# Table of Contents

## Invited Papers

The Complementary Brain ................................................................. 3  
*Stephen Grossberg*

Neural Networks for Adaptive Processing of Structured Data ............... 5  
*Alessandro Sperduti*

Bad Design and Good Performance: Strategies of the Visual System for Enhanced Scene Analysis ......................................................... 13  
*Florentin Wörgötter*

## Data Analysis and Pattern Recognition

Fast Curvature Matrix-Vector Products ............................................. 19  
*Nicol N. Schraudolph*

Architecture Selection in NLDA Networks ............................................ 27  
*José R. Dorronsoro, Ana M. González, and Carlos Santa Cruz*

Neural Learning Invariant to Network Size Changes .......................... 33  
*Vicente Ruiz de Angulo and Carme Torras*

Boosting Mixture Models for Semi-supervised Learning ....................... 41  
*Yves Grandvalet, Florence d’Alché-Buc, and Christophe Ambroise*

Bagging Can Stabilize without Reducing Variance ............................... 49  
*Yves Grandvalet*

Symbolic Prosody Modeling by Causal Retro-causal NNs with Variable Context Length ................................................................. 57  
*Achim F. Müller and Hans Georg Zimmermann*

Discriminative Dimensionality Reduction Based on Generalized LVQ .... 65  
*Atsushi Sato*

A Computational Intelligence Approach to Optimization with Unknown Objective Functions ................................................................. 73  
*Hirotaka Nakayama, Masao Arakawa, and Rie Sasaki*

Clustering Gene Expression Data by Mutual Information with Gene Function ................................................................. 81  
*Samuel Kaski, Janne Sinkkonen, and Janne Nikkilä*

</table>
Mixture of Probabilistic Factor Analysis Model and Its Applications...... 183
Masahiro Tanaka

Deferring the Learning for Better Generalization in Radial Basis Neural Networks ........................................ 189
José María Valls, Pedro Isasi, and Inés María Galván

Improvement of Cluster Detection and Labeling Neural Network by Introducing Elliptical Basis Function ...................... 196
Christophe Larette and Stéphane Lecoeuche

Independent Variable Group Analysis .............................................................. 203
Krista Lagus, Esa Alhoniemi, and Harri Valpola

Weight Quantization for Multi-layer Perceptrons Using Soft Weight Sharing ........................................ 211
Fatih Köksal, Ethem Alpaydın, and Günhan Dündar

Voting-Merging: An Ensemble Method for Clustering ................... 217
Evgenia Dimitriadou, Andreas Weingessel, and Kurt Hornik

The Application of Fuzzy ARTMAP in the Detection of Computer Network Attacks ........................................ 225
James Cannady and Raymond C. Garcia

Transductive Learning: Learning Iris Dataset with Two Labeled Data .... 231
Chun Hung Li and Pong Chi Yuen

Approximation of Time-Varying Functions with Local Regression Models . 237
Achim Lewandowski and Peter Protzel

**Theory**

Complexity of Learning for Networks of Spiking Neurons with Nonlinear Synaptic Interactions .......................... 247
Michael Schmitt

Product Unit Neural Networks with Constant Depth and Superlinear VC Dimension ........................................ 253
Michael Schmitt

Generalization Performances of Perceptrons ........................................ 259
Gérald Gavin

Bounds on the Generalization Ability of Bayesian Inference and Gibbs Algorithms ........................................ 265
Olivier Teytaud and Hélène Paugam-Moisy
# Table of Contents

**Learning Curves for Gaussian Processes Models:**
- Fluctuations and Universality .................................................. 271  
  Dörthe Malzahn and Manfred Opper

**Tight Bounds on Rates of Neural-Network Approximation** ......... 277  
  Věra Kůrková and Marcello Sanguineti

## Kernel Methods

- **Scalable Kernel Systems** .................................................. 285  
  Volker Tresp and Anton Schwaighofer

- **On-Line Learning Methods for Gaussian Processes** ............... 292  
  Shigeyuki Oba, Masa-aki Sato, and Shin Ishii

- **Online Approximations for Wind-Field Models** .................. 300  
  Lehel Csató, Dan Corndorf, and Manfred Opper

- **Fast Training of Support Vector Machines by Extracting Boundary Data** .... 308  
  Shigeo Abe and Takuya Inoue

- **Multiclass Classification with Pairwise Coupled Neural Networks** or Support Vector Machines ........................................... 314  
  Eddy Nicolas Mayoraz

- **Incremental Support Vector Machine Learning: A Local Approach** .... 322  
  Liva Ralaivola and Florence d’Alché-Buc

