Table of Contents

A Refinement Operator for Theories ........................................ 1
   Liviu Badea

Learning Logic Programs with Neural Networks ......................... 15
   Rodrigo Basilio, Gerson Zaverucha, and Valmir C. Barbosa

A Genetic Algorithm for Propositionalization ........................... 27
   Agnès Braud and Christel Vrain

Classifying Uncovered Examples by Rule Stretching .................. 41
   Martin Eineborg and Henrik Boström

Relational Learning Using Constrained Confidence-Rated Boosting .... 51
   Susanne Hoche and Stefan Wrobel

Induction, Abduction, and Consequence-Finding ........................ 65
   Katsumi Inoue

From Shell Logs to Shell Scripts ........................................ 80
   Nico Jacobs and Hendrik Blockeel

An Automated ILP Server in the Field of Bioinformatics .............. 91
   Andreas Karwath and Ross D. King

Adaptive Bayesian Logic Programs ........................................ 104
   Kristian Kersting and Luc De Raedt

Towards Combining Inductive Logic Programming with Bayesian Networks ........................................ 118
   Kristian Kersting and Luc De Raedt

Demand-Driven Construction of Structural Features in ILP .......... 132
   Stefan Kramer

Transformation-Based Learning Using Multirelational Aggregation .... 142
   Mark-A. Krogel and Stefan Wrobel

Discovering Associations between Spatial Objects: An ILP Application ... 156
   Donato Malerba and Francesca A. Lisi

θ-Subsumption in a Constraint Satisfaction Perspective .............. 164
   Jérôme Maloberti and Michèle Sebag

Learning to Parse from a Treebank: Combining TBL and ILP .......... 179
   Miloslav Nepil
