tube Defects	101
7.3	Other Congenital Malformations and Folate	104
7.4	Folate, Homocysteine and Occlusive Vascular Disease	104
7.5	Folate Requirements and Provision	105
7.6	Changed Diet	106
7.7	Supplements	106
7.8	Food Fortification	107
7.9	Conclusions	108
7.10	References	108
8	The Addition of Micronutrients to Food	
	<i>H. Frank Woods</i>	111
8.1	Introduction	111
8.2	The Historical Background	111
8.3	Some Definitions	113
8.4	The Rationale for the Addition of Nutrients to Food	114
8.5	Policy Considerations	114
8.6	Legislative Aspects of Micronutrients Addition to Food	116
8.7	The Efficacy of the Addition of Micronutrients to Food	117
8.8	References	118
9	Probiotics and Prebiotics in Health	
	<i>Colette Shortt, Seppo Salminen, and Marcel Roberfroid</i>	119
9.1	Introduction	119
9.2	Probiotic Bacteria in Human Health: An Overview	
	<i>Colette Shortt and Seppo Salminen</i>	120
9.2.1	Introduction	120
9.2.2	Probiotics and Dietary Modulation	120
9.2.3	Concept of Probiotic Bacteria	122
9.2.4	Selection of Probiotic Strains	123
9.2.5	Conclusion	127
9.3	Prebiotics in Human Health: An Overview	
	<i>Marcel Roberfroid</i>	128
9.3.1	Introduction	128

9.3.2 The Prebiotics 128

9.3.3 Malabsorption of the Non-Digestible Oligosaccharides 130

9.3.4 Fermentation in the Large Bowel: The Prebiotic Effect 131

9.3.5 Physiological Effects in the Gastro-Intestinal Tract 132

9.3.6 Prebiotics and the Risk of Colon Cancer 133

9.3.7 Conclusion: Prebiotics, What Benefit(s) for Human Health? 134

9.3.8 Conclusions 135

9.4 References 136

10 Phytoestrogens and Health

Janet Cade, Victoria Burley, and Sara Kirk 141

10.1 Introduction 141

10.1.1 Phytoestrogens – What are They and Where do we Find Them? . 141

10.1.2 Isoflavones 142

10.1.3 Coumestans 143

10.1.4 Lignans 143

10.2 Dietary Intake 143

10.2.1 Baby Foods 144

10.2.2 Key Points 145

10.2.3 Effects on Health 146

10.3 Heart Disease 146

10.3.1 Phytoestrogens May Reduce Blood Cholesterol Levels 146

10.3.2 Other Possible Effects of Phytoestrogens on CHD Risk 147

10.3.3 Key Points 147

10.4 Cancer 147

10.4.1 General Effects of Phytoestrogens 147

10.4.2 Breast Cancer 148

10.4.3 Prostate Cancer 149

10.4.4 Other Cancers 149

10.4.5 Key Points 150

10.5 Osteoporosis 150

10.6 Key points 151

10.7 Menopausal Symptoms 151

10.7.1 Key Points 152

10.8 Potential Adverse Effects 152

10.9 Conclusions and Recommendations 153

10.10 References 153

11 Dietary Supplements and their Role in the Prevention and Treatment of Coronary Heart Disease

Peter Jackson, Lawrence Ramsay, and Erica Wallis 157

11.1 Introduction 157

11.2	Evidence	158
11.3	Early Attempts at Dietary Modification to Prevent CHD	159
11.4	The Diet Trials	160
11.4.1	Fish	161
11.4.2	Nuts	162
11.4.3	Fibre	163
11.5	Homocysteine	164
11.6	Antioxidants	165
11.6.1	Vitamin C	166
11.6.2	β -carotene	166
11.6.3	Vitamin E	167
11.7	Alcohol	169
11.8	Plant Sterols and Stanols	169
11.9	Conclusion	170
11.10	References	171
12	The Scientific Basis for Fish Oil Supplementation in Rheumatoid Arthritis	
	<i>Philip Calder</i>	175
12.1	Introduction	175
12.2	Fatty Acids in the Human Diet	175
12.3	The Immune System	180
12.3.1	What is the Immune System and How Does it Work?	180
12.3.2	Communication Within the Immune System: Cytokines	182
12.3.3	Inflammation	183
12.3.4	Integration of the Immune Response	185
12.3.5	The Immune System in Health and Disease	186
12.4	Rheumatoid Arthritis	187
12.5	Eicosanoids: The Link Between Fatty Acids and the Immune System	188
12.5.1	Eicosanoid Synthesis	188
12.5.2	Roles for Eicosanoids in Inflammation and Immunity	189
12.5.3	Eicosanoids and RA	189
12.5.4	Fish Oil and Eicosanoids	190
12.6	Effects of Fish Oil on Immune Function	190
12.7	Fish Oil Intervention in Rheumatoid Arthritis	192
12.8	Conclusions and Comments	194
12.9	References	195
