## Table of Contents

Theories, Implementations, and Transformations ........................................ 1  
*Eric Hehner (Invited Speaker) and Ioannis T. Kassios*

Incremental Proof of the Producer/Consumer Property for the PCI Protocol .... 22  
*Dominique Cansell, Ganesh Gopalakrishnan, Mike Jones, Dominique Méry,  
and Airy Weinzoepfle* (B)

Controlling Control Systems: An Application of Evolving Retrenchment .......... 42  
*Michael Poppleton and Richard Banach* (B)

Checking Z Data Refinements Using an Animation Tool ............................ 62  
*Neil J. Robinson* (Z)

Encoding Object-Z in Isabelle/HOL ......................................................... 82  
*Graeme Smith, Florian Kammüller, and Thomas Santen* (Z)

Characters + Mark-up = Z Lexis ................................................................. 100  
*Ian Toyn and Susan Stepney* (Z)

Extraction of Abstraction Invariants for Data Refinement .......................... 120  
*Marielle Doche and Andrew Gravell* (B)

An Approach to Combining B and Alloy .................................................... 140  
*Leonid Mikhailov and Michael Butler* (B)

Software Construction by Stepwise Feature Introduction .......................... 162  
*Ralph-Johan Back (Invited Speaker)*

The Semantics of *Circus* ................................................................. 184  
*Jim Woodcock and Ana Cavalcanti* (Z)

Handling Inconsistencies in Z Using Quasi-Classical Logic ....................... 204  
*Ralph Miarka, John Derrick, and Eerke Boiten* (Z)

Loose Specification and Refinement in Z ................................................. 226  
*Eerke Boiten* (Z)

On Using Conditional Definitions in Formal Theories ............................... 242  
*Jean-Raymond Abrial and Louis Mussat* (B)

A Theory of Generalised Substitutions ..................................................... 270  
*Steve Dunne* (B)

Reinforced Condition/Decision Coverage (RC/DC): A New Criterion for  
Software Testing ...................................................................................... 291  
*Sergiy A. Vilkomir and Jonathan P. Bowen* (Z)
A Comparison of the BTT and TTF Test-Generation Methods .......................... 309
Bruno Legeard, Fabien Peureux, and Mark Utting (Z, B)

A Formal Analysis of the CORBA Security Service ........................................ 330
David Basin, Frank Rittinger, and Luca Viganò (Z)

Type Synthesis in B and the Translation of B to PVS ....................................... 350
Jean-Paul Bodeveix and Mamoun Filali (B)

“Higher-Order” Mathematics in B ................................................................. 370
Jean-Raymond Abrial, Dominique Cansell, and Guy Laffitte (B)

ABS Project: Merging the Best Practices in Software Design from Railway and
Aircraft Industries ......................................................................................... 394
Pierre Chartier (Invited Speaker)

Generalised Substitution Language and Differentials ..................................... 396
James Blow and Andy Galloway (B)

Communicating B Machines ........................................................................... 416
Steve Schneider and Helen Treharne (B)

Synchronized Parallel Composition of Event Systems in B ............................ 436
Françoise Bellegarde, Jacques Julliand, and Olga Kouchnarenko (B)

Global and Communicating State Machine Models in Event Driven B: A Simple
Railway Case Study ....................................................................................... 458
Antonis Papatsaras and Bill Stoddart (B)

Verification of Dynamic Constraints for B Event Systems under
Fairness Assumptions ...................................................................................... 477
Françoise Bellegarde, Samir Chouali, and Jacques Julliand (B)

A Formal Model of the UML Metamodel: The UML State Machine and
Its Integrity Constraints .................................................................................. 497
Soon-Kyeong Kim and David Carrington (Z)

Coming and Going from UML to B: A Proposal to Support Traceability in
Rigorous IS Development ............................................................................ 517
Régine Laleau and Fiona Polack (B)

Author Index ................................................................................................. 535
ZB 2002: Formal Specification and Development in Z and B
2nd International Conference of B and Z Users
Bert, D.; Bowen, J.P.; Henson, M.C.; Robinson, K. (Eds.)
2002, XI, 541 p., Softcover
ISBN: 978-3-540-43166-4
