Contents

Preface .......................................................... V

Part I. Clustering and Discrimination

Clustering ...................................................... 3

Some Thoughts about Classification ......................... 5
Frank Hampel

Partial Defuzzification of Fuzzy Clusters .................... 27
Slavka Bodjanova

A New Clustering Approach, Based on the Estimation of the
Probability Density Function, for Gene Expression Data ...... 35
Noël Bonnet, Michel Herbin, Jérôme Cutrona, Jean-Marie Zahm

Two-mode Partitioning: Review of Methods and Application
of Tabu Search .................................................. 43
William Castillo, Javier Trejos

Dynamical Clustering of Interval Data Optimization ......... 53
Marie Chavent, Yves Lechevallier

Removing Separation Conditions in a 1 against 3-Components
Gaussian Mixture Problem ..................................... 61
Bernard Garel and Franck Goussanou

Obtaining Partitions of a Set of Hard or Fuzzy Partitions .... 75
Allan D. Gordon, Maurizio Vichi

Clustering for Prototype Selection using Singular Value De-
composition .................................................... 81
A.K.V.Sai Jayram, M.Narasimha Murty

Clustering in High-dimensional Data Spaces ................... 89
Fionn Murtagh

Quantization of Models: Local Approach and Asymptotically
Optimal Partitions .............................................. 97
Klaus Pötzelberger
The Performance of an Autonomous Clustering Technique  
*Yoshiharu Sato*  
107

Cluster Analysis with Restricted Random Walks  
*Joachim Schöll, Elisabeth Paschinger*  
113

Missing Data in Hierarchical Classification of Variables — 
a Simulation Study  
*Ana Lorga da Silva, Helena Bacelar-Nicolau, Gilbert Saporta*  
121

**Cluster Validation**  
130

Representation and Evaluation of Partitions  
*Alain Guénoche, Henri Garreta*  
131

Assessing the Number of Clusters of the Latent Class Model  
*François-Xavier Jollois, Mohamed Nadif and Gérard Govaert*  
139

Validation of Very Large Data Sets Clustering by Means of a Nonparametric Linear Criterion  
*Israel Lerman, Joaquim Pinto da Costa, Helena Silva*  
147

**Discrimination**  
160

Effect of Feature Selection on Bagging Classifiers Based on Kernel Density Estimators  
*Edgar Acuña, Alex Rojas, Frida Coaquirá*  
161

Biplot Methodology for Discriminant Analysis Based upon Robust Methods and Principal Curves  
*Sugnet Gardner, Niel le Roux*  
169

Bagging Combined Classifiers  
*Torsten Hothorn and Berthold Lausen*  
177

Application of Bayesian Decision Theory to Constrained Classification Networks  
*Hans J. Vos*  
185

---

**Part II. Multivariate Data Analysis and Statistics**

**Multivariate Data Analysis**  
194

Quotient Dissimilarities, Euclidean Embeddability, and Huygens' Weak Principle  
*François Bavaud*  
195
Conjoint Analysis and Stimulus Presentation
– a Comparison of Alternative Methods ......................... 203
  Michael Brusch, Daniel Baier, Antje Treppa

Grade Correspondence-cluster Analysis Applied to Separate
Components of Reversely Regular Mixtures .................... 211
  Alicja Ciok

Obtaining Reducts with a Genetic Algorithm ..................... 219
  José Luis Espinoza

A Projection Algorithm for Regression with Collinearity ........ 227
  Peter Filzmoser, Christophe Croux

Confronting Data Analysis with Constructivist Philosophy ... 235
  Christian Hennig

Statistical Methods .................................................. 246

Maximum Likelihood Clustering with Outliers .................... 247
  María Teresa Gallegos

An Improved Method for Estimating the Modes of the Prob-
ability Density Function and the Number of Classes for PDF-
based Clustering ....................................................... 257
  Michel Herbin, Noel Bonnet

Maximization of Measure of Allowable Sample Sizes Region
in Stratified Sampling ............................................... 263
  Marcin Skibicki

On Estimation of Population Averages on the Basis of Cluster
Sample ................................................................. 271
  Janusz Wywiał

Symbolic Data Analysis .............................................. 280

Symbolic Regression Analysis ..................................... 281
  Lynne Billard, Edwin Diday

Modelling Memory Requirement with Normal Symbolic Form 289
  Marc Csernel, Francisco de A. T. de Carvalho

Mixture Decomposition of Distributions by Copulas ............ 297
  Edwin Diday

Determination of the Number of Clusters for Symbolic Ob-
jects Described by Interval Variables ............................ 311
  André Hardy, Pascale Lallemand
