# Table of Contents

**Invited Paper**

Physical Programming: Beyond Mere Logic (Invited Talk) .................. 1  
*Bran Selic (Rational Software Inc., Canada)*

**Metamodelling**

Metamodelling and Conformance Checking with PVS ....................... 2  
*Richard F. Paige, Jonathan S. Ostroff (York University, Toronto)*

The Metamodelling Language Calculus: Foundation Semantics for UML ... 17  
*Tony Clark (King’s College London), Andy Evans (University of York),  
Stuart Kent (University of Kent at Canterbury)*

**Distributed Components**

Compositional Checking of Communication among Observers ............... 32  
*Ralf Pinger, Hans-Dieter Ehrich (Technische Universität Braunschweig)*

Combining Independent Specifications ...................................... 45  
*Joy N. Reed (Oxford Brookes University), Jane E. Sinclair  
(University of Warwick)*

Proving Deadlock Freedom in Component-Based Programming ............. 60  
*Paola Inverardi (Università dell’ Aquila), Sebastian Uchitel  
(Imperial College)*

**UML**

A Real-Time Execution Semantics for UML Activity Diagrams ............ 76  
*Rik Eshuis, Roel Wieringa (University of Twente)*

A CSP View on UML-RT Structure Diagrams ............................... 91  
*Clemens Fischer, Ernst-Rüdiger Olderog, Heike Wehrheim  
(University of Oldenburg)*

Strengthening UML Collaboration Diagrams by State Transformations ... 109  
*Reiko Heckel, Stefan Sauer (University of Paderborn)*

Specification of Mixed Systems in Korrigan with the Support of a  
UML-Inspired Graphical Notation ........................................ 124  
*Christine Choppy (Université Paris XIII), Pascal Poizat,  
Jean-Claude Royer (Université de Nantes)*
XII Table of Contents

On Use Cases and Their Relationships in the Unified Modelling-Language . 140
   Perdita Stevens (University of Edinburgh)

On the Importance of Inter-scenario Relationships in Hierarchical State Machine Design .................................................. 156
   Francis Bordeleau, Jean-Pierre Corriveau
   (Carleton University, Ottawa)

Towards a Rigorous Semantics of UML Supporting Its Multiview Approach .................................................. 171
   Gianna Reggio, Maura Cerioli, Egidio Astesiano
   (Università di Genova)

Towards Development of Secure Systems Using UMLsec ................. 187
   Jan Jürjens (University of Oxford)

Testing

Grammar Testing ................................................................. 201
   Ralf Lämmel (CWI Amsterdam)

Debugging via Run-Time Type Checking ........................................ 217
   Alexey Loginov, Suan Hsi Yong, Susan Horwitz, Thomas Reps
   (University of Wisconsin-Madison)

Library-Based Design and Consistency Checking of System-Level Industrial Test Cases .................................................. 233
   Oliver Niese (METAFrame Technologies, Dortmund),
   Bernhard Steffen (University of Dortmund), Tiziana Margaria (METAFrame Technologies, Dortmund), Andreas Hagerer (METAFrame Technologies, Dortmund), Georg Brune, Hans-Dieter Ide (Siemens, Witten)

Demonstration of an Automated Integrated Testing Environment for CTI Systems .................................................. 249
   Oliver Niese, Markus Nagelmann, Andreas Hagerer (METAFrame Technologies, Dortmund), Klaus Kolodziejczyk-Strunck (HeraKom, Essen), Werner Goerigk, Andrei Erochok, Bernhard Hammelmann (Siemens, Witten)

Formal Methods

Semantics of Architectural Specifications in CASL ............................ 253
   Lutz Schröder, Till Mossakowski (Bremen University), Andrzej Tarlecki (Warsaw University), Bartek Klin (BRICS, Aarhus), Piotr Hoffman (Warsaw University)
