Contents

1 Radiation (and Medical) Biosurveillance: Screening Survivors for Late Effects of Therapy Using the Children’s Oncology Group Long-Term Follow-Up Guidelines
   Melissa M. Hudson, Wendy Landier, Smita Bhatia, Kevin C. Oeffinger, Charles Sklar, Anna Meadows, Marc Horowitz, David Poplack, Michael Fordis, and Louis S. Constine ............... 1

2 Medical Countermeasures to Radiation Injury: Science and Service in the Public Interest. A Tribute to Robert Kallman
   C. Norman Coleman .......................................................... 11

3 Ionizing Radiation and the Endothelium. A Brief Review
   Luis Felipe Fajardo L-G. ......................................................... 19

4 Inflammation and Cell Adhesion Molecules are Involved in Radiation-Induced Lung Injury
   Christopher D. Willey and Dennis E. Hallahan ......................... 23

5 Volume Effects in Radiation Damage to Rat Lung
   Richard P. Hill, Mohammed A. Khan, Aimee R. Langan, Ivan W.T. Yeung, and Jake Van Dyk .................................................. 31

6 The Role of Imaging in the Study of Radiation-Induced Normal Tissue Injury
   Zafer Kocak, Lalitha Shankar, Daniel C. Sullivan, and Lawrence B. Marks ................................................................. 37

7 Screening for Cardiovascular Disease in Survivors of Thoracic Radiation
   M. Jacob Adams, Robert G. Prosnitz, Louis S. Constine, Lawrence B. Marks, and Steven E. Lipshultz ............................... 47

8 Hypoxia-Mediated Chronic Normal Tissue Injury:
   A New Paradigm and Potential Strategies for Intervention
   Mitchell Steven Anscher and Zeljko Vujaskovic .......................... 61

9 Prevention and Treatment of Radiation Injuries:
   The Role of the Renin-Angiotensin System
   Eric P. Cohen, Melissa M. Joines, and John E. Moulder ............... 69

10 Second Malignancies as a Consequence of Radiation Therapy
    Eric J. Hall and David J. Brenner ............................................. 77
11 Using Quality of Life Information to Rationally Incorporate Normal Tissue Effects into Treatment Plan Evaluation and Scoring
Moyed Miften, Olivier Gayou, David S. Parda, Robert Prosnitz, and Lawrence B. Marks .......................... 83

12 Cancer-Related Fatigue as a Late Effect: Severity in Relation to Diagnosis, Therapy, and Related Symptoms

13 Normal Tissue TNM Toxicity Taxonomy: Scoring the Adverse Effects of Cancer Treatment
Philip Rubin ................................................................. 99

14 Radiation Biocontinuum: Follow-Up Care For Cancer Survivors: Needs, Issues, and Strategies
Noreen M. Aziz............................................................... 109

Subject Index ................................................................ 131
