Table of Contents

Invited Papers

Formal Methods in CafeOBJ .................................................. 1
Kokichi Futatsugi

The Essence of XML (Preliminary Version) ............................ 21
Jérôme Siméon and Philip Wadler

To the Gates of HAL: A HAL Tutorial ................................. 47
María García de la Banda, Bart Demoen, Kim Marriott, and Peter J. Stuckey

Tutorial Paper

Functional Logic Design Patterns ........................................ 67
Sergio Antoy and Michael Hanus

Constraints

On Consistency and Width Notions for Constraint Programs with Algebraic Constraints ........................................ 88
Klaus Meer

Solving Mixed Quantified Constraints over a Domain Based on Real Numbers and Herbrand Terms ..................... 103
Miguel García-Díaz and Susana Nieva

Program Transformation and Analysis

On the Correctness of the Factoring Transformation ............... 119
Pascual Julián Iranzo

Lambda-Lifting in Quadratic Time .................................... 134
Olivier Danvy and Ulrik P. Schultz

Semantics

The Well-Founded Semantics in Normal Logic Programs with Uncertainty .................................................. 152
Yann Loyer and Umberto Straccia
Table of Contents

Linearly Used Effects: Monadic and CPS Transformations into the Linear Lambda Calculus ........................................ 167
Masahito Hasegawa

Coinductive Interpreters for Process Calculi ......................... 183
Luís Soares Barbosa and José Nuno Oliveira

Rewriting

Descendants and Head Normalization of Higher-Order Rewrite Systems . 198
Hideto Kasuya, Masahiko Sakai, and Kiyoshi Agusa

Narrowing Failure in Functional Logic Programming .................. 212
Francisco Javier López-Fraguas and Jaime Sánchez-Hernández

Compilation Techniques

The HiPE/x86 Erlang Compiler:
System Description and Performance Evaluation ........................ 228
Mikael Pettersson, Konstantinos Sagonas, and Erik Johansson

Dynamic-Cut with Definitional Trees .................................. 245
Rafael Caballero and Francisco Javier López-Fraguas

Programming Methodology

The Head Condition and Polymorphic Recursion ...................... 259
Jan-Georg Smaus

Structural Abstraction and Application in Logic Programming ........ 275
António Porto

VMλ: A Functional Calculus for Scientific Discovery ................... 290
Eijiro Sumii and Hideo Bannai

Author Index ......................................................................... 305
