

Dedicated to the memory of Jochen Liedtke
who died much too early on June 10, 2001

Preface

Future processors will become smaller, provide higher performance, and consume less power than today's devices. Such processors will spark off new applications in particular in the area of everyday consumer devices. Personal digital assistants, mobile consumer devices, and various smart personal appliances will soon be widely used. Mobile telecommunication systems will increase their bandwidth and will yield highly connected, ubiquitous computing appliances. Ubiquitous computing induces a new way of thinking in system design: computers vanish into the background hidden behind the habitual human environment.

These trends are the major topics of ARCS 2002, the "International Conference on Architecture of Computing Systems", which continues and replaces the biennial series of German Conferences on Architecture of Computing Systems, organized by the special interest group on "Computer and System Architecture" of the GI (Gesellschaft für Informatik – German Informatics Society) and the ITG (Informationstechnische Gesellschaft – Information Technology Society). The fifteen predecessor conferences (except the EuroArch in 1993) were national conferences only, this is the first German conference on computer architecture addressing the international research community. It serves as a forum to present current work by researchers from around the world, this year being focused on topics that are truly changing our perception of information processing – "Trends in Network and Pervasive Computing".

The call for papers resulted in a total of 42 submissions from around the world. Every submission was reviewed by four members of the program committee or additional reviewers. The program committee decided to accept 18 papers, which are arranged into 6 sessions with the result of a strong program. The two keynote talks by Ralf Guido Herrtwich (DaimlerChrysler Research) and Marc Fleischmann (formerly Transmeta, now Pixelworks) focus our attention on an innovative application area ("Communicating Cars: A Case for Ubiquitous Computing in the Automotive Domain") and on innovative architectures ("Microprocessor Architectures for the Mobile Internet Era").

The organizers gratefully acknowledge the support by ACM, IEEE, IFIP TC10, CEPIS, and EUREL, and, in particular, the financial support by PEP Modular Computers and by SAP.

The preparation of this conference has been heavily influenced by our colleague Jochen Liedtke, who died much too early in June 2001. He strongly advocated the international orientation of this conference, he was a major contributor in shaping its thematic focus, and he helped significantly to form a truly international program committee. The research community on computer and system architecture deeply regrets the loss of such an energetic and enthusiastic colleague, who contributed numerous stimulating concepts and ideas, in particular on the design of micro kernel architectures.

We would like to thank all who contributed to the success of this conference, in particular the members of the program committee and the additional referees for carefully reviewing the contributions and selecting a high quality program. Our Workshop and Tutorial Chair Uwe Brinkschulte did a perfect job in organizing the tutorials and coordinating the workshops. Our special thanks go to the General Co-chair Lars Wolf and to the members of the organizing committee, namely Michael Beigl and Martina Zitterbart, for their numerous contributions as well as to Daniela Müller and André Wiesner for setting up the conference software and for designing and maintaining the conference web-site. Faruk Bagci and Jan Petzold did a perfect job concerning the preparation of this volume.

We hope that all participants enjoy a successful conference, make a lot of new contacts, engage in fruitful discussions, and have a pleasant stay in Karlsruhe.

January 2002

Hartmut Schmeck
Theo Ungerer

Organization

Executive Committee

General Chair:	Hartmut Schmeck	University of Karlsruhe (TH)
General Co-Chair:	Lars Wolf	University of Karlsruhe (TH)
Program Chair:	Theo Ungerer	University of Augsburg
Workshop and Tutorial Chair:	Uwe Brinkschulte	University of Karlsruhe (TH)

Program Committee

Nader Bagherzadeh	University of California Irvine, USA
Michael Beigl	TecO, Karlsruhe, Germany
Frank Bellosa	Univ. of Erlangen & IBM Watson, USA
Arndt Bode	Technical University of Munich, Germany
Gaetano Borriello	University of Washington, USA
Uwe Brinkschulte	University of Karlsruhe (TH), Germany
Kemal Ebcioglu	IBM T.J. Watson, USA
Reinhold Eberhardt	DaimlerChrysler, Ulm, Germany
Werner Erhard	University of Jena, Germany
Hans Gellersen	University of Lancaster, GB
Orran Krieger	IBM T.J. Watson, USA
Jochen Liedtke*	University of Karlsruhe (TH), Germany
Erik Maehle	Medical University of Lübeck, Germany
Friedemann Mattern	ETH Zürich, Switzerland
Christian Müller-Schloer	Univ. of Hannover, Germany
Wolfgang Rosenstiel	Univ. of Tübingen, Germany
Bernt Schiele	ETH Zürich, Switzerland
Alexander Schill	Techn. Univ. of Dresden, Germany
Hartmut Schmeck	University of Karlsruhe (TH), Germany
Karsten Schwan	Georgia Tech, USA
Peter Steenkiste	Carnegie-Mellon University, USA
Djamshid Tavangarian	Univ. of Rostock, Germany
Rich Uhlig Intel	Microprocessor Research Lab, USA
Theo Ungerer	University of Augsburg, Germany
Klaus Waldschmidt	University of Frankfurt, Germany
Lars Wolf	University of Karlsruhe (TH), Germany
Hans Christoph Zeidler	Univ. Fed. Armed Forces, Germany
Martina Zitterbart	University of Karlsruhe (TH), Germany

* died June 10, 2001

Local Organization

Michael Beigl	University of Karlsruhe (TH)
Uwe Brinkschulte	University of Karlsruhe (TH)
Hartmut Schmeck	University of Karlsruhe (TH)
Theo Ungerer	University of Augsburg

Martina Zitterbart	University of Karlsruhe (TH)

Reviewers

Stavros Antifakos	ETH Zurich
Faruk Bagci	University of Augsburg
Nader Bagherzadeh	Univ. of California Irvine
Marc Bechler	Univ. of Karlsruhe (TH)
Michael Beigl	Univ. of Karlsruhe (TH)
Frank Bellosa	Univ. of Erlangen & IBM
Arndt Bode	Technical Univ. of Munich
Gaetano Borriello	Univ. of Washington
Markus Braun	Univ. of Tübingen
Uwe Brinkschulte	Univ. of Karlsruhe (TH)
Fabian Bustamante	Georgia Tech
Vlad Coroama	ETH Zürich
Erik Cota-Robles	Intel Labs
Christian Cseh	DaimlerChrysler
Svetlana Domnitcheva	ETH Zürich
Kemal Ebcioglu	IBM T.J. Watson
Reinhold Eberhardt	DaimlerChrysler
Greg Eisenhauer	Georgia Tech
Werner Erhard	Univ. of Jena
Frank Eschmann	Univ. of Frankfurt
Fridtjof Feldbusch	Univ. of Augsburg
Christian Flörkemeier	ETH Zürich
Walter Franz	DaimlerChrysler
Hans Gellersen	Univ. of Lancaster
Christoph Grimm	Univ. of Frankfurt
Albert Held	DaimlerChrysler
Udo Heuser	Univ. of Tübingen
Verena Kahmann	Univ. of Karlsruhe (TH)
Nicholas Kern	ETH Zürich
Bernd Klauer	Univ. of Frankfurt
Orran Krieger	IBM T.J. Watson
Alain Kägi	Intel Labs
Marc Langheinrich	ETH Zürich
Jochen Liedtke*	Univ. of Karlsruhe
Erik Maehle	Medical Univ. of Lübeck

* died June 10, 2001

Friedemann Mattern	ETH Zürich
Florian Michahelles	ETH Zürich
