

Contents

| | | |
|----------|--|----------|
| 1 | What are finite elements? | 1 |
| 1.1 | Introduction | 1 |
| 1.2 | Key points of the FE method | 1 |
| 1.3 | Potential energy | 6 |
| 1.4 | Projection | 8 |
| 1.5 | The error of an FE solution | 13 |
| 1.6 | A beautiful idea that does not work | 15 |
| 1.7 | Set theory | 16 |
| 1.8 | Principle of virtual displacements | 23 |
| 1.9 | Taut rope | 29 |
| 1.10 | Least squares | 33 |
| 1.11 | Distance inside = distance outside | 37 |
| 1.12 | Scalar product and weak solution | 40 |
| 1.13 | Equivalent nodal forces | 42 |
| 1.14 | Concentrated forces | 44 |
| 1.15 | Green's functions | 51 |
| 1.16 | Practical consequences | 55 |
| 1.17 | Why finite element results are wrong | 57 |
| 1.18 | Proof | 64 |
| 1.19 | Influence functions | 69 |
| 1.20 | Accuracy | 80 |
| 1.21 | Why resultant stresses are more accurate | 86 |
| 1.22 | Why stresses at midpoints are more accurate | 88 |
| 1.23 | Why stresses jump | 99 |
| 1.24 | Why finite element support reactions are relatively accurate | 99 |
| 1.25 | Gauss points | 104 |
| 1.26 | The Dirac energy | 110 |
| 1.27 | How to predict changes | 113 |
| 1.28 | The influence of a single element | 126 |
| 1.29 | Retrofitting structures | 130 |
| 1.30 | Local errors and pollution | 136 |
| 1.31 | Adaptive methods | 147 |
| 1.32 | St. Venant's principle | 172 |
| 1.33 | Singularities | 175 |
| 1.34 | Actio = reactio? | 177 |

| | | |
|----------|--|------------|
| 1.35 | The output | 181 |
| 1.36 | Support conditions | 183 |
| 1.37 | Equilibrium | 184 |
| 1.38 | Temperature changes and displacement of supports | 187 |
| 1.39 | Stability problems | 193 |
| 1.40 | Interpolation | 197 |
| 1.41 | Polynomials | 199 |
| 1.42 | Infinite energy | 208 |
| 1.43 | Conforming and nonconforming shape functions | 209 |
| 1.44 | Partition of unity | 211 |
| 1.45 | Generalized finite element methods | 213 |
| 1.46 | Elements | 220 |
| 1.47 | Stiffness matrices | 221 |
| 1.48 | Coupling degrees of freedom | 224 |
| 1.49 | Numerical details | 226 |
| 1.50 | Warning | 235 |
| 2 | What are boundary elements? | 239 |
| 2.1 | Influence functions or Betti's theorem | 240 |
| 2.2 | Structural analysis with boundary elements | 247 |
| 2.3 | Comparison finite elements—boundary elements | 262 |
| 3 | Frames | 269 |
| 3.1 | Introduction | 269 |
| 3.2 | The FE approach | 270 |
| 3.3 | Finite elements and the slope deflection method | 289 |
| 3.4 | Stiffness matrices | 292 |
| 3.5 | Approximations for stiffness matrices | 298 |
| 3.6 | Cables | 305 |
| 3.7 | Hierarchical elements | 309 |
| 3.8 | Sensitivity analysis | 313 |
| 4 | Plane problems | 327 |
| 4.1 | Simple example | 327 |
| 4.2 | Strains and stresses | 334 |
| 4.3 | Shape functions | 337 |
| 4.4 | Plane elements | 338 |
| 4.5 | The patch test | 344 |
| 4.6 | Volume forces | 346 |
| 4.7 | Supports | 347 |
| 4.8 | Nodal stresses and element stresses | 357 |
| 4.9 | Truss and frame models | 363 |
| 4.10 | Two-bay wall | 365 |
| 4.11 | Multistory shear wall | 365 |
| 4.12 | Shear wall with suspended load | 370 |

| | | |
|----------|---|------------|
| 4.13 | Shear wall and horizontal load | 375 |
| 4.14 | Equilibrium of resultant forces | 378 |
| 4.15 | Adaptive mesh refinement | 383 |
| 4.16 | Plane problems in soil mechanics | 386 |
| 4.17 | Incompressible material | 393 |
| 4.18 | Mixed methods | 393 |
| 4.19 | Influence functions for mixed formulations | 399 |
| 4.20 | Error analysis | 401 |
| 4.21 | Nonlinear problems | 401 |
| 5 | Slabs | 415 |
| 5.1 | Kirchhoff plates | 416 |
| 5.2 | The displacement model | 421 |
| 5.3 | Elements | 422 |
| 5.4 | Hybrid elements | 425 |
| 5.5 | Singularities of a Kirchhoff plate | 429 |
| 5.6 | Reissner–Mindlin plates | 431 |
| 5.7 | Singularities of a Reissner–Mindlin plate | 436 |
| 5.8 | Reissner–Mindlin elements | 439 |
| 5.9 | Supports | 441 |
| 5.10 | Columns | 443 |
| 5.11 | Shear forces | 451 |
| 5.12 | Variable thickness | 452 |
| 5.13 | Beam models | 459 |
| 5.14 | Wheel loads | 460 |
| 5.15 | Circular slabs | 461 |
| 5.16 | T beams | 462 |
| 5.17 | Foundation slabs | 469 |
| 5.18 | Direct design method | 476 |
| 5.19 | Point supports | 477 |
| 5.20 | Study | 480 |
| 5.21 | Sensitivity analysis | 480 |
| 6 | Shells | 485 |
| 6.1 | Shell equations | 485 |
| 6.2 | Shells of revolution | 488 |
| 6.3 | Volume elements and degenerate shell elements | 490 |
| 6.4 | Circular arches | 491 |
| 6.5 | Flat elements | 493 |
| 6.6 | Membranes | 498 |

| | | |
|----------|--|-----|
| 7 | Theoretical details | 503 |
| 7.1 | Scalar product | 503 |
| 7.2 | Green's identities | 508 |
| 7.3 | Green's functions | 516 |
| 7.4 | Generalized Green's functions | 519 |
| 7.5 | Nonlinear problems | 526 |
| 7.6 | The derivation of influence functions | 529 |
| 7.7 | Weak form of influence functions | 535 |
| 7.8 | Influence functions for other quantities | 539 |
| 7.9 | Shifted Green's functions | 541 |
| 7.10 | The dual space | 552 |
| 7.11 | Some concepts of error analysis | 560 |
| 7.12 | Important equations and inequalities | 568 |

Structural Analysis with Finite Elements

Hartmann, F.; Katz, C.

2007, XII, 598 p. 408 illus., Hardcover

ISBN: 978-3-540-49698-4
