Preface

With advances in the Internet and technologies around the World-Wide Web, research on design, implementation, and management of Internet and Web-based information systems has become increasingly important. As more and more information of diverse types becomes available on the Internet and Web, the management and the manipulation of information over the Internet become more complex and extremely difficult. Novel approaches to developing and managing Internet and Web information systems are in high demand. Following the successful conferences in 2000 and 2001, WAIM 2002 continued to provide a forum for researchers, professionals, and industrial practitioners from around the world to share their rapidly evolving knowledge and to report on new advances in Web-based information systems.

WAIM 2002 received an overwhelming 169 submissions from Australia, Austria, Brazil, Canada, China, Czech Republic, France, Germany, Hong Kong, Italy, Japan, Korea, Norway, Portugal, Singapore, Slovenia, Spain, Switzerland, Taiwan, UK, and USA. Through a careful review process by the program committee, 26 papers were selected as regular papers and 14 as short papers for presentation at the conference. As indicated by these numbers, WAIM 2002 is extremely selective: 15% for regular papers, and 24% overall. The technical program covers a wide range of research areas including XML and web, spatio-temporal data, high dimensional data, data mining and learning, workflow and E-services, bioinformatics, views, OLAP, query optimization, and updates, etc. Two invited talks by Richard Hull (Bell Labs., USA) and Alberto Mendelzon (University of Toronto, Canada) were on XML and E-services. Two tutorials were given by Minos Garofalakis, Johannes Gehrke, and Rajeev Rastogi on stream data processing, and by Jian Yang on web services. In addition, systems were also chosen to be demonstrated at the conference. Regular and short papers and a brief summary of demos are included in these proceedings.

We are grateful to the program committee members who helped tremendously in reviewing the large number of submissions. We appreciate the work by Yujun Wang in setting up the software for submissions, and members of the WAIM 2002 organization committees. Finally, we would like to thank the Renmin University of China and the Tsinghua University for organizing the conference.

August 2002
Xiaofeng Meng and Jianwen Su
Organization

General Chair:
Wei Li Beijing University of Aero/Astro, China

Conference Co-chairs:
Masaru Kitsuregawa University of Tokyo, Japan
Lizhu Zhou Tsinghua University, China

Program Co-chairs:
Xiaofeng Meng Renmin University of China, China
Jianwen Su University of California at Santa Barbara, USA

Publicity Chair:
Xiong Wang California State University at Fullerton, USA

Proceedings Chair:
Yujun Wang University of California at Santa Barbara, USA

Tutorial/Panel Chair:
Guozhu Dong Wright State University, USA

Demo/Industry Chair:
Chen Li University of California at Irvine, USA

Local Organization Chair:
Jianhua Feng Tsinghua University, China

WAIM Steering Committee:
Jianzhong Li Harbing Institute of Technology, China
Hongjun Lu Hong Kong University of Science & Technology, China
Baile Shi Fudan University, China
Jianwen Su University of California at Santa Barbara, USA
Shan Wang Renmin University, China
X. Sean Wang George Mason University, USA
Ge Yu Northeastern University, China
Aoying Zhou Fudan University, China

The Third International Conference on Web-Age Information Management was organized by
Renmin University of China, China
Tsing Hua University, China

in cooperation with
Database Society of China Computer Federation

and sponsored by
National Science Foundation of China
Microsoft Research in Asia
Oracle(China)
IBM DB2(China)
