Table of Contents

Cognitive Technology: Tool or Instrument? ............................... 1
   Barbara Gorayska (City University of Hong Kong), Jonathon P. Marsh
   (Higher Colleges of Technology, United Arab Emirates), Jacob L. Mey
   (University of Southern Denmark, Odense)

Design Spaces & Virtual Environments

Natural-Born Cyborgs? .......................................................... 17
   Andy Clark (University of Sussex, U.K.)

Designing Artifacts

Fact and Artifact: Reification and Drift in the History and Growth of
Interactive Software Systems ............................................. 25
   Martin Loomes, Chrystopher L. Nehaniv (University of Hertfordshire,
   U.K.)

Thinking Together in Concept Design for Future Products – Emergent
Features for Computer Support ............................................ 40
   Tuomo Tuikka, Kari Kuutti (University of Oulu, Finland)

The Space of Cognitive Technology: The Design Medium and Cognitive
Properties of Virtual Space ................................................ 55
   Frank Biocca (Michigan State University, U.S.A.)

Cognition in Robotic and Virtual Environments

Can Social Interaction Skills Be Taught by a Social Agent? The Role of a
Robotic Mediator in Autism Therapy ..................................... 57
   Iain Werry, Kerstin Dautenhahn, Bernard Ogden, William Harwin
   (University of Reading and University of Hertfordshire, U.K.)

The Cognitive Effects of Delayed Visual Feedback: Working Memory
Disruption While Driving in Virtual Environments .................... 75
   Philip N. Day, Patrik O’Brian Holt, George T. Russell (Heriot-Watt
   University, U.K.)

Embodiment, Perception, and Virtual Reality ........................ 83
   Melanie Chan (Leeds Metropolitan University, U.K.)
# Table of Contents

Freeing Machines from Cartesian Chains ........................................... 95  
  *I. René J. A. te Boekhorst (University of Zürich, Switzerland)*

**Presence in Virtual Environments**

The Relationship between the Arrangement of Participants and the Comfortableness of Conversation in HyperMirror .......................... 109  
  *Osamu Morikawa (AIST, Japan), Takanori Maesako (Osaka University, Japan)*

Mapping the Semantic Asymmetries of Virtual and Augmented Reality Space ................................................................. 117  
  *Frank Biocca, David Lamas, Ping Gai, Robert Brady (Michigan State University, U.S.A.)*

Presence and the Role of Activity Theory in Understanding: How Students Learn in Virtual Learning Environments ......................... 123  
  *Anne Jelfs (University College Northampton, U.K.), Denise Whitelock (Open University, U.K.)*

**Human Activity & Human Computing**

Experiment as an Instrument of Innovation: Experience and Embodied Thought [Invited Paper] ..................................................... 130  
  *David C. Gooding (University of Bath, U.K.)*

**Implications for Technology**

Can We Afford It? Issues in Designing Transparent Technologies ......... 141  
  *John Halloran (University of Sussex, U.K.)*

“The End of the (Dreyfus) Affair” (Post)Heideggerian Meditations on Man, Machine, and Meaning .............................................. 149  
  *Syed Mustafa Ali (The Open University, U.K.)*

New Visions of Old Models ............................................................... 157  
  *Igor Chimir (Institute of Information Technologies, Ukraine), Mark Horney (University of Oregon, U.S.A.)*

**Computing and People**

Victorian Data Processing – When Software Was People .................. 164  
  *Martin Campbell-Kelly (University of Warwick, U.K.)*

On the Meaning of Computer Programs ......................................... 165  
  *Josh Tenenberg (University of Washington, U.S.A.)*
# Table of Contents

**Sense from a Sea of Resources: Tools to Help People Piece Information Together**

_Aran Lunzer, Yuzuru Tanaka (Hokkaido University, Japan)_

---

**Education & Cognition**

Beyond the Algorithmic Mind

_Steve Talbott (The Nature Institute, U.S.A.)_  190

---

**Learning**

How Group Working Was Used to Provide a Constructive Computer-Based Learning Environment

_Trevor Barker (University of Hertfordshire, U.K.), Janet Barker (Home Office Training, U.K.)_  203

