

Contents

Executive Summary	1
1 Lenses and Mirrors for Solar Energy	3
1.1 Photovoltaic or Thermal Concentration?	3
1.2 Classification of Solar Concentrators	7
2 Nonimaging Optics	15
2.1 Nonimaging Concentration	15
2.2 Generalized Ideal Concentration	22
2.3 Lagrange Invariant	26
2.4 Nonimaging Mirrors	28
3 Fresnel Lens Optics	35
3.1 Reflection and Refraction	35
3.2 Total Internal Reflection	39
3.3 Deviation	41
3.4 Refractive Indices	44
3.5 Minimum Dispersion	50
4 Earlier Fresnel Lenses	53
4.1 History of Fresnel Lenses	53
4.2 Recent Developments	58
4.3 Simple Fresnel Lenses	66
4.4 Domed or Arched Fresnel Lenses	72
5 Nonimaging Fresnel Lens Design	77
5.1 Applied Nonimaging Lens Design	77
5.2 The Optimum Linear Lens	79
5.3 Rotational Symmetry	92
5.4 Arbitrary Shapes	93
5.5 Diverger Lens for Lighting	97

6	Lens Evaluation	101
6.1	Losses	101
6.2	Transmittance	104
6.3	Geometrical Losses	106
6.4	Concentration Ratios	113
6.5	Nonideal Concentration	119
7	Optimization of Stationary Concentrators	127
7.1	Choice of Stationary Collector	127
7.2	Solar Radiation Model	129
7.3	Radiation on a Tilted Plane	136
7.4	Acceptance by a Solar Concentrator	139
7.5	Compound Parabolic Concentrators	142
7.6	Quasi-3D Concentrators	149
8	Prototype Design, Manufacturing, and Testing	155
8.1	Prototypes of Choice	155
8.2	Prism Size	159
8.3	Lens Redesign	161
8.4	Lens Manufacturing	166
8.5	Sample	170
8.6	Preliminary Tests	171
8.7	Partial Absorber Illumination	173
8.8	Tracking	175
9	Concentrated Sunlight and Photovoltaic Conversion	179
9.1	Flux Density	179
9.2	Solar Disk Size and Brightness	185
9.3	Spectral Color Dispersion	187
9.4	Concentrator Cells	192
9.5	Multijunction Devices	195
9.6	Photovoltaic System Performance	208
9.7	Concentration and Cost	211
10	Solar Thermal Concentrator Systems	217
10.1	Solar Resources	217
10.2	Solar Sorption Air Conditioning	222
10.3	Energy and Exergy	229
10.4	Exergy of a Concentrating Collector	236

11 Solar Concentration in Space	245
11.1 Space Concentrator Arrays	245
11.2 Design Challenges in Space	251
11.3 Lenses and Mirrors!	255
References	257
Index	269
