# Table of Contents

## Keynote Addresses

Guaranteed Software Quality ................................................................. 1
*Dieter Rombach*

Building an Experience Base for Software Engineering:
A Report on the First CeBASE eWorkshop ........................................ 3
*Victor Basili*

A Contingency Approach to Software Development .......................... 4
*Werner Mellis*

Career-Long Education for Software Professionals:
A US View of the Educational Challenges in a Rapidly-Changing Technology .......................... 5
*Mary Shaw*

## Quality of Software

Cognitive Structures of Software Evaluation:
A Means-End Chain Analysis of Quality ............................................ 6
*Bernard Wong, Ross Jeffery*

Requirements Evolution from Process to Product Oriented Management ............... 27
*Stuart Anderson, Massimo Felici*

## Software Process Assessment and Improvement

A Case Study on Scenario-Based Process Flexibility Assessment
for Risk Reduction ............................................................................. 42
*Josef Nedstam, Martin Höst, Björn Regnell, Jennie Nilsson*

Contexts in KM Based SPI: The Case of Software Design Experience Reuse ............ 57
*Veikko Seppänen, Seija Komsi-Sirviö, A. Mäntyniemi, Tua Rahikkala, Minna Pikkarainen*

Models and Success Factors of Process Change ...................................... 68
*Marion Lepasaar, Timo Varkoi, Hannu Jaakkola*

Process Improvement in Turbulent Times: Is CMM Still an Answer? .................... 78
*Karl Lebsanft*

## Software and Process Modeling

**LIPE: A Lightweight Process for e-Business Startup Companies**  
Based on Extreme Programming ......................................................... 255  
*Jörg Zettel, Frank Maurer, Jürgen Münch, Les Wong*

**Evaluation of the E3 Process Modelling Language and Tool**  
for the Purpose of Model Creation .................................................. 271  
*M. Letizia Jaccheri, Tor Stålhamne*

**Describing Fractal Processes with UML** ........................................ 282  
*Harald Störrle*

**Extending the Software Process Culture -**  
An Approach Based on Groupware and Workflow ................................ 297  
*Renata Araujo, Marcos Borges*

**Towards Systematic Knowledge Elicitation**  
for Descriptive Software Process Modeling ......................................... 312  
*Ulrike Becker-Kornstädt*

**Modular Process Patterns**  
Supporting an Evolutionary Software Development Process .................. 326  
*Michael Gnatz, Frank Marschall, Gerhard Popp, Andreas Rausch, Wolfgang Schwerin*

## Empirical Software Engineering

**A Classification Scheme for Studies on Fault-Prone Components** ........ 341  
*Per Runeson, Magnus C. Ohlsson, Claes Wohlin*

**Program Understanding Behavior**  
During Estimation of Enhancement Effort on Small Java Programs .......... 356  
*Lars Bratthall, Erik Arisholm, Magne Jørgensen*

**Evaluation of a Business Application Framework**  
Using Complexity and Functionality Metrics ...................................... 371  
*Hikaru Fujiwara, Shinji Kusumoto, Katsuro Inoue, Toshifusa Ootsubo, Katsuhiko Yuura*

## Author Index
