

CONTENTS

	Page
Chapter 1 Contributions of Prof. Satofuka to Computational Fluid Dynamics	1
Chapter 2 Cartesian Grid and Grid Adaptation	15
H. Nishida: Cartesian Grid Approach with Virtual Boundary Method and Its Applications	17
A. Dervieux, D. Leservoisier, B. Palmerio, Y. Coudière: Isotropic and Anisotropic Adaptive Meshes: Models and Convergence Properties	33
Chapter 3 Gridless Method	41
K. Morinishi: Gridless Type Solver - Generalized Finite Difference Method -	43
Chapter 4 High Order and New Schemes	59
A. Lerat, C. Corre, G. Hanss: Residual-Based Compactness versus Directionality for High-Order Compressible Flow Calculations	61
H.C. Yee, B. Sjögren, N.D. Sandham, A. Hadjadj: Progress in the Development of a Class of Efficient Low Dissipative High Order Shock-Capturing Methods	77
P. De Palma, G. Pascazio, M. Napolitano: A Second-Order-Accurate Fluctuation Splitting Scheme for Unsteady Hyperbolic Problems	103
D. Hänel, O. Filippova: Lattice-Boltzmann Methods - A New Tool in CFD -	117

CONTENTS (continued)

	Page
Chapter 5 Optimization Techniques	133
A. Jameson, L. Martinelli, J. Alonso, J. Vassberg, J. Reuther: Perspectives on Simulation Based Aerodynamics Design	135
W. Haase, V. Maigret, M. Stettner: Multi-Objective Aerodynamic and Aeroelastic Optimization	179
W. Jiangfeng, J. Periaux: Genetic Algorithms and Game Theory for High Lift Multi-Airfoil Design Problems in Aerodynamics	192
Chapter 6 Parallel Computations	209
A. Ecer, N. Gopalaswamy, I. Tarkan: Parallel Computation of Flow Problems Using Explicit Schemes	211
Z.N. Wu, H. Zou: Parallel Computation of Compressible Flows for Implicit Schemes Without Sub-Iteration and Modification of the Implicit Solver	222
Chapter 7 Incompressible Flows	239
H. Dwyer: Some Influences of Geometry, Shear and Walls on 3D Flows at Intermediate Reynolds Numbers	241
J.J. Chattot: Least-Squares Method for Laminar Flow Problems	250
M. Hafez: On the Incompressible Limit of Compressible Fluid Flow	255
Chapter 8 Multi-Phase Flows and Solid/Fluid Interactions	273
H. Kawarada, E. Baba, H. Suito: Effects of Wave Breaking Action on Flows in Tidal-Flats	275
T. Tezduyar, Y. Osawa, K. Stein, R. Benney, V. Kumar, J. McCune: Computational Methods for Parachute Aerodynamics	290

CONTENTS (continued)

	Page
Chapter 9 Compressible Flows	307
K. Xu: Dissipative Mechanism in Godunov Method	309
D. D'Ambrosio, M. Pandolfi: Numerical Simulation of Shock Interactions	322
F. Grasso, S. Pirozzoli: Numerical Simulations of the Coupling Process of Compressible Vortices	336
Y. Nakamura, T. Furukawa: Numerical Simulation of Sound Emission from Supersonic Jet	350
Chapter 10 Magneto-Hydrodynamics	367
R. W. MacCormack: Numerical Computation in Magnetofluid Dynamics	369
R. K. Agarwal, A. Gupta: Numerical Investigation of Magneto-hydrodynamic Effects in Real Gas Flows	385
Chapter 11 Flow Visualization	401
K. Fujii: Real-Time Computation and Visualization on Mobile PC's	403

Computational Fluid Dynamics for the 21st Century
Proceedings of a Symposium Honoring Prof. Satofuka
on the Occasion of his 60th Birthday, Kyoto, Japan, July
15-17, 2000

Hafez, M.; Morinishi, K.; Périaux, J.

2001, XIX, 413 p., Hardcover

ISBN: 978-3-540-42053-8
