II/27 Diamagnetic Susceptibility and Anisotropy
Diamagnetic Susceptibility of Organic Compounds, Oils, Paraffins and Polyethylenes

1 General ............................................................... see subvol. A
2 Units and conversion factors ........................................ see subvol. A
3 List of symbols and abbreviations ................................. see subvol. A
4 Organization of tables ............................................... see subvol. A
5 Diamagnetic bulk susceptibility ................................... see subvol. A
6 Diamagnetic bulk susceptibility of inorganic and organometallic compounds see subvol. A
7 Diamagnetic susceptibility of organic compounds .......... 1
  7.1 Diamagnetic bulk susceptibility data ......................... 1
    7.1.1 Compounds containing one carbon atom .............. 1
    7.1.2 Compounds containing two carbon atoms ............ 9
    7.1.3 Compounds containing three carbon atoms .......... 23
    7.1.4 Compounds containing four carbon atoms .......... 34
    7.1.5 Compounds containing five carbon atoms .......... 58
    7.1.6 Compounds containing six carbon atoms .......... 78
    7.1.7 Compounds containing seven carbon atoms ....... 128
    7.1.8 Compounds containing eight carbon atoms ....... 164
    7.1.9 Compounds containing nine carbon atoms ....... 208
    7.1.10 Compounds containing ten carbon atoms .......... 235
    7.1.11 Compounds containing eleven carbon atoms ...... 266
    7.1.12 Compounds containing twelve carbon atoms .. 279
    7.1.13 Compounds containing thirteen carbon atoms .. 303
    7.1.14 Compounds containing fourteen carbon atoms .. 325
    7.1.15 Compounds containing fifteen carbon atoms .. 344
    7.1.16 Compounds containing sixteen carbon atoms .. 353
    7.1.17 Compounds containing seventeen carbon atoms .. 370
    7.1.18 Compounds containing eighteen carbon atoms .. 382
    7.1.19 Compounds containing nineteen carbon atoms .. 399
    7.1.20 Compounds containing twenty carbon atoms ..... 408
    7.1.21 Compounds containing twenty-one carbon atoms .. 422
    7.1.22 Compounds containing twenty-two carbon atoms .. 433
    7.1.23 Compounds containing twenty-three carbon atoms .. 441
    7.1.24 Compounds containing twenty-four carbon atoms .. 444
    7.1.25 Compounds containing twenty-five carbon atoms .. 450
    7.1.26 Compounds containing twenty-six carbon atoms .. 451
    7.1.27 Compounds containing twenty-seven carbon atoms .. 455
    7.1.28 Compounds containing twenty-eight carbon atoms .. 459
    7.1.29 Compound containing twenty-nine carbon atoms .. 467
    7.1.30 Compounds containing thirty carbon atoms .. 467
    7.1.31 Compounds containing thirty-one to thirty-nine carbon atoms .. 471
    7.1.32 Compounds containing forty to eighty-four carbon atoms .. 478
  7.2 Oils ........................................................................ 484
  7.3 Paraffins .................................................................... 485
  7.4 Polyethylenes .......................................................... 485
  7.5 References for 7 ......................................................... 486
    7.5.1 References for calculated data ......................... 486
    7.5.2 References for measured data ............................. 491
Diamagnetic Susceptibility of Organic Compounds, Oils, Paraffins and Polyethylenes
2008, VIII, 503 p., Hardcover
ISBN: 978-3-540-44359-9