Neuro-Psycho-Computational Technology in Human Cognition under Bilingualism

_Lydia Derkach (Dnepropetrovsk National University, Ukraine)_  214

Digital Image Creation and Analysis as a Means to Examine Learning and Cognition

_Brad Hokanson (University of Minnesota, U.S.A.)_  226

---

**Narrative and Story-Telling**

Woven Stories as a Cognitive Tool

_Petri Gerdt, Piet Kommers, Chee-Kit Looi, Erkki Sutinen (University of Joensuu, Finland; University of Twente, The Netherlands; and National University of Singapore)_  233

The Narrative Intelligence Hypothesis: In Search of the Transactional Format of Narratives in Humans and Other Social Animals

_Kerstin Dautenhahn (University of Hertfordshire, U.K.)_  248

Building Rules

_Ronnie Goldstein (Open University, U.K.), Ivan Kalas (Comenius University, Slovakia), Richard Noss (University of London, U.K.), Dave Pratt (University of Warwick, U.K.)_  267

Virtual Mental Space: Interacting with the Characters of Works of Literature

_Boris Galitsky (iAskWeb, Inc., U.S.A.)_  282

---
Interfaces

The Plausibility Problem: An Initial Analysis 289
Benedict du Boulay, Rosemary Luckin (University of Sussex, U.K.)

Computer Interfaces: From Communication to Mind-Prosthesis Metaphor 301
Georgi Stojanov, Kire Stojanovski (SS Cyril and Methodius University, Macedonia)

Meaning and Relevance 311
Reinhard Riedl (University of Zurich, Switzerland)

Cognitive Dimensions

Cognitive Dimensions of Notations: Design Tools for Cognitive Technology 325

Maria S. Kutar, Chrystopher L. Nehaniv, Carol Britton, Sara Jones (University of Hertfordshire, U.K.)

Interactive Situation Models for Cognitive Aspects of User-Artefact Interaction 356
Meurig Beynon, Chris Roe, Ashley Ward, Allan Wong (University of Warwick, U.K.)

Society & Technology

Mediated Faces 373
Judith Donath (MIT Media Laboratory, U.S.A.)

Human Work and Communities

Corin Gurr, Gillian Hardstone (University of Edinburgh, U.K.)

Interdisciplinary Engineering of Interstate E-Government Solutions 405
Reinhard Riedl (University of Zurich, Switzerland)
Work, Workspace, and the Workspace Portal ........................................... 421
   Richard Brophy (Active Intranet, U.K.), Will Venters (University of Salford, U.K.)

Experimental Politics: Ways of Virtual Worldmaking ............................... 432
   Max Borders, Doug Bryan (Center for Strategic Technology Research, U.S.A.)

Human Identity in the Age of Software Agents ........................................ 442
   John Pickering (University of Warwick, U.K.)

Tracing for the Ideal Hunting Dog: Effects of Development and Use of Information System on Community Knowledge .......................... 452
   Anna-Liisa Syrjänen (University of Oulu, Finland)

Human-Technology Relationships

   Critique of Pure Technology ................................................................. 463
      Ho Mun Chan, Barbara Gorayska (City University of Hong Kong)

   The Computer as Instrument ............................................................... 476
      Meurig Beynon, Yih-Chang Ch‘en, Hsing-Wen Hseu, Soha Maad,
      Suwanna Rasmequan, Chris Roe, Jaratsri Rungruttanaubol, Steve Russ,
      Ashley Ward, Allan Wong (University of Warwick, U.K.)

   Computational Infrastructure for Experiments in Cognitive Leverage ........ 490
      Christopher Landauer, Kirstie L. Bellman
      (The Aerospace Corporation, U.S.A.)

Author Index .............................................................................................. 521
Cognitive Technology: Instruments of Mind
4th International Conference, CT 2001 Coventry, UK,
August 6-9, 2001 Proceedings
Beynon, M.; Nehaniv, C.L.; Dautenhahn, K. (Eds.)
2001, XV, 524 p., Softcover
ISBN: 978-3-540-42406-2
