Table of Contents

Invited Lectures

Gröbner Bases: A Short Introduction for Systems Theorists.................................................1
B. Buchberger

Design for Reuse via Structuring Techniques for ASMs.........................................................20
E. Börger

1 Computer Aided Systems Theory

1.1 Mathematical and Logic Formalisms

On CAST.FSM Computation of Hierarchical Multi-layer Networks of Automata.................................................................36
M. Affenzeller, F. Pichler, R. Mittelmann

A Holarchical Organized Design Assistant for Hierarchical Decompositions.................................................................45
S. Meine

Conflict Management in an Intelligent Multiagent Robotics System Based on FSM Approach.............................................52
W. Jacak, K. Pröll, S. Dreiseitl

Computer-Aided Simulations of Gaussian Processes and Related Asymptotic Properties................................................67
E. Di Nardo, A.G. Nobile, E. Pirozzi, L.M. Ricciardi

Hybrid Systems’ Properties – Classification and Relation to Computer Science.................................................................79
T. Stauner

Assertion-Based Analysis of Hybrid Systems with PVS.................................................................................................94

Algebraic Description of Physical Systems.........................................................................................110
H. von Issendorff
# Table of Contents

## 1.2 Information and Decision

**Information Structure and Logical Design of Social Rules**

*T. Shimogawa*

**Towards a Generic Model of Information Processing Systems**

*G. Németh*

**Evolutionary Information and Decision Support Systems: An Integration Based on Ontologies**

*M.V. Hurtado, J. Parets*

**A Proposal for Project Management Using CommonKADS**

*I. del Aguila, S. Túnez, J. Cañadas, A. Bosch, R. Marin*

**A General Planning Method for Allocation of Human Resource Groups**

*M. Mauerkirchner*

**Optimizing Organizational Structure: A Hausdorff Benchmark for Complex Social Systems**

*M. Schwaninger*

**A Planning under Uncertainty Model**

*E. Paniagua-Aris, J.T. Palma-Méndez, F. Martín-Rubio*

## 1.3 Complexity

**Knowledge Based Modeling of the Design Process as a Base of Design Tools. Application to the Development of Agricultural Structures**

*J.F. Bienvenido, I.M. Flores-Parra, R. Guirado, R.L. Marin*

**Complexity Analysis of Systems from a Functional and Technical Viewpoint**

*S. Dierneder, R. Scheidl*

**A Complexity-Theoretic Approach to the Design of Good Measures of Cryptographic Strength**

*J.D. González Cobas, J.A. López Brugos*

**Characterizing the Software Development Process: A New Approach Based on Kolmogorov Complexity**

*C.A.P. Campani, P.B. Menezes*

**Application of Signed Kolmogorov Hashes to Provide Integrity and Authenticity in Web-Based Software Distribution**

*J. Scharinger*

## Table of Contents

Contributions to the Control and Stabilization of the Pole-Cart System

*A. Raya, D. Maravall*

A Qualitative System as a Frame to Control Unmanned Vehicles

*R. García Rosa, T. de Pedro*

Hyper-Automation System Applied to Geometry Demonstration Environment

### 2 Computer Algebra and Automated Theorem Proving

The PCS Prover in THEOREMA

*B. Buchberger*

Higher-Order Lazy Narrowing Calculus: A Solver for Higher-Order Equations

*T. Ida, M. Marin, T. Suzuki*

Classifying Isomorphic Residue Classes

*A. Meier, M. Pollet, V. Sorge*

CAL: A Computer Assisted Learning System for Computation and Logic

*M. Sato, Y. Kameyama, T. Izumi*

A Set Theory Prover Within Theorema

*W. Windsteiger*

### 3 Functional Programming and $\lambda$ Calculus

The Tertiary Level in a Functional Cluster-Based Hierarchical VoD Server

*M. Barreiro, V.M. Gulias, J.J. Sánchez, S. Jorge*

Hidden Specification of a Functional System

*C. Domínguez, L. Lambán, V. Pascual, J. Rubio*

Distributed Execution of Functional Programs Using the JVM

*A.R. Du Bois, A.C. da Rocha Costa*

Fusion in Coq

*J.L. Freire Nistal, J.E. Freire Brañas, A. Blanco Ferro, J.J. Sánchez Penas*
A Language Prototyping Tool Based on Semantic Building Blocks..............................597
  J.E. Labra Gayo, J.M. Cueva Lovelle, M.C. Luengo Diez,
  B.M. González Rodríguez

Verifying an Applicative ATP Using Multiset Relations........................................612
  F.J. Martín-Mateos, J.A. Alonso, M.J. Hidalgo, J.L. Ruiz-Reina

Adding Traces to a Lazy Monadic Evaluator............................................................ 627
  C. Pareja, R. Peña, F. Rubio, C. Segura

Functional Vs Object-Oriented Distributed Languages.............................................642

Persistent Haskell.......................................................................................................657
  J. Quintela, J.J. Sánchez

Author Index.............................................................................................................669
Computer Aided Systems Theory - EUROCAST 2001
Revised Papers
Moreno-Diaz, R.; Buchberger, B.; Freire, J.-L. (Eds.)
2001, XI, 672 p., Softcover
ISBN: 978-3-540-42959-3