- **Learning to Predict the Leave-One-Out Error of Kernel Based Classifiers** .... 331  
  Koji Tsuda, Gunnar Rätsch, Sebastian Mika, and Klaus-Robert Müller

- **Sparse Kernel Regressors** .................................................. 339  
  Volker Roth

- **Learning on Graphs in the Game of Go** ............................ 347  
  Thore Graepel, Mike Goutrić, Marco Krüger, and Ralf Herbrich

- **Nonlinear Feature Extraction**
  - Using Generalized Canonical Correlation Analysis .................. 353  
    Thomas Melzer, Michael Reiter, and Horst Bischof

- **Gaussian Process Approach to Stochastic Spiking Neurons** with Reset .................................................. 361  
  Ken-ichi Amemori and Shin Ishii

- **Kernel Based Image Classification** ....................................... 369  
  Olivier Teuvao and David Sarrut

- **Gaussian Processes for Model Fusion** ................................... 376  
  Mohammed A. El-Beltagy and W. Andy Wright

</table>
Sequential Learning for SOM Associative Memory
with Map Reconstruction ........................................... 477
  Motonobu Hattori, Hiroya Arisumi, and Hiroshi Ito

Neighborhood Preservation in Nonlinear Projection Methods:
An Experimental Study ............................................. 485
  Jarkko Venna and Samuel Kaski

A Topological Hierarchical Clustering:
Application to Ocean Color Classification ..................... 492
  Méziane Yacoub, Fouad Badran, and Sylvie Thiria

Hierarchical Clustering of Document Archives
with the Growing Hierarchical Self-Organizing Map .......... 500
  Michael Dittenbach, Dieter Merkl, and Andreas Rauber

**Independent Component Analysis**

Blind Source Separation of Single Components from Linear Mixtures .... 509
  Roland Vollgraf, Ingo Schießl, and Klaus Obermayer

Blind Source Separation Using Principal Component Neural Networks .... 515
  Konstantinos I. Diamantaras

Blind Separation of Sources by Differentiating the Output Cumulants
and Using Newton’s Method ........................................ 521
  Rubén Martín-Clemente, José I. Acha, and Carlos G. Puntonet

Mixtures of Independent Component Analysers .................. 527
  Stephen J. Roberts and William D. Penny

Conditionally Independent Component Extraction
for Naive Bayes Inference ........................................ 535
  Shotaro Akaho

Fast Score Function Estimation with Application in ICA ............ 541
  Nikos Vlassis

Health Monitoring with Learning Methods ........................ 547
  Alexander Ypma, Co Melissant, Ole Baunbæk-Jensen,
  and Robert P.W. Duin

Breast Tissue Classification in Mammograms Using ICA Mixture Models . 554
  Ioanna Christogianni, Athanasios Koutras, Evangelos Dermatas, and
  George Kokkinakis

Neural Network Based Blind Source Separation of Non-linear Mixtures .... 561
  Athanasios Koutras, Evangelos Dermatas,
  and George Kokkinakis
Signal Processing

Continuous Speech Recognition
with a Robust Connectionist/Markovian Hybrid Model .......................... 577
Edmondo Trentin and Marco Gori

Faster Convergence and Improved Performance in Least-Squares Training
of Neural Networks for Active Sound Cancellation ............................ 583
Martin Bouchard

Bayesian Independent Component Analysis as Applied
to One-Channel Speech Enhancement ............................................ 593
Ilyas Potamitis, Nikos Fakotakis, and George Kokkinakis

Massively Parallel Classification of EEG Signals
Using Min-Max Modular Neural Networks .................................... 601
Bao-Liang Lu, Jonghan Shin, and Michinori Ichikawa

Single Trial Estimation of Evoked Potentials
Using Gaussian Mixture Models with Integrated Noise Component ...... 609
Arthur Flexer, Herbert Bauer, Claus Lamm, and Georg Dorffner

A Probabilistic Approach to High-Resolution Sleep Analysis .............. 617
Peter Sykacek, Stephen Roberts, Iead Rezek, Arthur Flexer,
and Georg Dorffner

Comparison of Wavelet Thresholding Methods
for Denoising ECG signals ...................................................... 625
Vladimir Cherkassky and Steven Kilts

Evoked Potential Signal Estimation
Using Gaussian Radial Basis Function Network ............................. 630
G. Sita and A.G. Ramakrishnan

‘Virtual Keyboard’ Controlled by Spontaneous EEG Activity .......... 636
Bernhard Obermaier, Gernot Müller, and Gert Pfurtscheller

Clustering of EEG-Segments Using Hierarchical Agglomerative Methods
and Self-Organizing Maps ....................................................... 642
David Sommer and Martin Golz

