

# Contents

<b>The theory of the nucleon-nucleon interaction</b> <i>Robert Vinh Mau</i> .....	1
<b>The atomic nucleus observed with electromagnetic probes</b> <i>Thomas William Donnelly</i> .....	39
<b>The nuclear shell model</b> <i>Alfredo Poves, Frederic Nowacki</i> .....	70
<b>The nuclear collective motion</b> <i>Witold Nazarewicz</i> .....	102
<b>The interacting boson model</b> <i>Francesco Iachello</i> .....	141
<b>The limits of the mean field</b> <i>Elvira Moya de Guerra</i> .....	155
<b>The microscopic treatment of the nuclear system</b> <i>Peter Ring</i> .....	195
<b>Semi-classical methods in nuclear physics</b> <i>David M. Brink</i> .....	233
<b>Scattering and reactions of halo nuclei</b> <i>Ronald C. Johnson</i> .....	259
<b>Nuclear physics away from the valley of stability</b> <i>Juha Aysto</i> .....	292
<b>Structure of vacuum and elementary matter: from superheavies via hypermatter to antimatter</b> <i>Walter Greiner</i> .....	316
<b>Index</b> .....	343
