

Table of Contents

1	Probability Basics	1
1.1	The Definition of Probability	1
1.1.1	Tossing Two Dice	1
1.1.2	A Standard Approach	4
1.1.3	Probability Space	4
1.2	The Classical Scheme and Its Extensions	6
1.2.1	Drawing with and Without Replacement	8
1.2.2	Applications of the Classical Scheme	9
1.2.3	Infinite Sequence of Events	12
1.3	Geometric Probability	14
1.3.1	Awkward Corners – Bertrand’s Paradox	15
1.4	Conditional and Total Probability	16
1.4.1	The Law of Total Probability	17
1.4.2	Bayes’ Theorem	20
1.5	Independent Events	22
1.5.1	Cartesian Product	24
1.5.2	The Bernoulli Scheme	25
1.6	MAPLE Session	27
1.7	Exercises	29
2	Measure and Integral	33
2.1	Measure	33
2.1.1	Formal Definitions	34
2.1.2	Geometric Probability Revisited	36
2.1.3	Properties of Measure	37
2.2	Integral	38
2.2.1	The Riemann Integral	38
2.2.2	The Stieltjes Integral	41
2.2.3	Measurable Functions	42
2.2.4	The Lebesgue Integral	44
2.3	Properties of the Integral	47
2.3.1	Integrals with Respect to Lebesgue Measure	49
2.3.2	Riemann Integral Versus Lebesgue Integral	49
2.3.3	Integrals Versus Derivatives	50
2.4	Determining Integrals	51

2.5	MAPLE Session	52
2.6	Exercises	59
3	Random Variables and Distributions	61
3.1	Probability Distributions	63
3.1.1	Discrete Distributions	63
3.1.2	Continuous Distributions	65
3.1.3	Distribution Function	66
3.2	Random Variables and Random Vectors	69
3.2.1	A Problem of Measurability	70
3.2.2	Distribution of a Random Variable	71
3.2.3	Random Vectors	72
3.3	Independence	72
3.4	Functions of Random Variables and Vectors	74
3.4.1	Distributions of a Sum	77
3.5	MAPLE Session	78
3.6	Exercises	82
4	Parameters of Probability Distributions	85
4.1	Mathematical Expectation	85
4.2	Variance	89
4.2.1	Moments	90
4.3	Computation of Moments	92
4.3.1	Evaluation of the Mean and Variance	93
4.4	Chebyshev's Inequality	98
4.5	Law of Large Numbers	100
4.5.1	The Weak Law of Large Numbers	101
4.5.2	Convergence of Random Variables	102
4.5.3	The Strong Law of Large Numbers	106
4.6	Correlation	107
4.6.1	Marginal Distributions	108
4.6.2	Covariance and the Coefficient of Correlation	108
4.7	MAPLE Session	112
4.8	Exercises	117
5	A Tour of Important Distributions	121
5.1	Counting	121
5.1.1	The Binomial Distribution	121
5.1.2	The Multinomial Distribution	123
5.1.3	The Poisson Distribution	124
5.1.4	The Hypergeometric Distribution	127
5.2	Waiting Times	128
5.2.1	The Geometric Distribution	129
5.2.2	The Negative Binomial Distribution	130
5.2.3	The Exponential Distribution	131

5.2.4	The Erlang Distribution	134
5.2.5	The Poisson Process	135
5.3	The Normal Distribution	136
5.4	Central Limit Theorem	140
5.4.1	Examples	145
5.5	Multidimensional Normal Distribution	147
5.5.1	2-dimensional Normal Distribution	148
5.6	MAPLE Session	153
5.7	Exercises	158
6	Numerical Simulations and Statistical Inference	161
6.1	Pseudo-Random Number Generation	161
6.2	Basic Statistical Tests	165
6.2.1	p -value	167
6.3	The Runs Test	168
6.4	Goodness of Fit Tests	174
6.5	Independence Test	177
6.6	Confidence Intervals	179
6.7	Inference for Numerical Simulations	182
6.8	MAPLE Session	185
6.9	Exercises	190
7	Stochastic Processes	193
7.1	Conditional Expectation	193
7.2	Markov Chains	198
7.2.1	Random Walks	199
7.2.2	Evolution of Probabilities	202
7.2.3	Irreducible and Transient Chains	205
7.3	Special Classes of Stochastic Processes	210
7.4	Continuous-Time Stochastic Processes	211
7.4.1	Wiener Process	212
7.4.2	Markov Processes	215
7.4.3	Diffusion Processes	217
7.5	Continuity and Convergence	218
7.6	MAPLE Session	220
7.7	Exercises	226
8	Stochastic Calculus	229
8.1	Introduction	229
8.2	Ito Stochastic Integrals	230
8.3	Stochastic Differential Equations	233
8.4	Stochastic Chain Rule: the Ito Formula	236
8.5	Stochastic Taylor Expansions	238
8.6	Stratonovich Stochastic Calculus	241
8.7	MAPLE Session	244

8.8	Exercises	246
9	Stochastic Differential Equations	249
9.1	Solving Scalar Stratonovich SDEs	249
9.2	Linear Scalar SDEs	253
9.2.1	Moment Equations	256
9.3	Scalar SDEs Reducible to Linear SDEs	257
9.4	Vector SDES	260
9.4.1	Vector Ito Formula	262
9.4.2	Fokker-Planck Equation	264
9.5	Vector Linear SDE	265
9.5.1	Moment Equations	267
9.5.2	Linearization	267
9.6	Vector Stratonovich SDEs	268
9.7	MAPLE Session	270
9.8	Exercises	275
10	Numerical Methods for SDEs	277
10.1	Numerical Methods for ODEs	277
10.2	The Stochastic Euler Scheme	280
10.2.1	Statistical Estimates and Confidence Intervals	283
10.3	How to Derive Higher Order Schemes	284
10.3.1	Multiple Stochastic Integrals	286
10.4	Higher Order Strong Schemes	288
10.5	Higher Order Weak Schemes	290
10.6	The Euler and Milstein Schemes for Vector SDEs	291
10.7	MAPLE Session	295
10.8	Exercises	301
	Bibliographical Notes	303
	References	305
	Index	307