Nonlinear Signal Processing for Noise Reduction
of Unaveraged Single Channel MEG data ................................... 650
Wei Lee Woon and David Lowe
## Time Series Processing

A Discrete Probabilistic Memory Model for Discovering Dependencies in Time .................................. 661  
*Sepp Hochreiter and Michael C. Mozer*

Applying LSTM to Time Series Predictable through Time-Window Approaches ................................. 669  
*Felix A. Gers, Douglas Eck, and Jürgen Schmidhuber*

Generalized Relevance LVQ for Time Series ................................................................. 677  
*Marc Strickert, Thorsten Bojer, and Barbara Hammer*

Unsupervised Learning in LSTM Recurrent Neural Networks ...................................................... 684  
*Magdalena Klapper-Rybicka, Nicol N. Schraudolph, and Jürgen Schmidhuber*

Applying Kernel Based Subspace Classification to a Non-intrusive Monitoring for Household Electric Appliances .......... 692  
*Hiroshi Murata and Takashi Onoda*

Neural Networks in Circuit Simulators .................................................................................. 699  
*Alessio Plebe, A. Marcello Anile, and Salvatore Rinaudo*

Neural Networks Ensemble for Cyclosporine Concentration Monitoring ................................ 706  
*Gustavo Camps, Emilio Soria, José D. Martín, Antonio J. Serrano, Juan J. Ruixo, and N. Víctor Jiménez*

Efficient Hybrid Neural Network for Chaotic Time Series Prediction ........................................ 712  
*Hirotaka Inoue, Yoshinobu Fukunaga, and Hiroyuki Narishiga*

Online Symbolic-Sequence Prediction with Discrete-Time Recurrent Neural Networks ................. 719  
*Juan Antonio Pérez-Ortiz, Jorge Calera-Rubio, and Mikel L. Forcada*

Prediction Systems Based on FIR BP Neural Networks ......................................................... 725  
*Stanislav Kaleta, Daniel Novotný, and Peter Sinčák*

On the Generalization Ability of Recurrent Networks ............................................................ 731  
*Barbara Hammer*

Finite-State Reber Automaton and the Recurrent Neural Networks Trained in Supervised and Unsupervised Manner ................................................................. 737  
*Michal Čerňanský and Lubica Beňušková*

Estimation of Computational Complexity of Sensor Accuracy Improvement Algorithm Based on Neural Networks ................................................................. 743  
*Volodymyr Turchenko, Volodymyr Kochan, and Anatoly Suchenko*
Fusion Architectures for the Classification of Time Series ..................... 749
Christian Dietrich, Friedhelm Schwenker, and Günther Palm

Special Session: Agent-Based Economic Modeling

The Importance of Representing Cognitive Processes in Multi-agent Models .................................................. 759
Bruce Edmonds and Scott Moss

Multi-agent FX-Market Modeling Based on Cognitive Systems .......... 767
Georg Zimmermann, Ralph Neuneier, and Ralph Grothmann

Speculative Dynamics in a Heterogeneous-Agent Model ..................... 775
Taisei Kaizoji

Nonlinear Adaptive Beliefs and the Dynamics of Financial Markets: The Role of the Evolutionary Fitness Measure ................................. 782
Andrea Gaunersdorfer and Cars H. Hommes

Analyzing Purchase Data by A Neural Net Extension of the Multinomial Logit Model ............................................. 790
Harald Hruschka, Werner Fettes, and Markus Probst

Selforganization and Dynamical Systems

Using Maximal Recurrence in Linear Threshold Competitive Layer Networks ......................................................... 799
Heiko Wersing and Helge Ritter

Exponential Transients in Continuous-Time Symmetric Hopfield Nets ...... 806
Jiří Šíma and Pekka Orponen

Initial Evolution Results on CAM-Brain Machines (CBMs) ............... 814
Hugo de Garis, Andrzej Buller, Leo de Penning, Tomasz Chodakowski, and Derek Dechesare

Self-Organizing Topology Evolution of Turing Neural Networks .......... 820
Christof Teuscher and Eduardo Sanchez

Efficient Pattern Discrimination with Inhibitory WTA Nets ............... 827
Brinesh J. Jain and Fritz Wysotzki

Cooperative Information Control to Coordiante Competition and Cooperation ......................................................... 835
Ryotaro Kamimura and Taeko Kamimura

Qualitative Analysis of a Continuous Complex-Valued Associative Memories .................. 843
Yasuaki Kuroe, Naoki Hashimoto, and Takehiro Mori

XX       Table of Contents

Video Sequence Boundary Detection Using Neural Gas Networks       1048
   Xiang Cao and Ponnuthurai N. Suganthan

