Part I Ozone Depletion and UV Radiation in the Arctic

1 Recent Changes in Surface UV Radiation and Stratospheric Ozone at a High Arctic Site ............................... 1
   A. Dahlback

   1.1 Introduction .................................................. 3
   1.2 Atmospheric Ozone ......................................... 4
   1.2.1 Natural Variations ........................................ 4
   1.2.2 Long-Term Ozone Changes at High Latitudes .......... 6
   1.3 UV Radiation ................................................ 9
   1.3.1 Spectral Distribution and UV Controlling Factors ...... 9
   1.3.2 Arctic UV Radiation ...................................... 12
   1.3.3 UV Radiation Model ...................................... 19
   1.4 Summary ..................................................... 19
   References ....................................................... 20

2 Spectral Properties and UV Attenuation in Arctic Marine Waters .................................................. 23
   E. Aas, J. Høkedal, N.K. Højerslev, R. Sandvik, E. Sakshaug

   2.1 Introduction .................................................. 23
   2.2 Factors Determining the Vertical Attenuation of Irradiance in the Sea ................................................. 25
   2.2.1 Transmission of Irradiance Through the Surface of the Sea ......................................................... 25
   2.2.2 Vertical Attenuation Coefficient of Downward Irradiance ................................................. 26
   2.3 Spectral Properties of Marine Optical Components ................................................................. 27
   2.3.1 Pure Seawater ............................................. 27
   2.3.2 Yellow Substance .......................................... 28
   2.3.3 Phytoplankton and Associated Detritus .................. 31
   2.3.4 Minerogenic Particles ..................................... 33
   2.3.5 Sea Ice .................................................. 34
   2.4 Relations Between Spectral Vertical Attenuation Coefficients ................................................. 35
3 Spectral Properties and UV Attenuation in Arctic Freshwater Systems
J.B. Ørbæk, T. Svenøe, and D.O. Hessen

3.1 Introduction

3.2 Optical Properties of Arctic Lakes

3.3 UV Scenarios for Arctic Lakes

3.4 Summary

References

4 UV and the Optical Properties of Sea Ice and Snow
D.K. Perovich

4.1 Introduction

4.2 Sea Ice Structure and Morphology

4.3 Theory

4.4 Observations

4.5 Models

4.6 Summary

References

Part II UV Radiation and Arctic Terrestrial Systems

5 Effects of UV-B Radiation on Terrestrial Organisms and Ecosystems with Special Reference to the Arctic
L.O. Björn

5.1 Introduction

5.2 Terrestrial Arctic Conditions and UV-B Effects
