List of Contents

Nucleosome Assembly and Remodeling
T. Ito ................................................................. 1

Chromatin Proteins Are Determinants of Centromere Function
J. A. Sharp, P. D. Kaufman ................................. 23

HP1 Complexes and Heterochromatin Assembly
R. Kellum ............................................................. 53

SMC Protein Complexes and the Maintenance of Chromosome Integrity
K. Yokomori ......................................................... 79

Selective Gene Regulation by SWI/SNF-Related Chromatin Remodeling Factors
K. R. Katsani, T. Mahmoudi, C. P. Verrijzer ............ 113

The SWI/SNF Family of ATP-Dependent Chromatin Remodelers: Similar Mechanisms for Diverse Functions
W. Wang .............................................................. 143

Changing the DNA Landscape: Putting a SPN on Chromatin
T. Formosa .......................................................... 171

The MYST Family of Histone Acetyltransferases
R. T. Utley, J. Côté ............................................... 203

N-CoR-HDAC Corepressor Complexes: Roles in Transcriptional Regulation by Nuclear Hormone Receptors
P. L. Jones, Y.-B. Shi ............................................. 237

The NuRD Complex: Linking Histone Modification to Nucleosome Remodeling
Q. Feng, Y. Zhang ............................................... 269

Subject Index ....................................................... 291
Protein Complexes that Modify Chromatin
Workman, J.L. (Ed.)
2003, XI, 298 p., Hardcover
ISBN: 978-3-540-44208-0
