# Table of Contents

## Technical Papers

Reduced Cost-Based Ranking for Generating Promising Subproblems ........ 1  
*Michela Milano and Willem J. van Hoeve*

Integrating Constraint and Integer Programming for the Orthogonal Latin Squares Problem ......................... 17  
*Gautam Appa, Ioannis Mourtos, and Dimitris Magos*

On Optimal Correction of Inconsistent Linear Constraints .................. 33  
*Paula Amaral and Pedro Barahona*

Temporal Planning through Mixed Integer Programming:  
A Preliminary Report ..................................................... 47  
*Yannis Dimopoulos and Alfonso Gerevini*

A New Multi-resource *cumulatives* Constraint with Negative Heights ........ 63  
*Nicolas Beldiceanu and Mats Carlsson*

On the Sum Constraint: Relaxation and Applications ....................... 80  
*Tallys H. Yunes*

Global Constraints for Lexicographic Orderings .............................. 93  
*Alan Frisch, Brahim Hnich, Zeynep Kiziltan, Ian Miguel, and Toby Walsh*

A Global Filtering Algorithm for Handling Systems  
of Quadratic Equations and Inequations .................................. 109  
*Yahia Lebbah, Michel Rueher, and Claude Michel*

Amplification of Search Performance through Randomization of Heuristics ................................................. 124  
*Vincent A. Cicirello and Stephen F. Smith*

Computing the Envelope for Stepwise-Constant Resource Allocations .... 139  
*Nicola Muscettola*

Local Probing Applied to Scheduling ..................................... 155  
*Olli Kamaraainen and Hani El Sakkout*

A Hybrid Approach for SAT .................................................. 172  
*Djamal Habet, Chu Min Li, Laure Devendeville, and Michel Vasquez*

Recovering and Exploiting Structural Knowledge from CNF Formulas ......... 185  
*Richard Ostrowski, Éric Grégoire, Bertrand Mazure, and Lakhdar Saïs*

Towards a Symmetric Treatment of Satisfaction and Conflicts  
in Quantified Boolean Formula Evaluation .................................. 200  
*Lintao Zhang and Sharad Malik*
Accelerating Random Walks .............................................. 216
Wei Wei and Bart Selman

Scaling and Probabilistic Smoothing:
Efficient Dynamic Local Search for SAT .............................. 233
Frank Hutter, Dave A. D. Tompkins, and Holger H. Hoos

Learning and Solving Soft Temporal Constraints:
An Experimental Study .................................................. 249
Francesca Rossi, Alessandro Sperduti, Kristen B. Venable, Lina Khatib,
Paul Morris, and Robert Morris

Opportunistic Specialization in Russian Doll Search ................. 264
Pedro Meseguer, Martí Sánchez, and Gérard Verfaillie

Range-Based Algorithm for Max-CSP ................................. 280
Thierry Petit, Jean-Charles Régis, and Christian Bessière

Resolution Complexity of Random Constraints ....................... 295
David G. Mitchell

Constraint Satisfaction, Bounded Treewidth, and Finite-Variable Logics 310
Victor Dalmau, Phokion G. Kolaitis, and Moshe Y. Vardi

Determining the Number of Solutions to Binary CSP Instances ....... 327
Ola Angelsmark, Peter Jonsson, Svante Linusson, and Johan Thapper

Consistency Checking for Qualitative Spatial Reasoning
with Cardinal Directions ................................................. 341
Spiros Skiadopoulos and Manolis Koubarakis

Open Constraint Satisfaction ........................................... 356
Boi Faltings and Santiago Macho-Gonzalez

Beyond NP: Arc-Consistency for Quantified Constraints ............ 371
Lucas Bordeaux and Eric Monfroy

Secure Distributed Constraint Satisfaction:
Reaching Agreement without Revealing Private Information .......... 387
Makoto Yokoo, Koutarou Suzuki, and Katsutoshi Hirayama

A Dual Graph Translation of a Problem in ‘Life’ ..................... 402
Barbara M. Smith

Groups and Constraints: Symmetry Breaking during Search ........ 415
Ian P. Gent, Warwick Harvey, and Tom Kelsey

Partial Symmetry Breaking ............................................ 431
Iain McDonald and Barbara Smith

Symmetry Breaking Revisited ........................................ 446
Jean-François Puget
Breaking Row and Column Symmetries in Matrix Models .......... 462
Pierre Flener, Alan M. Frisch, Brahim Hnich, Zeynep Kiziltan, Ian Miguel, Justin Pearson, and Toby Walsh

Solving the Kirkman’s Schoolgirl Problem in a Few Seconds .......... 477
Nicolas Barnier and Pascal Brisset

Inferring Constraint Types in Constraint Programming .......... 492
David Lesaint

Model-Based Programming: Controlling Embedded Systems
by Reasoning About Hidden State ....................................... 508
Brian C. Williams and Michel D. Ingham

The Adaptive Constraint Engine ........................................ 525
Susan L. Epstein, Eugene C. Freuder, Richard Wallace, Anton Morozov, and Bruce Samuels

Indexical-Based Solver Learning ....................................... 541
Thi Bich Hanh Dao, Arnaud Lallouet, Andrei Legtchenko, and Lionel Martin

Learning the Empirical Hardness of Optimization Problems: The Case of
Combinatorial Auctions .................................................. 556
Kevin Leyton-Brown, Eugene Nudelman, and Yoav Shoham

Restart Policies with Dependence among Runs:
A Dynamic Programming Approach .................................. 573
Yongshao Ruan, Eric Horvitz, and Henry Kautz

