# Table of Contents

## Invited Opening Talk

Program Analysis for Implicit Computational Complexity

*Neil D. Jones*

## Contributed Papers

Deriving Pre-conditions for Array Bound Check Elimination

*Wei-Ngan Chin, Siau-Cheng Khoo, Dana N. Xu*

Type Systems for Useless-Variable Elimination

*Adam Fischbach, John Hannan*

Boolean Constraints for Binding-Time Analysis

*Kevin Glynn, Peter J. Stuckey, Martin Sulzmann, Harald Søndergaard*

Constraint Abstractions

*Jörgen Gustavsson, Josef Svenningsson*

Implementing Circularity Using Partial Evaluation

*Julia L. Lawall*

Combining Forward and Backward Analyses of Temporal Properties

*Damien Massé*

Numerical Power Analysis

*Isabella Mastroeni*

Run-Time Bytecode Specialization

*Hidehiko Masuhara, Akinori Yonezawa*

A New Numerical Abstract Domain Based on Difference-Bound Matrices

*Antoine Miné*

Partial Evaluation for Class-Based Object-Oriented Languages

*Ulrik P. Schultz*

Driving in the Jungle

*Jens Peter Secher*

Higher-Order Pattern Matching for Automatically Applying Fusion Transformations

*Ganesh Sittampalam, Oege de Moor*
Table of Contents

Dynamic Partial Evaluation ........................................ 238
  Gregory T. Sullivan

Tag Elimination and Jones-Optimality ............................. 257
  Walid Taha, Henning Makholm, John Hughes

Invited Closing Talk

Bottom-Up Deduction with Deletion and Priorities .............. 276
  Harald Ganzinger

Author Index ........................................................... 279
Programs as Data Objects
Danvy, O.; Filinski, A. (Eds.)
2001, X, 286 p., Softcover
ISBN: 978-3-540-42068-2
