Part I. Subdivision

Subdivision of Box-Splines	3
<i>Malcolm Sabin</i>	
1 B-Splines	4
2 Univariate Box-Splines	8
3 Bivariate Box-Splines	12
4 Freedom of Topology	17
5 Programming Subdivision Schemes	21
6 Bibliographic Notes	22
References	22
Interpolatory Subdivision Schemes	25
<i>Nira Dyn</i>	
1 The Univariate Stationary Case	25
2 Non-Stationary Univariate Interpolatory Schemes, Exact for Exponentials	35
3 Tensor-Product Interpolatory Schemes for Surfaces	37
4 The Butterfly Scheme - An Interpolatory Subdivision Scheme on Triangulations	39
5 Bibliographic Notes	43
References	43
Appendix: Solutions of Selected Exercises	45
Analysis of Convergence and Smoothness by the Formalism of Laurent Polynomials	51
<i>Nira Dyn</i>	
1 Introduction	51
2 Analysis of Univariate Schemes	52
3 Analysis of Bivariate Schemes with Factorizable Symbols	58
4 Bibliographic Notes	63
References	64
Appendix: Solutions of Selected Exercises	65
Eigenanalysis and Artifacts of Subdivision Curves and Surfaces	69
<i>Malcolm Sabin</i>	
1 Analysis of Curves	69
2 Analysis of Subdivision Surfaces	79
3 Bibliographic Notes	89
References	90

Nonlinear Subdivision Schemes:	
Applications to Image Processing	93
<i>Albert Cohen, Basarab Matei</i>	
Extended Abstract	93
References	97

Part II. Wavelets

Nonuniform B-Splines and B-Wavelets	101
<i>Ewald Quak</i>	
1 Introduction	101
2 B-Splines on Nonuniform Knot Sequences	102
3 Refinement of B-Splines	112
4 A Nonuniform Spline Multiresolution Analysis	120
5 An Example: Multiresolution Analysis based on Piecewise Linear Splines	125
6 Nonuniform B-Wavelets	142
References	145
BLaC Wavelets and Non-Nested Wavelets	147
<i>Georges-Pierre Bonneau</i>	
1 Introduction	147
2 Multiresolution Analysis with Non-Nested Approximating Spaces ..	147
3 BLaC Wavelets	151
4 Multiresolution Analysis on Hierarchical Triangulations	157
References	162
Multiresolution on the Sphere	165
<i>Matthias Conrad, Jürgen Prestin</i>	
1 Introduction	165
2 Preliminaries	166
3 Spherical Harmonics	173
4 Spherical Basis Functions	191
References	200

Part III. Scattered Data Modelling

Scattered Data Modelling Using Radial Basis Functions	205
<i>Armin Iske</i>	
1 Introduction	205
2 Interpolation	207
3 Optimal Recovery	210
4 Pointwise Optimality	213
5 Uncertainty Principle	216

6 Optimal Point Sampling 219
 7 Least Squares Approximation 224
 8 Multilevel Approximation Schemes 227
 9 Scattered Data Filtering 228
 References 233
 Appendix: Exercises 236

Scattered Data Fitting with Bivariate Splines 243

Frank Zeilfelder

1 Introduction 243
 2 Splines 246
 3 Bernstein-Bézier Techniques 251
 4 Dimension of Bivariate Spline Spaces 255
 5 Interpolation Methods for Bivariate Splines 259
 6 A Direct Approximation Method for Bivariate Splines 270
 References 276
 Appendix: Exercises 284

Parameterization of Triangulations and Unorganized Points .. 287

Michael Floater, Kai Hormann

1 Introduction 287
 2 Parameterization of Simple Triangulations 288
 3 Parameterization by Linear Methods 291
 4 Choosing the Weights 293
 5 Parameterization by Weighted Least Squares 296
 6 Parameterization by Non-Linear Methods 298
 7 Remeshing, Subdivision Connectivity, and Multiresolution 305
 8 Parameterization of Unorganized Points 308
 9 Parameterization of Manifold Triangulations 311
 References 314

Part IV. Coding and Data Structures

Simplification and Compression of 3D Meshes 319

Craig Gotsman, Stefan Gumhold, Leif Kobbelt

1 Introduction 319
 2 Mesh Decimation Techniques 323
 3 Connectivity Coding 334
 4 Compression of Geometric Data 346
 References 356
 Appendix: Exercises 360

Multiresolution Mesh Representation:	
Models and Data Structures	363
<i>Leila De Floriani, Paola Magillo</i>	
1 Introduction.....	363
2 Background Notions.....	365
3 A Reference Framework for Multiresolution Meshes	369
4 Classification of Multiresolution Meshes.....	375
5 Level-Of-Detail (LOD) Queries on a Multiresolution Mesh.....	387
6 General-Purpose Data Structures for Multiresolution Meshes	391
7 Data Structures for Nested Models	394
8 Data Structures for Non-Nested Models.....	397
9 Concluding Remarks	410
References	411
Appendix: Exercises	417
Index	419
