# Table of Contents

Embedded Systems: Challenges in Specification and Verification ............ 1  
*Amir Pnueli (Invited Speaker)*

An Approach to Designing Safe Embedded Software ......................... 15  
*Nancy G. Leveson (Invited Speaker)*

Can Behavioral Requirements Be Executed?  
(And Why Would We Want to Do So?) ...................................... 30  
*David Harel (Invited Speaker)*

Platform-Based Embedded Software Design  
for Multi-vehicle Multi-modal Systems ...................................... 32  
*T. John Koo, Judith Liebman, Cedric Ma, Benjamin Horowitz,  
Alberto Sangiovanni-Vincentelli, and Shankar Sastry*

A Giotto-Based Helicopter Control System .................................. 46  
*Christoph M. Kirsch, Marco A.A. Sansvido, Thomas A. Henzinger,  
and Wolfgang Pree*

Principles of Real-Time Programming ....................................... 61  
*Christoph M. Kirsch (Invited Speaker)*

Time-Safety Checking for Embedded Programs ................................ 76  
*Thomas A. Henzinger, Christoph M. Kirsch, Rupak Majumdar,  
and Slobodan Matic*

Compositional Modeling in Metropolis ...................................... 93  
*Gregor Gössler and Alberto Sangiovanni-Vincentelli*

Timed Interfaces ............................................................... 108  
*Luca de Alfaro, Thomas A. Henzinger, and Mariëlle Stoelinga*

Description and Schedulability Analysis of the Software Architecture  
of an Automated Vehicle Control System ................................ 123  
*Stavros Tripakis*

Formal Modeling and Analysis of Advanced Scheduling Features  
in an Avionics RTOS ........................................................... 138  
*Darren Cofer and Murali Rangarajan*

Scalable Applications for Energy-Aware Processors ........................ 153  
*Giorgio C. Buttazzo (Invited Speaker)*
## Table of Contents

Upgrading Embedded Software in the Field: Dependability and Survivability ............................................. 166  
*Lui Sha (Invited Speaker)*

Real-Time Virtual Resource: A Timely Abstraction for Embedded Systems ............................................. 182  
*Aloysius K. Mok (Invited Speaker) and Alex Xiang Feng*

JCOD: A Lightweight Modular Compilation Technology for Embedded Java ............................................. 197  
*Bertrand Delsart, Vania Joloboff, and Eric Paire*

Decreasing Memory Overhead in Hard Real-Time Garbage Collection ............................................. 213  
*Tobias Ritzau and Peter Fritzson*

Speedup Prediction for Selective Compilation of Embedded Java Programs ............................................. 227  
*Vincent Colin de Verdière, Sébastien Cros, Christian Fabre, Romain Guider, and Sergio Yovine*

Synchronous Modelling of Asynchronous Systems ............................................. 240  
*Nicolas Halbwachs (Invited Speaker) and Siwar Baghdadi*

A Protocol for Loosely Time-Triggered Architectures ............................................. 252  
*Albert Benveniste, Paul Caspi, Paul Le Guernic, Hervé Marchand, Jean-Pierre Tulpin, and Stavros Tripakis*

Automatic Production of Globally Asynchronous Locally Synchronous Systems ............................................. 266  
*Alain Girault and Clément Ménié*

Adaptive and Reflective Middleware for Distributed Real-Time and Embedded Systems ............................................. 282  
*Douglas C. Schmidt (Invited Speaker)*

Toward an Approximation Theory for Computerised Control ............................................. 294  
*Paul Caspi and Albert Benveniste*

A New Facility for Dynamic Control of Program Execution: DELI ............................................. 305  
*Giuseppe Desoli, Nikolay Mateev, Evelyn Duesterwald, Paolo Faraboschi (Invited Speaker), and Josh Fisher*

Design Tools for Application Specific Embedded Processors ............................................. 319  
*Wei Qin, Subramanian Rajagopalan, Manish Vachharajani, Hangsheng Wang, Xinping Zhu, David August, Kurt Keutzer, Sharad Malik (Invited Speaker), and Li-Shiuan Peh*

Processor Pipelines and Their Properties for Static WCET Analysis ............................................. 334  
*Jakob Engblom and Bengt Jonsson*