Innovative Applications

Visopt ShopFloor: On the Edge of Planning and Scheduling .......... 587
Roman Barták

Constraint Programming Contribution to Benders Decomposition:
A Case Study ............................................................ 603
Thierry Benoist, Étienne Gaudin, and Benoît Rottembourg

Modeling Camera Control with Constrained Hypertubes .......... 618
Marc Christie, Éric Languénot, and Laurent Granvilliers

Robust and Parallel Solving of a Network Design Problem .......... 633
Claude Le Pape, Laurent Perron, Jean-Charles Régin, and Paul Shaw

Connections Reservation with Rerouting for ATM Networks:
A Hybrid Approach with Constraints .................................. 649
Muriel Lawayrne, Philippe David, and Patrice Boizumault

Communication and Computation in Distributed CSP Algorithms .... 664
César Fernández, Ramón Béjar, Bhaskar Krishnamachari, and Carla Gomes
Posters

Continuous First-Order Constraint Satisfaction
with Equality and Disequality Constraints ....................... 680
Stefan Ratschan

A Relaxation of the Cumulative Constraint ...................... 686
John N. Hooker and Hong Yan

Improving GSAT Using 2SAT ........................................ 691
Peter J. Stuckey and Lei Zheng

A Relational Constraint Solver for Model-Based Engineering .......... 696
Jakob Mauss, Frank Seelisch, and Mugur Tatar

Conflict-Based Repair Techniques
for Solving Dynamic Scheduling Problems ......................... 702
Abdallah Elkhyari, Christelle Guéret, and Narendra Jussien

Scaling Properties of Pure Random Walk on Random 3-SAT ........... 708
Andrew J. Parkes

Criticality and Parallelism in Structured SAT Instances ............. 714
Andrea Roli

Characterizing SAT Problems with the Row Convexity Property .... 720
Hachemi Bennaceur and Chu Min Li

Interchangeability in Soft CSPs .................................... 726
Stefano Bistarelli, Boi Faltings, and Nicoleta Neagu

On Constraint Problems with Incomplete or Erroneous Data .......... 732
Neil Yorke-Smith and Carmen Gervet

Heuristic Constraint Propagation .................................. 738
Meinolf Sellmann and Warwick Harvey

An Arc-Consistency Algorithm
for the Minimum Weight All Different Constraint ................ 744
Meinolf Sellmann

Algebraic Properties of CSP Model Operators .................... 750
Y. C. Law and Jimmy H. M. Lee

AC-3q an Efficient Arc-Consistency Algorithm
with a Low Space-Complexity ...................................... 755
Marc R. C. van Dongen

Doctoral Program

Integrating Search Objects in Asynchronous Constraint Solving .......... 761
Georg Ringwelski
Distributed Constraint-Based Railway Simulation ......................... 762
*Hans Schlenker*

Symmetry Breaking in Peaceably Coexisting Armies of Queens .......... 763
*Karen E. Petrie*

Batch Processing with Sequence Dependent Setup Times ............... 764
*Petr Víšť*

Interactive Heuristic Search Algorithm ..................................... 765
*Tomáš Müller*

On Constraint Problems with Incomplete or Erroneous Data .............. 766
*Neil Yorke-Smith*

Design of a New Metaheuristic for MAXSAT Problems ................... 767
*Andrea Roli*

Disjunctive and Continuous Constraint Satisfaction Problems .......... 768
*Miguel A. Salido and Federico Barber*

Tuning Randomization in Backtrack Search SAT Algorithms ............. 769
*Inês Lynce and João Marques-Silva*

Constraint Solving in Test-Data Generation .............................. 770
*Yuan Zhan*

Improving Cost Calculations for Global Constraints in Local Search ... 772
*Markus Bohlin*

A Modeling Framework for Constraints ..................................... 773
*Gerrit Renker*

A Linear Programming Based Satisfiability Solver
Using a New Horn-Driven Search Tree Design ............................. 775
*Linda van Norden and Hans van Maaren*

A Concurrent Constraint Programming Approach
for Trajectory Determination of Autonomous Vehicles .................. 777
*Luis Quesada and Peter Van Roy*

Using Constraint Propagation to Accelerate Column Generation
in Aircraft Scheduling ..................................................... 778
*Mattias Grönkvist*

Solving and Learning Soft Temporal Constraints;
Ceteris Paribus Statements Represented as Soft Constraints Problems ... 779
*Kristen B. Venable*

A Partially Solved Form for Heterogeneous Constraints
in Disjunctive Normal Form .............................................. 780
*Frank Seelisch*

Models of Injection Problems ............................................. 781
*Brahim Hnich and Toby Walsh*
Partial Symmetry Breaking ............................................... 782  
*Iain McDonald*

Automatic Generation of Implied Clauses for SAT ....................... 783  
*Lyndon Drake, Alan Frisch, and Toby Walsh*

Bridging the Gap between SAT and CSP ................................. 784  
*Carlos Ansótegui and Felip Manyà*

Reducing Symmetry in Matrix Models .................................... 786  
*Zeynep Kiziltan*

Studying Interchangeability in Constraint Satisfaction Problems ........ 787  
*Nicoleta Neagu*

Constraint Modeling in the Context of Academic Task Assignment ........ 789  
*Robert Glaubius and Berthe Y. Choueiry*

Design Tradeoffs for Autonomous Trading Agents ........................ 790  
*Ioannis A. Vetsikas*

**Author Index** ..................................................................... 793
Principles and Practice of Constraint Programming - CP 2002
Hentenryck, P.V. (Ed.)
2002, XVI, 794 p., Softcover
ISBN: 978-3-540-44120-5