A Neural-Network-Based Approach to Adaptive Human Computer Interaction       1054
   George Votsis, Nikolaos D. Doulamis, Anastasios D. Doulamis,
   Nicolas Tsapatsoulis, and Stefanos D. Kollias

Adaptable Neural Networks for Unsupervised Video Object Segmentation
   of Stereoscopic Sequences                                               1060
   Anastasios D. Doulamis, Klimis S. Ntalianis, Nikolaos D. Doulamis,
   and Stefanos D. Kollias

Computational Neuroscience

A Model of Border-Ownership Coding in Early Vision                   1069
   Masayuki Kikuchi and Youhei Akashi

Extracting Slow Subspaces from Natural Videos Leads to Complex Cells       1075
   Christoph Kayser, Wolfgang Einhäuser, Olaf Dümer, Peter König,
   and Konrad Körding

Neural Coding of Dynamic Stimuli                                      1081
   Stefan D. Wilke

Resonance of a Stochastic Spiking Neuron Mimicking the Hodgkin-Huxley Model       1087
   Ken-ichi Amemori and Shin Ishii

Spike and Burst Synchronization in a Detailed Cortical Network Model with I-F Neurons       1095
   Baran Çürükli and Anders Lansner

Using Depressing Synapses for Phase Locked Auditory Onset Detection        1103
   Leslie S. Smith

Controlling Oscillatory Behaviour of a Two Neuron Recurrent Neural Network Using Inputs       1109
   Robert Haschke, Jochen J. Steil, and Helge Ritter

Temporal Hebbian Learning in Rate-Coded Neural Networks:
A Theoretical Approach towards Classical Conditioning                   1115
   Bernd Porr and Florentin Wörgötter

A Mathematical Analysis of a Correlation Based Model for the Orientation Map Formation       1121
   Tadashi Yamazaki

Learning from Chaos: A Model of Dynamical Perception                    1129
   Emmanuel Daucé
## Table of Contents

Episodic Memory and Cognitive Map in a Rate Model Network of the Rat Hippocampus ........................................... 1135  
Fanni Misjak, Mate Lengyel, and Peter Erdi

A Model of Horizontal 360° Object Localization Based on Binaural Hearing and Monocular Vision ............................................. 1141  
Carsten Schauer and Horst-Michael Gross

Self-Organization of Orientation Maps, Lateral Connections, and Dynamic Receptive Fields in the Primary Visual Cortex ........... 1147  
Cornelius Weber

Markov Chain Model Approximating the Hodgkin-Huxley Neuron....... 1153  
Yuichi Sakumura, Norio Konno, and Kazuyuki Aihara

### Connectionist Cognitive Science

A Neural Oscillator Model of Auditory Attention .......................... 1163  
Stuart N. Wrigley and Guy J. Brown

Coupled Neural Maps for the Origins of Vowel Systems ................ 1171  
Pierre-yves Oudeyer

Learning for Text Summarization Using Labeled and Unlabeled Sentences......................................................... 1177  
Massih-Reza Amini and Patrick Gallinari

On-Line Error Detection of Annotated Corpus Using Modular Neural Networks ................................................................. 1185  
Qing Ma, Bao-Liang Lu, Masaki Murata, Michinori Ichikawa, and Hitoshi Isahara

Instance-Based Method to Extract Rules from Neural Networks ........ 1193  
DaeEun Kim and Jaeho Lee

A Novel Binary Spell Checker .................................................. 1199  
Victoria J. Hodge and Jim Austin

Neural Nets for Short Movements in Natural Language Processing ..... 1205  
Neill Taylor and John Taylor

Using Document Features to Optimize Web Cache .......................... 1211  
Timo Koskela, Jukka Heikkonen, and Kimmo Kaski

Generation of Diversiform Characters Using a Computational Handwriting Model and a Genetic Algorithm ........................ 1217  
Yasuhiro Wada, Kei Ohkawa, and Keiichi Sumita

Information Maximization and Language Acquisition ..................... 1225  
Ryo taro Kamimura and Taeko Kamimura
XXII   Table of Contents

A Mirror Neuron System for Syntax Acquisition ...................... 1233  
   Steve Womble and Stefan Wermter

A Network of Relaxation Oscillators that Finds Downbeats in Rhythms . 1239  
   Douglas Eck

Knowledge Incorporation and Rule Extraction in Neural Networks ...... 1248  
   Minoru Fukami, Yasue Mitsukura, and Norio Akamatsu

Author Index ............................................................ 1255
Artificial Neural Networks - ICANN 2001
International Conference Vienna, Austria, August 21-25, 2001 Proceedings
Dorffner, G.; Bischof, H.; Hornik, K. (Eds.)
2001, XLIV, 1262 p., Softcover
