Contents

1 Evolutionary Algorithms 1
  1.1 Introduction .............................................. 1
  1.2 Genetic Algorithms ........................................ 2
  1.3 Theoretical Background of Genetic Algorithms .......... 10
  1.4 Introduction to Classifier Systems ...................... 15
  1.5 Genetic Programming ....................................... 18
  1.6 Evolution Strategies and Evolutionary Programming .... 22
  1.7 Advanced Topics .......................................... 27
  1.8 A Case Study: Portfolio Optimization .................... 39

2 Artificial Neural Networks 49
  2.1 Introduction ............................................. 49
  2.2 Artificial Neurons ....................................... 52
  2.3 Networks of Artificial Neurons .......................... 54
  2.4 Neural Learning ......................................... 58
  2.5 Supervised Learning ..................................... 59
  2.6 Unsupervised Learning ................................... 71
  2.7 Fault Tolerance ......................................... 79
  2.8 Artificial Neural Nets and Statistics .................... 80

3 Fuzzy Systems 83
  3.1 Introduction ............................................. 83
