VOLUME I

CONTENTS	3
PREFACE	7
P. BATEMAN, Some personal memories of Paul Erdős	9
N. G. DE BRUIJN, Remembering Paul Erdős	13
A. DVORETZKY, Paul Erdős — In memoriam	17
R. K. GUY, My thanks to Erdős Pál	21
G. HALÁSZ, Paul Erdős — Obituary	25
D. MAHARAM, Paul Erdős and finitely additive measures	27
R. RADO, Paul Erdős is 70	31
A. E. ROSS, Remembering Paul	35
A. H. STONE, Paul Erdős: Some unpublished anecdotes	39
E. G. STRAUS, Paul Erdős is 70	43
J. SURÁNYI, Remembering Pál Erdős	47
GY. SZEKERES, Farewell to Paul	51
P. TURÁN, Pál Erdős is fifty	55
V. T. SÓS, Turbulent years: Erdős in his correspondence with Turán	85
V. BERGELSON AND I. Z. RUZSA, Squarefree numbers, IP sets and ergodic theory	147
P. BORWEIN, Paul Erdős and polynomials	161
P. ELLIOTT, ‘Cast thy bread upon the waters...’ A personal view of the mathematician Paul Erdős	175
T. ERDÉLYI, Markov–Bernstein type inequalities for polynomials under Erdős type constraints	219
A. E. EREMENKO AND W. HAYMAN, On the length of lemniscates ..	241

G. FREIMAN, Structure theory of set addition II. Results and problems	243
H. FURSTENBERG, From the Erdős–Turán conjecture to ergodic theory — the contribution of combinatorial number theory to dynamics	261
K. GYŐRY, On the number of primitive solutions of Thue equations and Thue inequalities	279
H. HALBERSTAM, Erdős and Brun’s sieve	295
A. J. HILDEBRAND, Erdős’ problems on consecutive integers	305
A. IVIĆ, On certain large additive functions	319
J.-P. KAHANE, Almost surely everywhere	333
V. KOMORNIK, On expansions in non-integer bases	345
J. KUBILIUS, On the remainder term in the limit theorems for additive arithmetical functions	355
M. LACZKOVICH, The difference property	363
G. LAWLER, Cut times for Brownian motion and random walk	411
D. LUBINSKY, A taste of Erdős on interpolation	423
H. MAIER, Small gaps in sequences of sifted prime numbers	455
E. MANSTAVIČIUS, Functional limit theorems in probabilistic num- ber theory	465
R. D. MAULDIN, Some problems in set theory, analysis and geome- try	493
H. L. MONTGOMERY AND K. SOUNDARARAJAN, Beyond pair cor- relation	507
M. B. NATHANSON, On Erdős’s elementary method in the asymp- totic theory of partitions	515
P. NEY, On some work by Paul Erdős on an annihilating particle model	533
J.-L. NICOLAS, Statistical properties of partitions	537
W. PHILIPP, The profound impact of Paul Erdős on probability limit theory — a personal account	549
C. POMERANCE, Ruth–Aaron numbers revisited	567
Š. PORUBSKÝ AND J. SCHÖNHEIM, Covering systems of Paul Erdős Past, present and future	581
A. SCHINZEL, Erdős’s work on finite sums of unit fractions	629
B. SHEKHTMAN, On interpolation by and Banach spaces of polyno- mials	637

Y. G. SHI, A survey on Hermite interpolation of higher order 653
 V. TOTIK, Potential theoretical methods in approximation 687
 P. VÉRTESI, On the Lebesgue function and Lebesgue constant:
 A tribute to Paul Erdős 705

VOLUME II

CONTENTS 3
 PHOTOS 7

DISCRETE MATHEMATICS

A. ARHANGEL'SKIĬ, Some open problems on homogeneous compacta . 15
 J. BECK, The Erdős–Selfridge theorem in positional game theory 33
 B. BOLLOBÁS, The Erdős–Rényi theory of random graphs 79
 J. A. BONDY, Extremal problems of Paul Erdős on circuits in graphs 135
 W. BROWN AND M. SIMONOVITS, Extremal multigraph and di-
 graph problems 157
 P. J. CAMERON, Permutations 205
 GY. ELEKES, SUMS versus PRODUCTS in number theory, algebra
 and Erdős geometry 241
 R. FAUDREE AND R. H. SCHELP, A survey of results on the size
 Ramsey number 291
 M. FOREMAN, A partition theorem for successor cardinals 311
 A. S. FRAENKEL, R. J. SIMPSON AND M. S. PATERSON, On
 Abelian circular squares in binary words 329
 R. L. GRAHAM AND J. NEŠETŘIL, Ramsey theory and Paul Erdős
 (Recent results from a historical perspective) 339
 A. GYÁRFÁS, Erdős problems on irregularities of line sizes and point
 degrees 367
 S. JENDROL AND H.-J. VOSS, Light subgraphs of graphs embedded
 in 2-dimensional manifolds of Euler characteristic ≤ 0 :
 A survey 375
 A. KANAMORI AND D. PINCUS, Does GCH imply AC locally? 413
 J. A. LARSON, Erdős and ordinals 427
 R. LAVER, On very large cardinals 453

L. LOVÁSZ AND K. VESZTERGOMBI, Geometric representations of graphs	471
E. MAKAI, J. PACH AND J. SPENCER, New results on the distribution of distances determined by separated point sets	499
P. P. PÁLFY, On the density of the set of orders of certain groups ...	513
N. SAUER, Coloring finite substructures of countable structures	525
S. SHELAH, You can enter Cantor's paradise!	555
M. SIMONOVITS, Some of my favorite Erdős theorems and related results, theories	565
J. SPENCER, Random graphs, sets and tournaments	637
L. A. SZÉKELY, Erdős on unit distances and the Szemerédi–Trotter theorems	649
A. THOMASON, The simplest case of Ramsey's theorem	667
